## DISCLOSURES:

**Past performance is not a guarantee or a reliable indicator of future results.** An investment in the Fund could lose money over short or even long periods. You should expect the Fund's share price and total return to fluctuate within a wide range, like the fluctuations of the overall stock market. The Fund's performance could be hurt by stock market risk, which is the chance that stock prices overall will decline. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Further, the Fund's performance could be hurt by investment style risk, which is the chance that returns from small- and middle-capitalization stocks will trail returns from the overall stock market. Historically, these stocks have been more volatile in price than the large capitalization stocks that dominate the overall market, and they often perform quite differently.

Fund performance is net of fees. Underlying managers, strategies, and target weights can change over time. The Small/Mid Cap Equity Fund's historical underlying construction includes:
