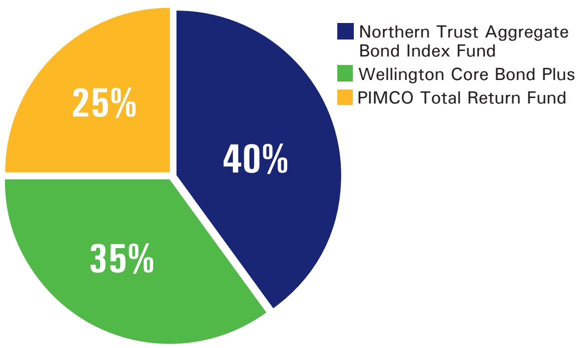
COMPOSITION



INVESTMENT MANAGERS

The Fixed Income Fund is currently managed by Northern Trust, PIMCO and Wellington. Northern Trust is a passive manager that attempts to match the characteristics and performance of the Bloomberg US Aggregate Bond Index. Wellington is an active manager that uses a fundamental process that combines top-down macroeconomic research and sector-relative value analysis with bottom-up security selection for diversified sources of potential outperformance. PIMCO is an active manager that uses top-down macroeconomic and bottom-up security level inputs to seek consistent outperformance over a full market cycle by rotating between fixed income sectors. Overall, the Fund creates a diversified bond portfolio.

DISCLOSURES:

Past performance is not a guarantee or a reliable indicator of future results. Bond values fluctuate in response to changes in interest rates, the financial condition of individual issuers, general market and economic conditions. In general, when interest rates rise, bond values fall and investors may lose principal value. The use of derivatives may reduce returns and/or increase volatility. Active trading results in increased turnover and trading expenses, and may generate higher short-term capital gains. Certain investment strategies tend to increase the total risk of an investment (relative to the broader market). This Fund is exposed to foreign investment risk and mortgage- and asset-backed securities risk.
