

IOT Enterprise Architecture Team - 2021

Who We Are:

An interdisciplinary team reporting to the CTO and led by the Deputy CTO: Director of Enterprise Architecture.

Our Mission:

Promote and facilitate collaborative planning and strategy with our partner agencies, focusing on mission driven outcomes and providing consulting and sourcing or brokering subject matter expertise in a wide range of disciplines.

Department:

493005 (CTO)

Manager:

Chris Henderson

Formed:

Originally formed in 2010 as the Architecture team

What We Do:

Business Relationship Mgt.	Facilitate communications, collaborative planning, and strategy with leadership in our partner agencies.
Capability Needs Identification	Focusing on business outcomes, engage partner agencies to proactively identify changes and disruptions to mission and operations that necessitate new or different technical capabilities.
Support Organizational Change	Provide guidance and advice as well as brokering connections and relationships to support change initiatives.
Support Mission-led Innovation	Champion, promote, and help mature innovation by our partner agencies to address needs across state government.
Instill Architectural Thinking	Support internal and external technical teams to adopt architectural principles, adopt frameworks and reference architectures, implement and maintain best practices, and support communities of interest around key technologies or domains.
Support Solution Selection	Provide critical insights, context, and subject matter expertise around the selection of solutions or systems. Help team to test and proof ideas or concepts, always looking to what supports the strategy and direction of technology across the enterprise.

Our Metrics:

TBD

Our Customers:

All state government entities

Major Accomplishments:

- Helped implement cloud service provider products
- Provided consulting and guidance to key initiatives related to the State's response to the coronavirus pandemic

Current Projects:

- Defining vision, strategy, scope, and framework for an enterprise architecture program
- Iteratively developing and implementing a multi-cloud-smart strategy
- Collaborating and assisting executives, Security, and the Identity Team in the development of Identity Strategy
