

Embedding the video into your IN.gov website (dotCMS)

Webmasters - Log into your CMS (dotCMS) and navigate to the page you would like to embed your meeting.

Using the Video Player link, you can input the link to the video and embed it automatically in a content area:

Under the Edit controls:

There are options for the video player and a field for the video URL:

Title * Video Player	Layout Horizontal ▼
Video Url https://youtu.be/FULL-URL-HERE	Intro Content Paragraph ▼ B <i>I</i> <u>U</u> S Lorem ipsum dolor sit amet, consectetur adipiscing elit. Donec dictum pellentesque varius. Vivamus lobortis lacinia odio sit amet aliquam. Sed mollis commodo nunc, sed consequat elit sollicitudin nec.
Auto Play ☐	
Show Related Videos ☐	
Show Controls ☒	

Alternatively, we can just place a Code Block on the page and put a full embed code snippet from YouTube in there, but you lose the in.gov template styling that comes with using the video player content type.
