

Accessing the State of Indiana Network using the Guest Access Portal

The State of Indiana uses device authentication to determine if the device you are connecting to the network is a known device.

If you connect an unknown device to the State network, you will be directed to the Guest Access Portal, where you will be able to log into the network for Internet-only access.

You will then have the opportunity to use your VPN account, if you have one, to access State resources or register your device in order to bypass the Guest Portal for subsequent connections.

Instructions for Connecting

Connect your device to the network using a network cable or connect your wireless device to "Indiana Secure WiFi" which requires a State network account. Then, open your Internet browser.

If you are not redirected to the Guest Access Portal automatically, type any website address into your browser and you should be redirected. We recommend www.in.gov.

Log in using your State email address (or UPN). If you are not a State employee, you may use your Guest Access Account. If you do not have a Guest Access Account, you may register for one.

Log in for access to the Internet.

[Register for a Guest Account](#)

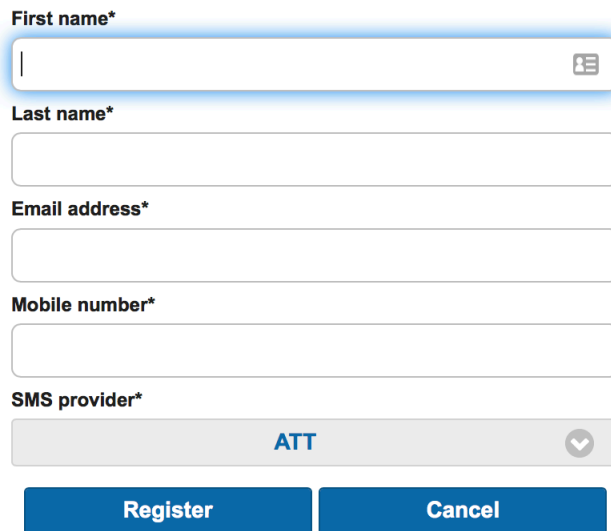

Once you are logged into the Guest Access Portal, you will be able to access the Internet, but will not have access to any resources hosted on the State network.

If you need to register for a guest account, click the Register for a Guest Account link on the sign in page.

Enter your First name, Last name, Email address, Mobile number, and choose your SMS provider.

Create Account

Provide us with some information so we can create an account for you.

The form consists of five input fields and a dropdown menu, followed by two buttons. The 'First name*' field is highlighted with a blue glow. The 'SMS provider*' dropdown menu shows 'ATT' as the selected option. The 'Register' and 'Cancel' buttons are blue with white text.

First name*

Register Cancel

You will receive a temporary password via email and text message. You will need this password because you will be required to change the password on your first login.

The next screen will display your information, minus your temporary password. You need not click on the "Email Me" or "Text Me" buttons unless you do not receive your temporary password in a timely manner. Click the "Sign On" button (see image on next page)

Account Created

Use the following information to sign on to the network.

Username:
First name:
Last name:
Email:
Mobile number:
SMS provider:

Email Me

You have completed the enrollment and now have access to the Internet. To access State hosted resources, you may use your VPN account, if you have one, or you may register your device. Registering your device will also bypass the Guest Access Portal on subsequent connections.

Your guest account is valid for 90 days, at which time you will be required to re-enroll.
