

INDIANA SCHOOL FOR THE BLIND AND VISUALLY IMPAIRED

Technology, Local Area Network, and Internet Policy

Policy O-07

Policy: The purpose of this policy is to define the responsibilities and appropriate use of the Indiana School for the Blind and Visually Impaired (ISBVI) computer technology that includes the use of the Local Area Network (LAN), internal electronic mail (E-mail) and the Internet for employees, contractors, volunteers, and students. In today's workplace and school environment, employees and students have come to rely on technology as an integral and essential tool to perform their duties and responsibilities. In particular, adapted assistive technology for students who are visually impaired is a most essential and necessary tool for academic and vocational success. With such technology, students who are visually impaired have gained increased accessibility to previously inaccessible information allowing them to be more competitive and inclusive in school and work settings. While the Internet provides vast, diverse, and unique resources to benefit students in expanding their knowledge and enhancing their education, unfortunately, it also affords access to information that is not appropriate, and therefore requires appropriate controls to be enacted.

This policy is designed to ensure that employees, contractors, volunteers, and students 1) have the opportunity to access and benefit from technology in their work or learning activities; and 2) are provided notice that inappropriate use of the technology will result in consequences.

It is ISBVI policy to 1) encourage use of technology as an essential tool in the classroom and workplace; 2) make adaptations and accommodations for persons with disabilities to allow full access and benefit for students and staff members; 3) supervise the use of technology made available to students, contractors, volunteers, and staff members to ensure that it is used appropriately; and 4) require students and staff members who use ISBVI's LAN and the Internet to acknowledge that they received a copy of, and training on, this ISBVI Board policy and accompanying ISBVI Administrative Directives and Procedures.

This policy requires that staff members, contractors, volunteers, and students:

- 1) Use the assigned technology, LAN, or Internet only for official state business or learning activities consistent with specific job or school responsibilities and **for the purpose of conducting personal business as long as such use is infrequent, of short duration, does not interfere with the performance of assigned duties and made on the employee's personal time, and is not for the purpose of generating financial or personal gain;**
- 2) Use only software owned, licensed, or being evaluated by ISBVI to conduct state government business or learning activities;
- 3) Will not engage in unauthorized access of any forms of electronic files or jeopardize the LAN or the Internet security, and will not permit others to use the LAN or the Internet which the state has provided them;
- 4) Refrain from using the technology, LAN, or Internet whenever they are uncertain if an activity is appropriate or permissible and secure written clarification and approval before proceeding;
- 5) Be aware that their inappropriate use of the technology, LAN, and/or the Internet could result in disciplinary action being taken against them as an employee, contractor, volunteer, or student and that the state retains the right to pursue prosecution when misuse of its information and computing resources are suspected to be in violation of law;
- 6) Be aware that all information they place on or retrieve from the LAN, and/or the Internet, including E-mail accounts and the facilities of the Internet, may be subject to the Access to Public Records Act, Indiana Code 5-14-3. Unless exempted by law, information placed on or retrieved from the Internet is a public record and, therefore, eligible for public disclosure;
- 7) Acknowledge that the State has the right to monitor their use of the LAN and the Internet including communications occurring through it;
- 8) Are required to report to a school administrator misuse of the LAN or the Internet, such as, but not limited to pornography, unethical or illegal solicitation, political information, product advertising, misuse of copyrighted

material, racism, sexism, inappropriate language, or any electronic vandalism to harm or destroy data of another user or agency;

9) Understand that students are required to use the school email system for all electronic communications with contacts outside of the ISBVI campus, unless otherwise authorized through the Information Technology Director. Webmail, instant messaging, client / server email connectivity (ie. POP, SMTP, IMAP, etc), social networks, and other such means are strictly prohibited, again unless otherwise authorized through the Information Technology Director.

10) Understand that while staff is authorized to access their web-based email for appropriate personal use, they may not use personal email to convey sensitive or confidential information that is within the scope of school business. Only the school email system may be used to communicate such information, as it provides the ability to secure outgoing messages.

11) Refrain from the use of any removable media for transfer or backup of sensitive or confidential information, unless the media is authorized through the Director of Information Technology as reasonably encrypted and password protected. Any unsecured or secured media that has been misplaced, lost, or stolen should be immediately reported to the Director of Information Technology.

13) Understand that you may only listen to music on school computers when it is played directly from a CD or file directly stored on removable media such as a flash drive. Under no circumstances can music be downloaded (“ripped”) or played via streaming Internet sources, except where formally authorized through the Information Technology Director.

14) Except where authorized through the Director of Information Technology, passwords are never to be shared and must be changed under any circumstance in which a breach has occurred. This is to maintain the integrity of confidential electronic files and email.

15) Acknowledge that the use of the ISBVI technology, LAN, and the Internet is a privilege, not a right, and that inappropriate use may result in cancellation of the privilege;

16) Are expected to abide by accepted rules of network etiquette.

The ISBVI Board directs the ISBVI Superintendent to ensure staff, contractor, and volunteer compliance with this policy by:

- 1) Developing ISBVI Administrative Directives and Procedures to implement the ISBVI Board Policy on Technology, Local Area Network, and Internet Policy which shall serve as notice to staff, contractors, and volunteers, and clearly delineate and detail their responsibilities, expectations, and procedures to follow;
- 2) Providing employees, contractors, and volunteers written notice and documenting their awareness and receipt of this ISBVI Board Technology, Local Area Network, and Internet Policy and accompanying ISBVI Administrative Directives and Procedures;
- 3) Providing initial and periodic on-going training to employees, contractors, and volunteers on the ISBVI Board Technology, Local Area Network, and Internet Policy and accompanying ISBVI Administrative Directives and Procedures.
