

SYNTHETIC MARIJUANA (K2/SPICE)

HEALTH WARNING

People who are taking these drugs should
NOT donate blood or plasma.

K2/SPICE IS **NOT** MARIJUANA

It's often called synthetic marijuana or fake weed because some of its chemicals act like those in marijuana. These products can contain rat poison and other dangerous chemicals that cause unpredictable effects, such as unusual bleeding, that can be severe or life-threatening.

Anyone who has a serious reaction to synthetic marijuana should call 911 or go to the emergency department immediately.
