

On August 3rd, Katie Hokanson (Director) and Ramzi Nimry (Trauma System PI Manager) attended the Designation Subcommittee meeting at Eskenazi Health.

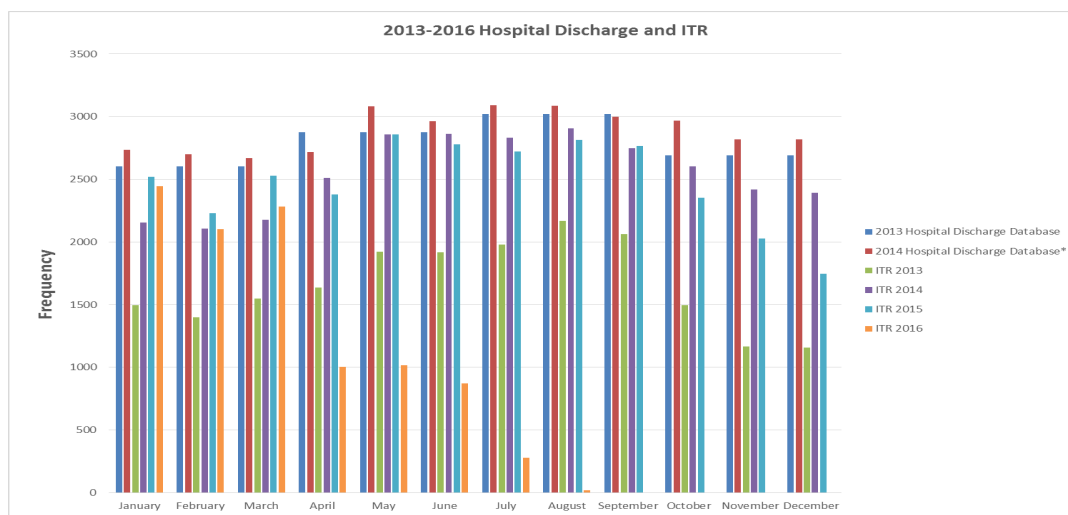

On August 17th, Katie Hokanson (Director), Camry Hess (Database Analyst) and Ramzi Nimry (Trauma System PI Manager) attended District 5's first Regional Trauma meeting at Indianapolis EMS headquarters.

On August 26th, Katie Hokanson (Director) and Ramzi Nimry (Trauma System PI Manager) attended the 3rd Annual EMS Medical Directors' Conference at the Sheraton - Keystone at the Crossing.

The Indiana Trauma Registry (ITR) monthly report is a dashboard style report for the Indiana Criminal Justice Institute (ICJI) and any other party concerned about trauma in Indiana. This report highlights the four data quality measures for the ICJI grant: completeness, timeliness, uniformity, integration and accessibility. This report uses data within the ITR, with an emphasis on motor vehicle collisions (MVC).

Completeness

The Hospital Discharge database, also maintained by the ISDH, contains all records of patients cared for in Indiana hospitals. We compared patient records from the ITR with the Hospital Discharge database to know how complete is the ITR's data.

Timeliness

Timeliness increases as facilities wait until the data submission deadline to submit data to the ITR. Hospitals are asked to report data on the national trauma (TQIP) reporting schedule.

The decrease in timeliness from April 2016 until August 2016 is due to only timely reports being provided to the ITR during this time frame, typically from non-trauma hospitals and early reporting trauma centers.

Uniformity

In June we sent out the twenty-eighth monthly quiz for the inter-rater reliability study. Fifty-five registrars completed the quiz from 47 hospitals. The percent of correct answers was 74% for the entire quiz and the average free-marginal Kappa (measure of consistency) 0.44. We plan to collect data for four months and track trends in percent of correct answers by individuals and as a group over time as well as their consistency. Other activities to improve the uniformity of data includes trauma registrar training throughout the state and at the Indiana State Department of Health.

Integration

The number of linked EMS to trauma cases was 2,686 for Q1 2016 data. Trauma data is due on a quarterly basis.

Accessibility

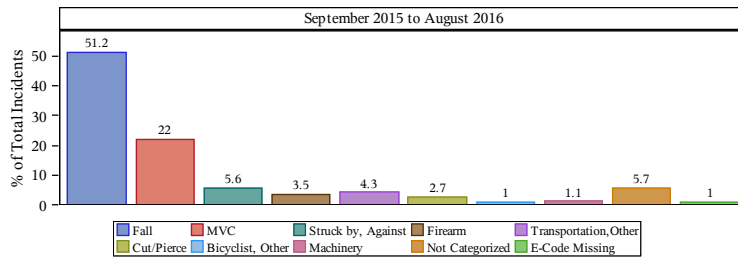

The average time to complete data requests was 01.5 days for aggregate requests (2 total) and 2 days for identifiable requests (1 total). There were no self-report requests during August.

Cause of Injury (COI)

Cause of Injury (COI)

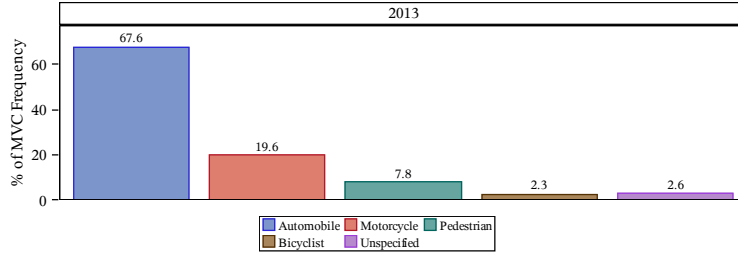

<1% of COI: Pedestrian (Other), Natural/Environmental, Overexertion, Fire/Burn, and Bites/Stings
Cause of Injury (COI)

Injury Severity Score

Protective Devices

Injury Severity Score (ISS) is a measure of how bad the injury is. Scores over 15 are considered major trauma. A score of 75 is considered not survivable.
