Does the patient have influenza-like illness [fever ≥100°F plus cough and/or sore throat]?

**YES:** Did the patient have direct (i.e., touching) or indirect (i.e., standing within 6 feet) contact with swine or did they attend a fair with swine within 7 days of illness onset?

**NO:** Did the patient have close contact (i.e., standing within 6 feet) within 7 days of illness onset with a patient with confirmed H3N2v infection?

**YES:** Contact the ISDH Surveillance and Investigation Division¹ (317-233-7125) for consultation and testing authorization for a nasopharyngeal specimen

**NO:** Does not meet case definition

**YES:** Contact the ISDH Epidemiology Resource Center¹ (317-233-7125) for consultation and testing authorization for a nasopharyngeal specimen

**NO:** Does not meet ILI case definition*

¹For assistance after normal business hours or on weekends, contact (317) 233-1325.

*The ISDH may still authorize testing even if the patient doesn’t meet the standard ILI case definition. The definition may be kept open when considering possible variant influenza. The ISDH may still test for persons who have had swine exposure and onset of respiratory symptoms (with or without fever). Contact the ISDH Epidemiology Resource Center (ERC) (317-233-7125) for consultation.
