

On January 12th, Katie Hokanson (Director, Division of Trauma and Injury Prevention), Camry Hess (Database Analyst) and Ramzi Nimry (Trauma System PI Manager) attended the PI Subcommittee meeting.

On January 21st, Ramzi Nimry (Trauma System PI Manager) presented at the Clinton Optimist Group Breakfast in Clinton, Indiana.

On January 26th, Katie Hokanson (Director, Division of Trauma and Injury Prevention), and Ramzi Nimry (Trauma System PI Manager) attended the Trauma Designation Subcommittee meeting at Eskenazi Health.

On January 28th, Katie Hokanson (Director, Division of Trauma and Injury Prevention), and Ramzi Nimry (Trauma System PI Manager) attended the District 10 Trauma Regional Advisory Council (TRAC) meeting in Washington, IN.

The Indiana Trauma Registry (ITR) monthly report is a dashboard style report for the Indiana Criminal Justice Institute (ICJI) and any other party concerned about trauma in Indiana. This report highlights the four data quality measures for the ICJI grant: completeness, timeliness, uniformity, integration and accessibility. This report uses data within the ITR, with an emphasis on motor vehicle collisions (MVC).

Completeness

The Hospital Discharge database, also maintained by the ISDH, contains all records of patients cared for in Indiana hospitals. We compared patient records from the ITR with the Hospital Discharge database to know how complete is the ITR's data.

Timeliness

Timeliness increases as facilities wait until the data submission deadline to submit data to the ITR. Hospitals are asked to report data on the national trauma (TQIP) reporting schedule.

The decrease in timeliness from October 2015 until January 2016 is due to only timely reports being provided to the ITR during this time frame, typically from non-trauma hospitals and early reporting trauma centers.

Uniformity

In December we sent out the twenty-third monthly quiz for the inter-rater reliability study. Sixty-eight registrars completed the quiz from 47 hospitals. The percent of correct answers was 58% for the entire quiz and the average free-marginal Kappa (measure of consistency) 0.28. We plan to collect data for four months and track trends in percent of correct answers by individuals and as a group over time as well as their consistency. Other activities to improve the uniformity of data includes trauma registrar training throughout the state and at the Indiana State Department of Health.

Percent Correct

Integration

The number of linked EMS to trauma cases was 500 for Q3 2015 data. Trauma data is due on a quarterly basis.

Accessibility

The average time to complete data requests was 3.3 days for aggregate requests (3 requests) and 3 days for self-reports (1 request). There were no identifiable requests during January.

Cause of Injury (COI)

<1% of COI: Pedestrian (Other), Natural/Environmental, Overexertion, Fire/Burn, and Bites/Stings

COI-Motor Vehicle Collision (MVC)

COI-MVC Nonfatal Incidents and Fatal Incidents

Race

Age

Gender

Drug & Alcohol Use

Injury Severity Score

Protective Devices

Injury Severity Score (ISS) is a measure of how bad the injury is. Scores over 15 are considered major trauma. A score of 75 is considered not survivable.
