FOR IMMEDIATE RELEASE - May 4, 2012 - Natural Balance Pet Foods announced today that it is issuing a voluntary recall of certain dry pet food formulas manufactured by Diamond Pet Foods at their Gaston, South Carolina facility.

Although there have been no animal illnesses reported and none of the products included in the recall has tested positive for *Salmonella*, the company has voluntarily initiated this recall as a precautionary measure.

Pets with *Salmonella* infections may have decreased appetite, fever and abdominal pain. If left untreated, pets may be lethargic and have diarrhea or bloody diarrhea, fever and vomiting. Infected but otherwise healthy pets can be carriers and infect other animals or humans. If your pet has consumed the recalled product and has these symptoms, please contact your veterinarian. We do not have any confirmed reports of pet illnesses.

Individuals handling dry pet food can become infected with *Salmonella*, especially if they have not thoroughly washed their hands after having contact with surfaces exposed to a contaminated product. Healthy people who believe they may have been exposed to *Salmonella* should monitor themselves for some or all of the following symptoms: nausea, vomiting, diarrhea or bloody diarrhea, abdominal cramping and fever. According to the Centers for Disease Control, people who are more likely to be affected by *Salmonella* include infants, children younger than 5 years old, organ transplant patients, people with HIV/AIDS and people receiving treatment for cancer. The U.S. Centers for Disease Control (CDC) have received a limited number of reports of salmonellosis, the illness caused by *Salmonella*.
