Occupant Protection Plan
Checklist for Lead-Based Paint Activities

Name of Occupant(s) - (List property owner’s name if unit is not occupied)

Street Address

City State Zip

Lead Contractor Name Contractor Telephone Number

Project Start Date (mm/dd/yy) Project End Date (mm/dd/yy) IN license number

OCCUPANT PROTECTION PLAN CHECKLIST FOR LEAD-BASED PAINT ACTIVITIES
This is a checklist of actions the contractor will take to protect the occupant, when paint is disturbed. Occupants must stay out of work areas while work is in progress. The contractor must do daily cleaning, but the work area may still contain dangerous levels of lead in dust until final clearance is achieved. The contractor or owner will inform you when areas are safe to re-occupy.

Occupant Location (check all that apply)

- Unit is vacant (no movable objects remain in the unit)
- Occupants will be relocated and stay out of the unit until the lead project is done
- Occupants will not be allowed within the work area before project completion, (which includes clearance with documented dust wipe sample results)
- Occupants will stay outside the dwelling unit during work times but may return each day after clean up 4:00 pm (time allowed back in)
- Occupants will have an available bathroom, bedroom, kitchen during project
- Occupants will be provided a lead-safe entry and exit pathway during the project
- Occupants pets will not be allowed in the work area

Furniture (check all that apply)

- Will inform Occupants(s) to remove all personal items and as much furniture as possible from work area before work begins
- Will cover and secure, with plastic, all furniture and personal belongings that can’t be removed

Containment and Barrier system

Interior work: (check all that apply) Location(s): Living Room, Kitchen

- Airlock flap on all doors in work areas, or close and secure doors from inside the work site
- Plastic will cover entire work object floor, and all worker pathways to exit and any work areas
- Plastic will cover floor extending 6’ beyond work area (or use vertical containment) in all directions (when possible)
- Workers will stay on plastic in work area
- Inform Occupants to keep off of plastic in work area
- Lock or firmly secure work area to provide an overnight barrier
- Post warning signs at entry to each room where work is being done, or post warning signs at all building entryways

Exterior Work (check all that apply) the distances listed take you to the distance or property line

- Remove all movable items (playground equipment, toys, sandbox, patio furniture, etc.) to a distance of 20’ from work area or seal these items with plastic
- Use and secure plastic sheeting on the ground extending 10’ from building
- Keep all windows within 20’ of work closed
- Erect barrier tape or temporary fencing around building to make a 20’ perimeter from work area
- Post warning signs a distance of 20’
Occupant Protection Plan  
Checklist for Lead-Based Paint Activities

___ Build a vertical containment when working within 10' of neighboring properties

Window Work  (check all that apply)
- Cover exterior of window when removing windows from the inside
- Cover interior of window when removing windows from the outside
- Use plastic sheeting on the ground under the windows being removed

Work Practices  (check all that apply)
- During component replacement, mist all painted surfaces, except when using a heat gun
- Use a heat gun, not to exceed 1100°F Fahrenheit
- Use a machine planer, chipper, grinder, or sander attached to a properly operating HEPA-filtered vacuum when removing paint.
- Use a chemical paint stripper to remove lead-based paint from components and will follow manufacturer instructions and provide adequate ventilation
- Use power washing with proper containment to prevent the waste water generated from contaminating the soils or surface waters or allowing paint chips in neighboring properties.
- Use containment to isolate areas where paint is being distributed from the rest of the property
- Will not use abrasive blasting or sandblasting
- Employees will wear disposable booties in work area and remove before leaving work area
- Will not use HUD/EPA or IN prohibited practices

Ventilation System  (check all that apply)
- Turn off system and seal off vents within 6' of the work area

Daily Cleaning  (check all that apply)
- Remove debris from dwelling or store it in a locked secure area
- Clean all horizontal surfaces in the work area with a HEPA vacuum and wet washing
- Clean and remove plastic walkways each day, replacing with new each day
- Clean all walkways that are used as pathways to the work area with a HEPA vacuum
- Clean any area (on both sides of the containment) where containment is breached
- Clean off debris, fold, and secure all plastic sheeting or landscape fabric overnight but may use again the next day

Final Cleaning  (check all that apply)
- Will not begin until at least 1 hour after work is completed
- Remove all visible debris and dust
- Will use a HEPA vacuum and wet washing to clean horizontal surfaces and trim in work areas
- Will use a HEPA vacuum and wet washing to clean surfaces and floors in the work area and extending at least 2’ beyond treated area
- Remove all paint chips found after exterior work within 48 hours of exterior job completion

CONTRACTOR'S CERTIFICATION

I certify that a copy of the Occupant Protection Plan was provided to the property owner or occupant(s) of the property address listed on the form on this date ______________ by way of __________________ (describe delivery method).
