

The following is a Summary of Public Comments for LSA #19-572

Comment #1 from Indiana Health Care Association

Zach Cattell, President of IHCA suggested a change to make it clear that the data access right requirement applies when the CMS program requires said data to be reported. He suggested adding “that requires data to be reported to NHSN” to the language in 410 IAC 15-4-7(a).

ISDH Response

The program concurred that this would clarify the language and not change the intent of the amendment.
