

Tuberculosis Disease (TB) Reporting for IPs in NBS

When to submit a TB Morbidity Report

Patient has a positive PCR for MTB complex and/or a positive culture for MTB complex
AND/OR

Patient has been started/will be starting RIPE therapy

Do not submit a TB Morbidly Report for a patient with a positive TST/IGRA without evidence of active disease

Completing a TB Morbidity Report

1. Complete required variables: Jurisdiction, Morbidly report Type, Date of Morbidity Report, and Reporting Facility
2. **SKIP Clinical Information, Epidemiological Information, Lab Report Information, and Treatment Information**
3. Attach completed Report of TB (available at TB.IN.gov) and relevant documentation (AFB lab reports, chest imaging, physician notes) under Attachment Information

It is recommended to also immediately contact the local health department to begin arrangement of care and provision of treatment through directly observed therapy
