Yersiniosis Case Classification Flow Chart
November 2013 – no CSTE Case Definition

Are there positive laboratory results?

Does the patient meet the clinical description\(^1\)?

- No
  - Not a Case

  - Yes
    - Is the patient epidemiologically linked to a confirmed case?
      - No
        - Not a Case
      - Yes
        - Probable Case

Are the lab results an isolation from a clinical specimen?

- Yes
  - Confirmed Case
- No
  - Not a Case

\(^1\) Clinical description refers to specific symptoms and signs consistent with an infection caused by Yersinia species.
Yersiniosis (*Yersinia enterocolitica, Yersinia pseudotuberculosis*)

Clinical Description: Common symptoms among children are fever, abdominal pain, and diarrhea, which is often bloody. The most common symptom among older children and adults is a pseudoappendicitis syndrome (fever, abdominal pain, tenderness in the right lower quadrant of the abdomen, and leukocytosis).
