Statewide Gang Database

Indiana Gang Network (INGangNetwork) is a statewide criminal gang intelligence database. Intelligence entered in INGangNetwork can be accessed by members via mobile devices or online, allowing all law enforcement and criminal justice personnel to enter and retrieve intelligence on gang membership, activity, associations, members, signs, colors, etc. INGangNetwork is a powerful tool that makes it easy to collect, analyze, and share gang intelligence in a central location with the intent of preventing and reducing gang related activity in conformance with the privacy and constitutional rights of all individuals.

Convenient

Students may transfer to different schools making it difficult to share intelligence collected. INGangNetwork makes it easy to share intelligence with different agencies in a central location.

Encourage all law enforcement involved in your school to become members of INGangNetwork.

INGangNetwork's Focus:

- provide one central location to collect, analyze, and share gang intelligence
- develop and maintain partnerships with law enforcement and criminal justice personnel throughout the country
- provide resources and opportunities to better serve members
- direct access to the database via mobile devices and online
- no age requirement of those who may be entered into the system
- **FREE MEMBERSHIP**.

Membership

Visit the Indiana State Police and INGangNetwork website to learn more about school safety, gain access to additional resources, and become a member!
