ACCESS SERVICE

4. End User Access Service (Cont'd)4.12 Universal Service Fund Recovery Charge

Pursuant to the Telecommunications Act of 1996, as implemented by the Federal Communications Commission, the Telephone Company is required to pay into a federally mandated Universal Service Fund by means of contribution factors assessed on the Telephone Company's interstate retail end user revenues. The Universal Service Fund provides federally subsidized affordable access to modern telecommunications and information services for schools, libraries, and rural health care facilities that meet specific eligibility standards, as well as providing support to subsidize basic telephone service in high cost areas and for low income subscribers.

The Telephone Company recovers its costs of contributing to the Universal Service Fund through the Universal Service Fund (USF) Recovery Charge element. The USF Recovery Charge is a percentage surcharge applied to the interstate charges which give rise to the Telephone Company's obligation. These services are any interstate services provided to an end user that are not resold, either individually or as part of a bundle of services, to another party.

The USF Recovery Charge will apply to End User Common Line Charges except for Lifeline customers. The USF Recovery Charge will apply to PICC charges billed directly to the end user. The USF Recovery Charge will also apply to Special Access charges billed to the end user. The USF Recovery charge will not apply to End User Common Line Charges, PICC charges, or Special Access charges that are billed to a reseller of local exchange service in connection with services offered for resale. The USF Recovery charge will not apply to PICC charges or Special Access charges that are billed to interexchange carriers.

The percentage to be applied for the USF Recovery Charge is as follows:

11.3% (l)
