Subject: Please create sensible, forward thinking policy that furthers the work of past Indiana Energy Efficiency Programs

Please create sensible, forward thinking policy that furthers the work of past Indiana Energy Efficiency Programs. Please consider the following objectives when shaping the next policy proposal.

- Re-instate energy efficiency goals in Indiana at least as good as 2% by 2019, goals established in Cause No. 42693, 2009
- Require ALL ratepayers to contribute. Any opt-outs for large electricity consumers must be fair and have other energy efficiency requirements associated with their ability to opt-out.
- Require an independent, non-profit third party administrator to oversee the program.

Thank you for your time and consideration,

Dan Sockrider
