Authority: IC 8-1-1-3; IC 8-1-2-4; IC 8-1-12

Affected: IC 8-1-12

Sec. 29. (a) The utility shall use good engineering and water utility practices in determining the route for all main extensions.

(b) The utility shall determine the total length of the extension from its existing main to serve the extension to the end of the lot or frontage of the most remote applicant to be served.

(c) However, if the end lot or frontage is a corner lot or frontage abutting an intersecting street in which an existing main is located, the end of the new extension must connect with the existing main located in that intersecting street.

(d) If the end lot or frontage is a corner lot or frontage abutting an intersecting street in which no main is located, the end of the new extension may not extend beyond the intersecting street corner of that lot.

(e) If the street in which the main is to be laid dead ends in a cul-de-sac or appears to be permanently dead ended against a railroad, creek, river, or other major physical or natural barrier, the end point of the main extension, if serving the most remote lot or frontage, shall be the point of the most remote service pipe connection, which connection point shall be at least ten (10) feet beyond the lot line. 170 IAC 6-1.5-30 Number of lots served by main extension

Authority: IC 8-1-1-3; IC 8-1-2-4; IC 8-1-12

Affected: IC 8-1-12

Sec. 30. A determination shall be made of the number of lots to be served by the main extension. The determination may include only lots which directly abut the main extension between its original beginning and its original end point. If any part of the main extension is located within an area platted or to be platted, the number of lots shown within the plat to be served shall be included in the determination. If any part of the main extension is located in an unplatted area, the number of lots to be included shall be determined by dividing the total frontage of the main extension within the unplatted area on either or both sides of the public thoroughfare or easement in which the main is located by one hundred (100) feet and rounded to the nearest whole number of lots, provided either or both sides are available for future development and not restricted against usage because of limited access or other reasons. The determination of the number of lots for a particular extension may include a combination of platted and unplatted lots as defined in this section. Any further main extension subsequently connected to the original main extension shall, for all purposes under this rule, constitute a separate main extension. 170 IAC 6-1.5-31 Main extension cost

Authority: IC 8-1-1-3; IC 8-1-2-4; IC 8-1-12

Affected: IC 8-1-12

Sec. 31. (a) The cost of the main extension may, as determined by the utility, be either:

(1) the computed cost based on the average costs for similar main extensions experienced by the utility during its preceding fiscal year, plus or minus any amount necessary to adjust for known cost increases or decreases;

(2) the estimated cost of the extension; or

(3) the actual cost of a developer-installed extension.

(b) In the absence of representative cost data for the previous year for any size or type of main or for any special construction, or for any other facility involved in a main extension, the cost shall be the utility's best estimate of the cost of the main, special construction, or related facilities based upon current available information.

WATER UTILITIES

(c) If the cost of the main extension is computed or estimated under subsection (a)(1) or (a)(2), it shall be based on an eight (8) inch main unless the utility determines that a larger or smaller main is reasonably necessary to serve the applicant, including fire protection service, in which event the cost, computed or estimated, shall be based on the size of main determined reasonably necessary.

(d) If the utility's future extension plans require a larger main than is reasonably necessary to serve the applicants and prospective customers, the difference in the cost for the larger main size and increased material and installation cost, if any, shall be borne by the utility.

(e) The computed or estimated cost may be adjusted to the actual cost by the utility, in which event the actual cost as finally determined shall constitute the cost of the main extension. If the main extension agreement provides for the adjustment of the computed or estimated cost of the main extension to the actual cost, the adjustment shall be made upon completion of the main extension. If the actual cost of the extension is less than the computed or estimated cost, the utility shall refund the difference to the original depositor as soon as the actual cost has been determined. If the actual cost of the extension exceeds the computed or estimated cost, then the utility shall bill the original depositor for, and that depositor shall pay, the difference between the computed or estimated cost and the actual cost.

(f) If the utility determines that a main larger than eight (8) inches is reasonably necessary to serve the domestic and fire protection requirements of the applicant, and those requirements are significantly in excess of the requirements of the other applicants or the prospective customers along the intervening route of the main, the cost of the main extension or deposit for other applicants or subsequent connector's fee for the prospective customers shall be based on the smaller size main that the utility has determined is adequate to meet the requirements of the other applicants or the prospective customers along the intervening route. Authority: IC 8-1-1-3; IC 8-1-2-4; IC 8-1-12

Affected: IC 8-1-12

Sec. 33. (a) The utility shall file with the commission, for approval, its choice of the following options with appropriately revised rules:

- (1) For the main extension, the applicant shall be required to pay the cost of the main extension, and the full gross-up state and federal taxes associated with the cost of the extension and the applicant shall receive refunds as provided in sections 36 through 37 of this rule.
- (2) For the main extension, the applicant shall be required to pay the cost of the main extension exclusive of the tax associated with the main extension, and the applicant shall receive refunds as provided in sections 36 through 37 of this rule.
- (3) For the main extension, the applicant shall be allowed the option of paying the cost of the main extension and full gross-up state and federal taxes associated with the cost of the main extension, and the applicant shall receive refunds as provided in sections 36 through 37 of this rule, or shall pay the cost of the main extension exclusive of the tax associated with the main extension and the applicant shall forfeit all rights to immediate revenue allowances and to refunds, except for subsequent

connector's fees.

(b) If the utility desires to change its option after initial filing, the utility shall submit its requested revisions to the commission for approval. Affected: IC 8-1-12

Sec. 34. (a) In the case of a residential real estate development, immediate revenue allowance may not be deducted from the cost of the main extension in determining the amount of the total required deposit, except for those residential dwelling units, if any, where construction has commenced above the first floor level.

(b) In the case of a commercial or industrial real estate development, immediate revenue allowance may not be deducted from the cost of the main extension in determining the amount of the total required deposit, except where building construction has commenced and pertinent data, such as customer types, service pipe, metering arrangements, and water demands, have been furnished to the utility, to allow the utility to determine the estimated annual revenue from that development.

(c) The total required deposit for a main extension may either be made in a cash payment, or it may be secured by an irrevocable letter of credit acceptable to the utility and issued by a national banking association or a bank chartered under the laws of the state. The deposit may also be secured in any other manner which is mutually acceptable to the parties and which guarantees payment of the deposit immediately upon completion of the main extension.

(d) If permitted by the utility, the main extension may be installed by the developer or the developer's contractor according to the extension and installation policies of the utility, and the actual cost of the developer-installed extension shall be considered the total required deposit.

(e) A utility may allocate, or permit original depositors to allocate, the total required deposit on the basis of the number of lots, the respective lot frontage, or any other basis mutually acceptable to the original depositors. 170 IAC 6-1.5-35 Subsequent connector fee

Authority: IC 8-1-1-3; IC 8-1-2-4; IC 8-1-12

Affected: IC 8-1-12

Sec. 35. (a) Within ten (10) years after the completion date of the main extension, a utility shall not permit a subsequent connector to connect to a main extension until after the subsequent connector has paid the required subsequent connector's fee to the utility.

(b) Applicants for service connections for lots in subdivision and tract developments which are included in the original depositor's main extension agreement, are not required to pay a subsequent connector's fee, unless otherwise specifically provided for in the main extension agreement.

(c) If a prospective customer with frontage land that was unplatted on one (1) or both sides of the street at the time the main extension was installed later subdivides this frontage prior to the expiration of the ten (10) years after the completion date of the main extension in such a manner that some or all lots will not require service directly from that main extension, the customer is considered to have requested a lateral extension from that main extension to serve the customer's land. The utility, in that case, shall collect from the prospective customer prior to installing the requested lateral main extension, a subsequent connector's fee for each equivalent lot of the frontage land used in determining the main extension cost per lot and which will not be served directly by the original main extension. 170 IAC 6-1.5-36 Refunds

Authority: IC 8-1-1-3; IC 8-1-2-4; IC 8-1-12
Affected: IC 8-1-12

Sec. 36. (a) Refunds shall be paid for a period of ten (10) years after the completion date of the main extension to the original depositor in proportion to the respective deposits, unless the original depositor for the main extension forfeited all rights to refunds, except subsequent connector's fees, as provided in section 33(a)(3) of this rule.

(b) However, no refunds shall be required to be made by the utility until the number of customers actually connected to the main extension equals the number of applicants for which an immediate revenue allowance was included in computing the total required deposit for the main extension. The refunds shall be paid annually or more frequently at regular intervals at the discretion of the utility.

(c) Total refunds to any original depositor shall not exceed the amount of the original deposit except in the case of a phased residential real estate development. In this situation the preliminary plat must be submitted to the utility at the time of the first request for a main extension. During the ten (10) year period beginning with the completion date of the first main extension, the amount of any refunds generated in excess of the deposit made on any phase of the development must be applied against the deposit made for any other phase of the development, so long as the total amount of refunds to the original depositor shall not at any time exceed the total amount of his deposits during the period. The utility shall not require any subsequent connector's fee which is in excess of the unrefunded balance of the aggregate of deposits received from all original depositors.

(d) The refund shall be made by mailing the payment to the original depositor's last known address as shown on the books and records of the utility. Any refund distribution which cannot be returned to an original depositor after the refund becomes due and payable must be reported as required by IC 32-9-1-42 [*Repealed by P.L.31-1995, SECTION 9, effective July 1, 1996.*]. If the original depositor for a main extension forfeits all rights to a refund, except for subsequent connector's fees as provided in section 33(a)(3) of this rule, the payment must be included in contributions in aid of construction, and the associated taxes shall be deducted from contributions in aid of construction. Authority: IC 8-1-1-3; IC 8-1-2-4; IC 8-1-12

Affected: IC 8-1-12

Sec. 40. (a) A utility may require a special contract when:

(1) the requested main extension is of such length and the prospective business to be developed by it is so meager as to make it doubtful whether the business from the extension would ever pay a fair return on the utility investment involved in such extension;

(2) the prospects are that the patronage and demand will not be of such permanency as to warrant the capital expenditure involved;

(3) there are industrial installations requiring extensive water utility investment and where the demand for water service is expected to be slight, irregular, or of unknown quantity; or

(4) there are other abnormal or extraordinary circumstances.

(b) The utility and the applicant requesting the extension may enter into a special contract establishing the terms and conditions on which the extension will be made.
