

October 13, 2011

The Hoosier Environmental Council (HEC), Indiana's largest environmental policy organization, encloses red-lining pertaining to the Strawman Proposal (9/15/11) of RM#11-05.

HEC prefaces our red-lining with the following comments:

1. HEC appreciates that the Proposal does not award incentives to pre-existing resources.
2. HEC fully concurs with the "Existing Resources Should Not Count Toward the Goals" section of the comments submitted by the OUCC on October 12, 2011.
3. Regarding 170 IAC 17-2-7 "Clean energy resource" defined, HEC reiterates the need to add explicit environmental life cycle criteria to a determination of adding additional resources to the statutory list. The basis of our recommendation is that the legislative intent clearly associates clean energy resources with technologies that have a lower environmental life cycle impact: "SB 251's goal is to encourage the use of clean energy sources that are lower-carbon and less polluting than traditional coal-fired power plants."<sup>1</sup>
4. Regarding 170 IAC 17-4-2(3)(F). Program application contents. Since the statutory intent calls for promoting resources with a lower environmental life cycle footprint, we encourage the IURC to add two additional criteria to this list: carbon dioxide emissions and qualitative impacts on soil fertility. These specific criteria are added as other environmental criteria (air, water and waste impacts) would be transparently disclosed to the public in the state environmental permitting process. A particular clean energy project might not require any carbon controls, and state environmental permitting may not address the major impacts that a clean energy project could have on soil health (e.g. a forest thinning to electricity project; an agricultural waste to electricity project).
5. HEC appreciates the inclusion of several valuable "additional factors in justification" in 170 IAC 17-4-2(3)(J)(iii), which should be a "shall" rather than a "may".
6. Regarding 170 IAC 17-4-2(3)(J)3. HEC encourages the use of 'environmental lifecycle impact,' as a well-established term of art in the field of environmental science.
7. Regarding 170 IAC 17-4-4 Commission approval, (5)(b)(2)(c), HEC recommends the addition of a "(9)" where whether or not the resource is required due to a federal or state regulation, court action, Agreed Order, Commissioner's Order or Consent Decree is also taken into account as a factor in awarding an incentive.
8. Our comments here do not constitute the full extent of our views on the Strawman proposal, but represent our most salient recommendations.

Thank you for your consideration of these comments and the associated red-lining.

**170 IAC 17-5-2 Status following approval of participation in CHOICE Program**

Authority: IC 8-1-1-3; IC 8-1-37

Affected: IC 8-1-37

**Sec. 2. (a)** After approval of its participation in the CHOICE Program, the participating electricity supplier is required to follow its CHOICE plan in working toward meeting the CPS Goals.

(b) If a participating electricity supplier decides to change part of its CHOICE plan in a manner that:

- (1) does not impact whether the electricity supplier will meet the CPS Goals; and
- (2) does not increase the ratepayer impact of its CHOICE plan;

the electricity supply shall file the changes with the commission through the commission's thirty-day administrative filing procedures and guidelines in 170 IAC 1-6.

(c) If circumstances change to the point that a participating electricity supplier believes the rates and charges resulting from its participation in the CHOICE Program will no longer be just and reasonable, the participating electricity supplier shall file a petition with the commission requesting a commission determination that the cost of clean energy resources available to the electricity supplier would result in an increase in the rates and charges of the electricity supplier that would not be just and reasonable. The electricity supplier's petition shall include:

- (1) a detailed listing of the participating electricity supplier's attempts to comply with its CHOICE plan;
- (2) a detailed explanation of the change in circumstances giving rise to the electricity supplier's petition;
- (3) a listing of the costs of the clean energy resources available to the electricity supplier; and

- (4) the electricity supplier's calculation supporting the conclusion that the increase in rates and charges would not be just and reasonable.
