IURC Cautions School Districts about use of new gas purchasing tariff

Today the Indiana Utility Regulatory Commission approved a new tariff that provides more flexibility for school districts that currently purchase natural gas from Indiana Gas or Southern Indiana Gas and Electric. This tariff allows schools to move to the transportation rate schedule, which means the school corporations can purchase gas on the wholesale market if they choose.

However, the Commission advises school districts to use this tariff cautiously, as legislation pending in the Indiana General Assembly may require the Commission to modify the terms of the approved tariff.
