

MONROE CIRCUIT COURT

PRETRIAL SERVICES PERFORMANCE AND OUTCOME MEASURES

October 2016 – September 2021

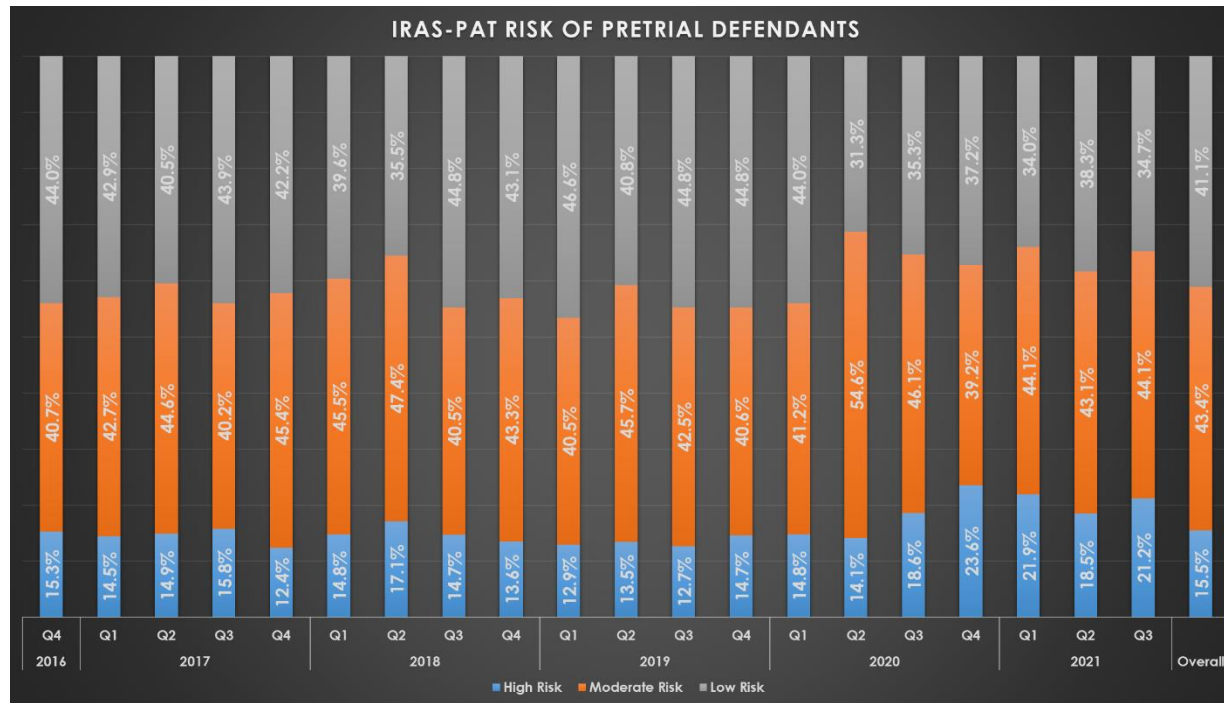

Target Population – All felony and misdemeanor arrestees. Exclusions: probationers, parolees, arrestees under other types of community supervision, and individuals arrested on writ of attachment or a warrant from another jurisdiction.

Risk Assessment – All defendants in the target population are assessed for pretrial risk using the Indiana Risk Assessment System – Pretrial Assessment Tool (IRAS-PAT). The IRAS-PAT measures a person’s likelihood of failing to appear in court or being arrested during the pretrial phase of a defendant’s criminal case. Defendants are assessed after arrest while in custody or after release from jail, but before an initial hearing or meaningful first appearance.

Concurrence Rate – The percentage of defendants in the target population whose pretrial release order corresponds with the locally established pretrial release guide outlined below (last revised on November 14, 2019).

IRAS – PAT Risk Level	Offense Level			
	Non-violent Misdemeanor	Non-violent Felony	Violent Offenses	Murder & Treason
Low	Release on Recognizance; Telephonic Notification	Release on Recognizance; Telephonic Notification	Release on Recognizance; Monitoring Level 1	Not Eligible for Bail
Moderate	Release on Recognizance; Telephonic Notification	Release on Recognizance; Monitoring Level 1	Release on Recognizance; Monitoring Level 2	Not Eligible for Bail
High	Release on Recognizance; Telephonic Notification	Release on Recognizance; Monitoring Level 2	Release on Recognizance; Monitoring Level 3	Not Eligible for Bail

*A recommendation to HOLD (in previously pending cases) shall be provided to the court when:

- The defendant is currently on telephonic notification and is arrested for a new VIOLENT FELONY OFFENSE; or
- The defendant is currently on telephonic notification for domestic battery and is arrested for a new domestic battery, strangulation, and/or invasion of privacy; or
- The defendant is currently on telephonic notification and now has THREE PENDING OFFENSES (to include pending cases from other jurisdictions).

Telephonic Notification: Defendant will only receive telephone and text court reminders. No face-to-face appointments.

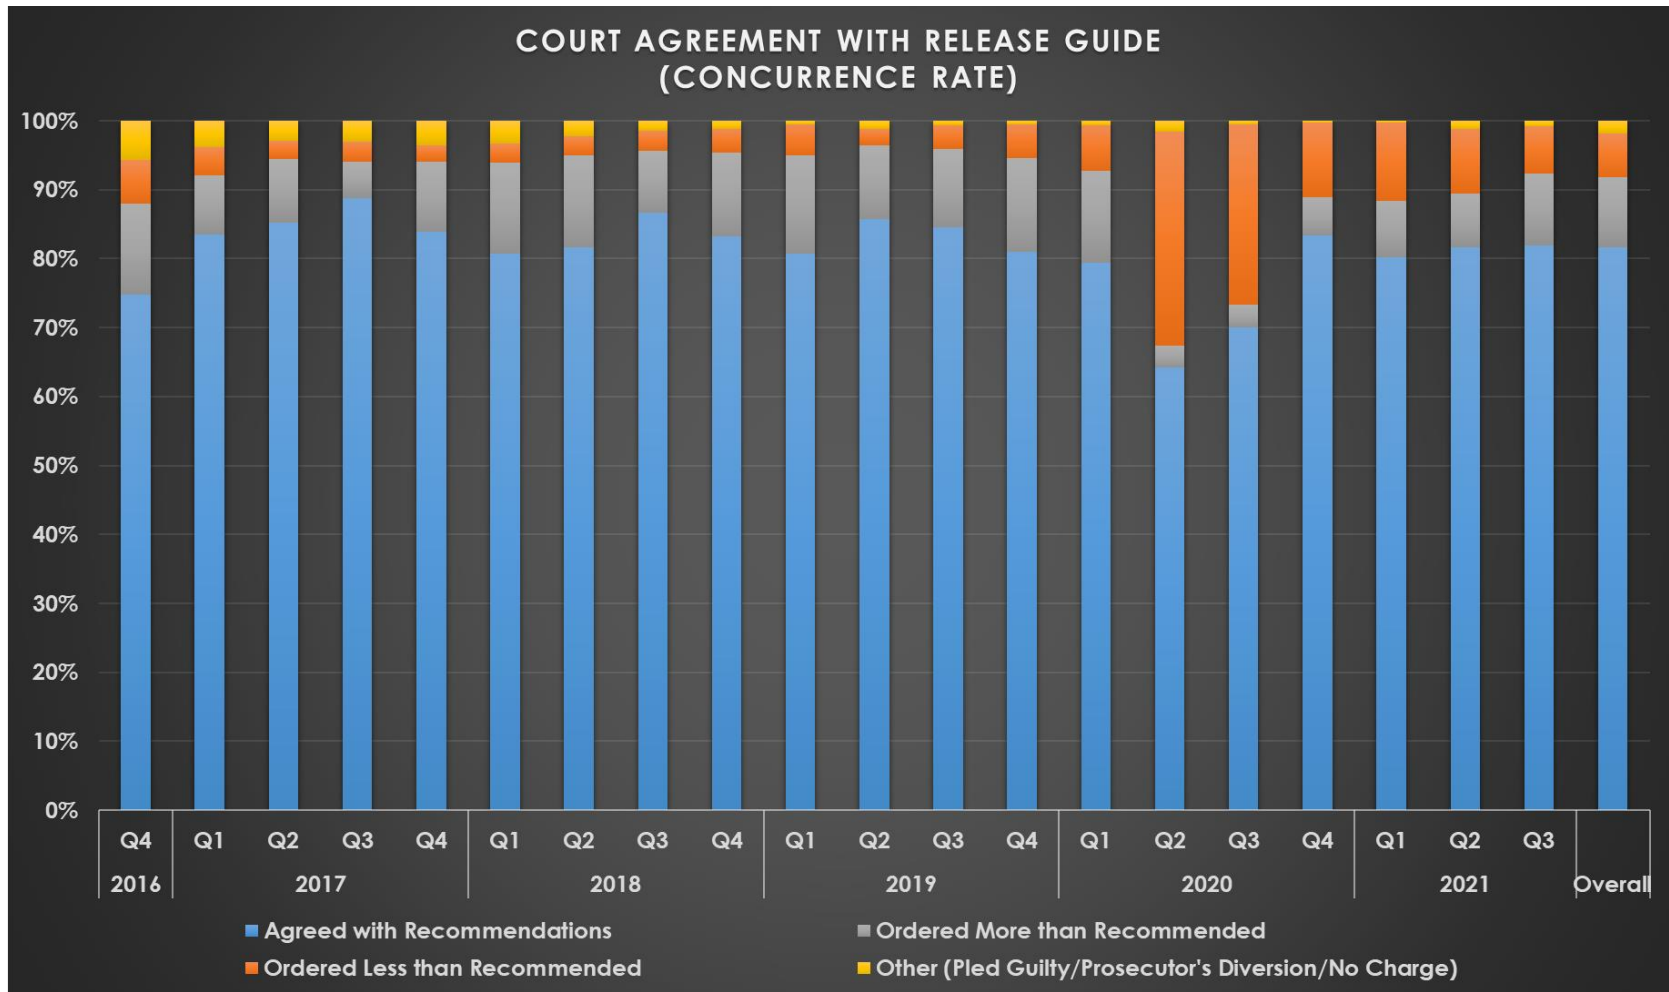

Monitoring Level 1 (Low): At least one face-to-face appointment with a pretrial case manager every month.

Monitoring Level 2 (Moderate): At least one (1) face-to-face appointment AND one other form of contact with a pretrial case manager every month.

Monitoring Level 3 (High): At least two (2) face-to-face appointments with a pretrial case manager every month.

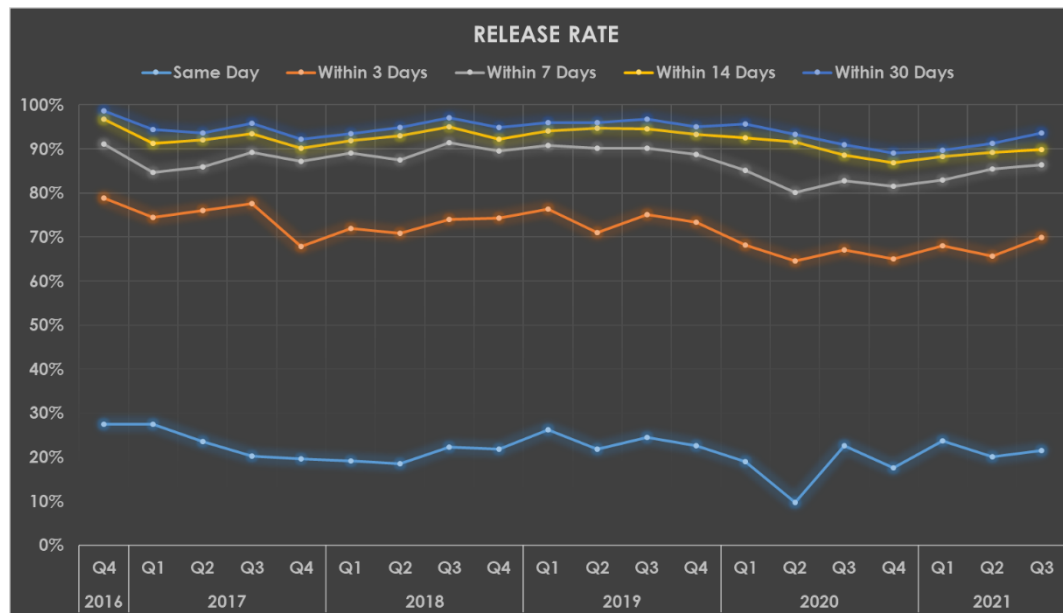

Each monitoring level shall receive telephonic notifications, monthly criminal record checks, and additional release conditions if ordered by a court. Additional release conditions may include, but are not limited to: kiosk reporting; day reporting; home/work contacts by a case manager; electronically monitored curfew, exclusion zones, or alcohol testing; home detention; and drug testing.

Financial Bail Requirements – Each arrested defendant is subject to a bail schedule developed by the Monroe Circuit Court Board of Judges, a copy of which can be found in the Local Rules for the Monroe Circuit Court. If permitted by the bail schedule, a defendant may be released on their own recognizance or permitted to post a financial bail prior to an initial hearing in the case. The chart below indicates financial bail requirements imposed on a defendant at the conclusion of their initial hearing. Greater detailed data collection in this area began in the first quarter of 2017.

The following chart shows the financial bail requirements by offense type after the initial hearing. The percentage shown in the labels of each column indicates the percentage of defendants in each offense type category.

The following chart indicates the risk level of defendants by the established financial bail requirements after the initial hearing. The percentage shown in the labels of each column indicates the percentage of defendants in each financial bail requirement category.

Appearance Rate – The appearance rate for released defendants can be calculated in multiple ways. One way is to track the defendant's appearance at each pretrial hearing and calculate the rate by the total number of pretrial hearings. Alternatively, an appearance rate can be calculated by the percentage of defendants who attend all scheduled hearings during the pretrial stage. The figure below illustrates an example calculation of each method.

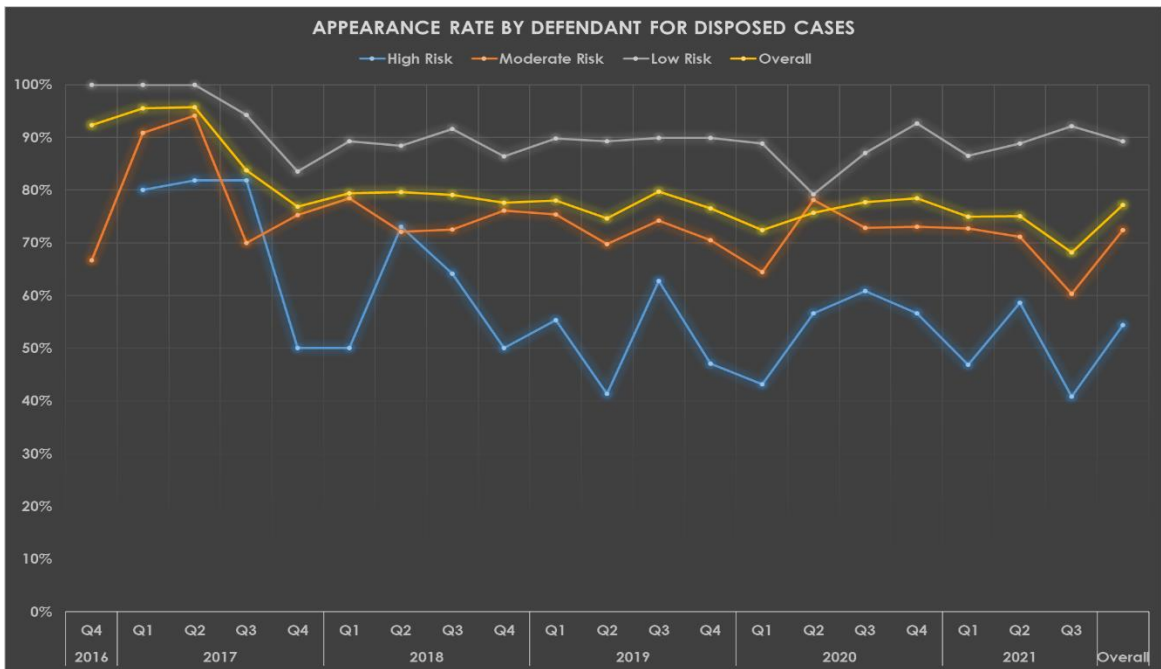

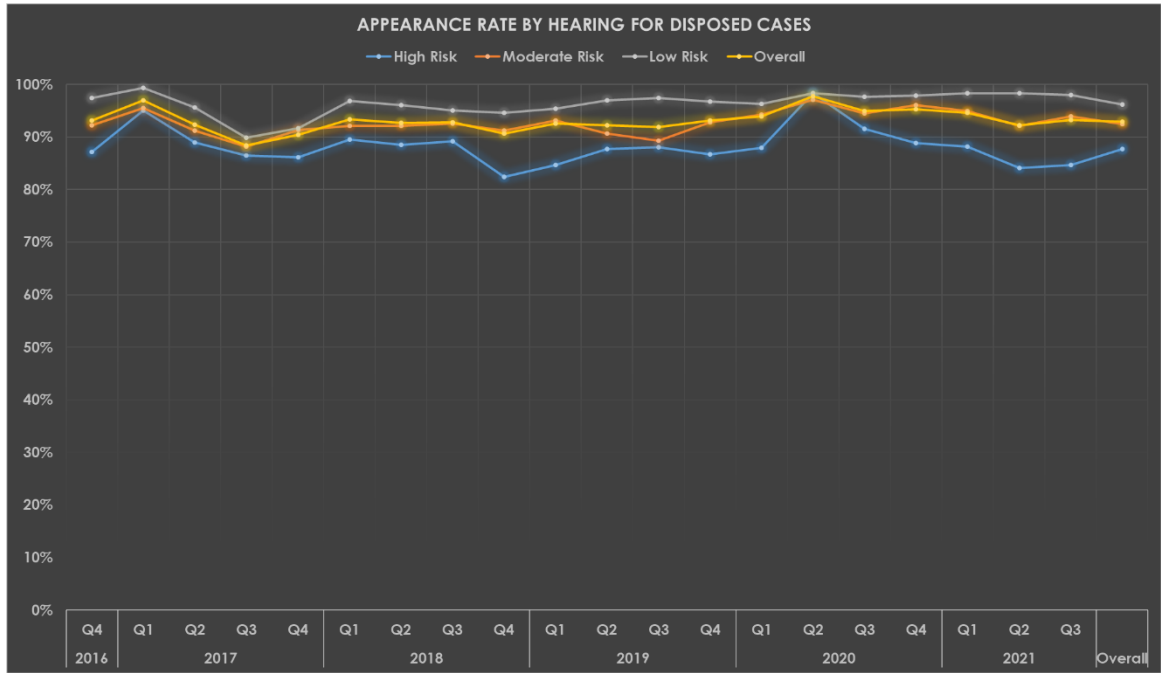

Appearance Rate by Hearing	Appearance Rate by Defendant
Defendant A attends 10 of 10 pretrial hearings. Defendant B attends 4 of 6 pretrial hearings. Defendant C attends 4 of 4 pretrial hearings. Defendant D attends 8 of 8 pretrial hearings. Defendant E attends 5 of 7 pretrial hearings. Defendants A-E attended 31 of 35 pretrial hearings. <i>Appearance rate by hearing is 88.6%.</i>	Defendant A attends 10 of 10 pretrial hearings. Defendant B attends 4 of 6 pretrial hearings. Defendant C attends 4 of 4 pretrial hearings. Defendant D attends 8 of 8 pretrial hearings. Defendant E attends 5 of 7 pretrial hearings. Three of five defendants attended all pretrial hearings. <i>Appearance rate by defendant is 60.0%</i>

Appearance Rate by Hearing – The percentage of hearings attended by released defendants in the target population during the quarter indicated while their case was pending. This represents cases disposed and includes all hearings after the initial hearing until case disposition.

The following chart indicates the outcome of the failure to appear using the appearance rate by defendant. If a defendant had more than one failure to appear for a case, the outcome was counted using the following hierarchy: (1) failure to appear – warrant issued, (2) failure to appear – summons issued, and (3) failure to appear – not specified.

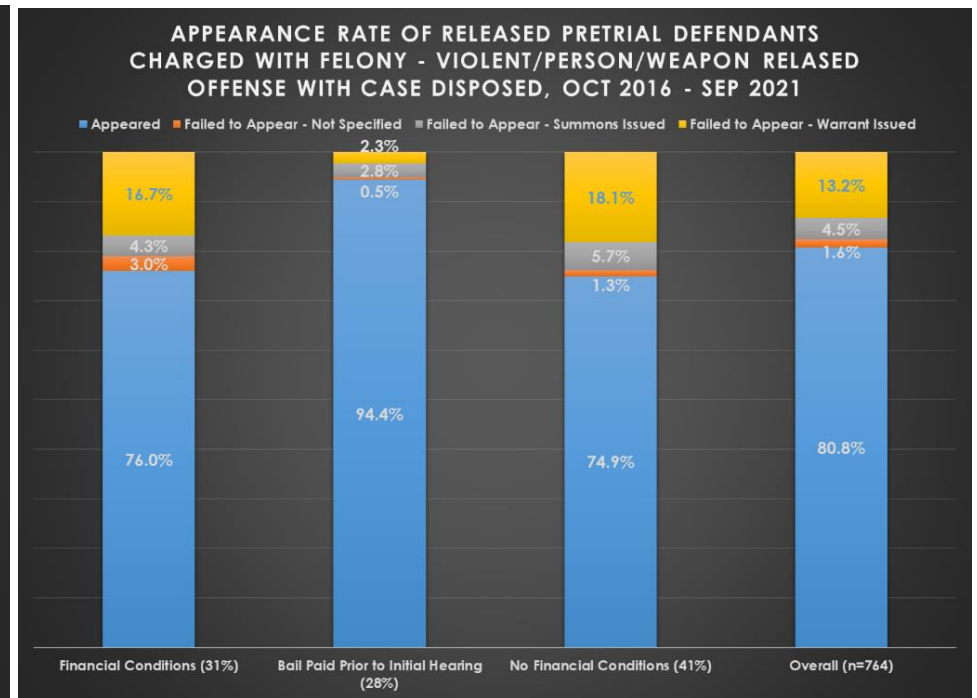

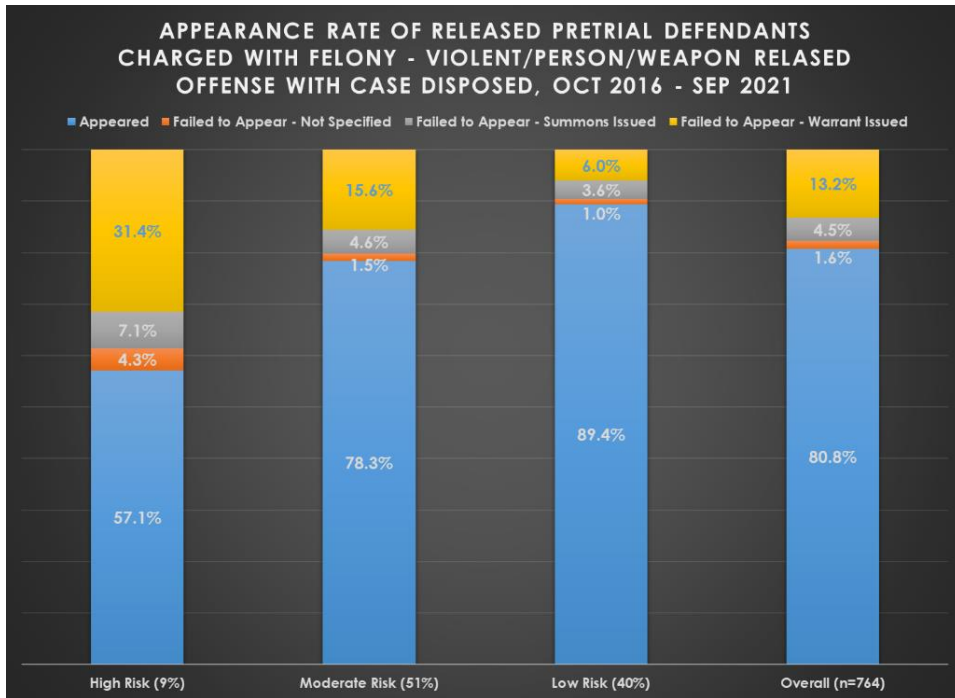

The next chart shows the appearance rate by defendant by case type. The percentage listed in each column indicates the percentage of the overall number of defendants categorized in the column.

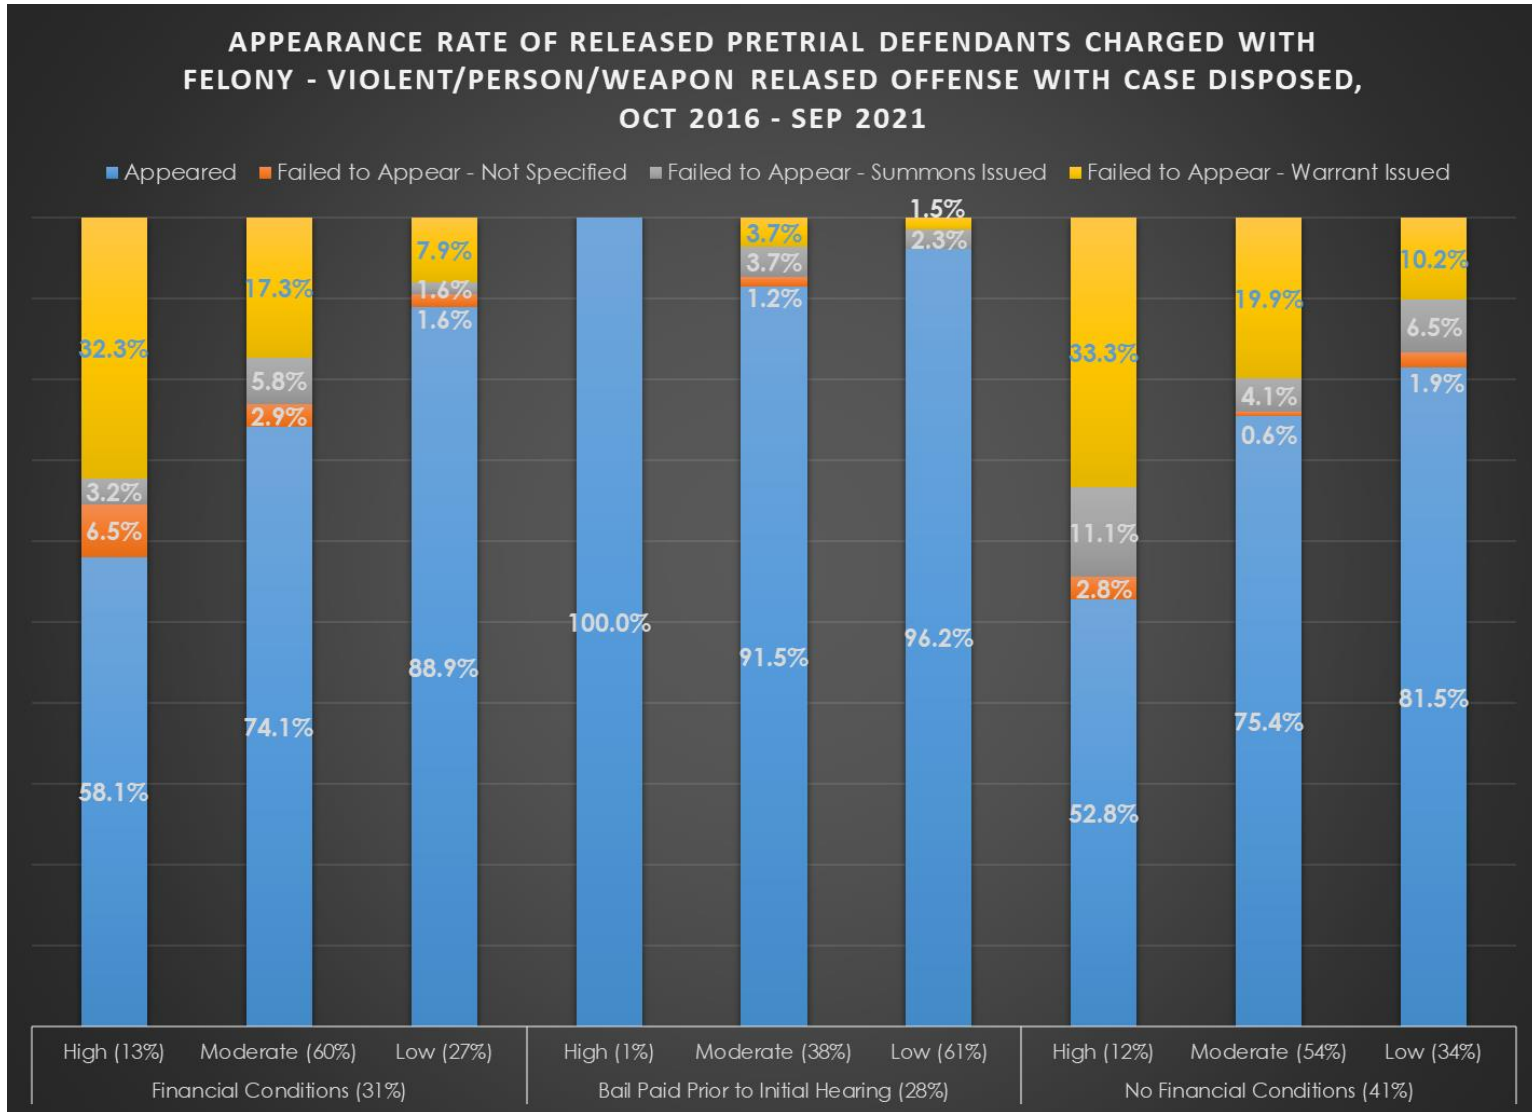

The next two charts show the appearance rate by defendant by risk level and financial bail requirements. The percentage listed in each column indicates the percentage of the overall number of defendants categorized in the column.

These two charts in this section indicate the appearance rate by defendant for the felony – violent/person/weapon offense type by risk level and financial bail requirements. The percentage listed in each column indicates the percentage of the overall number of defendants categorized in the column.

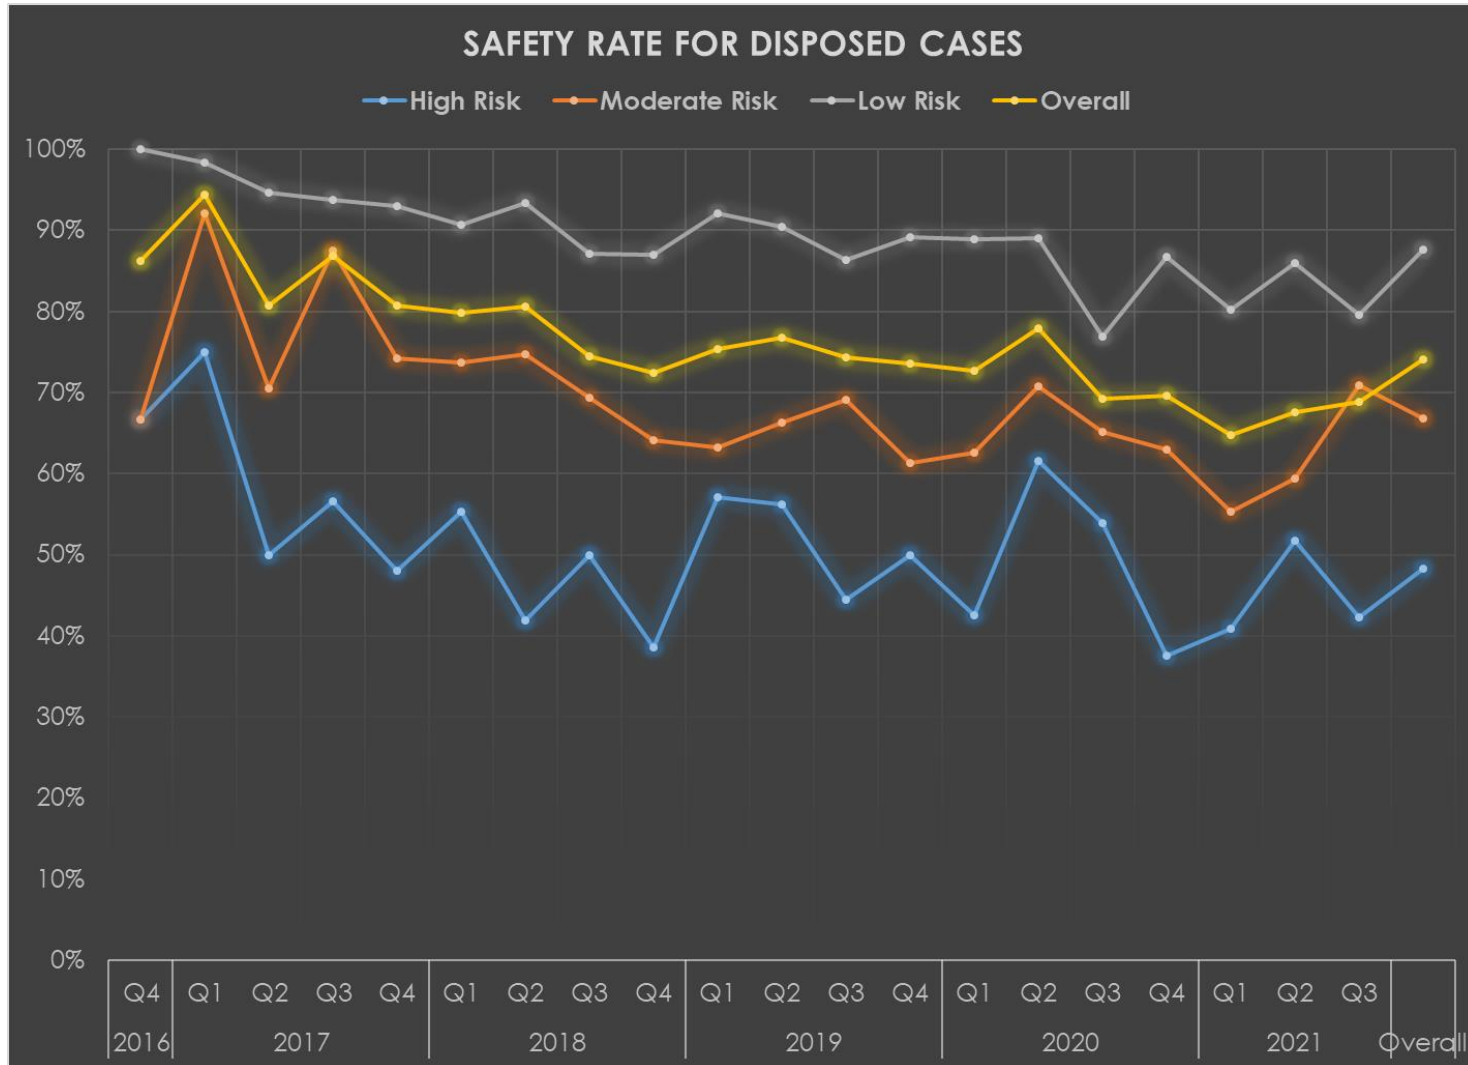

The final chart indicates the appearance rate by defendant for the felony – violent/person/weapon offense type by risk level and financial bail requirements combined. The percentage listed in each column indicates the percentage of the overall number of defendants categorized in the column and by risk level within each financial bail requirement category.

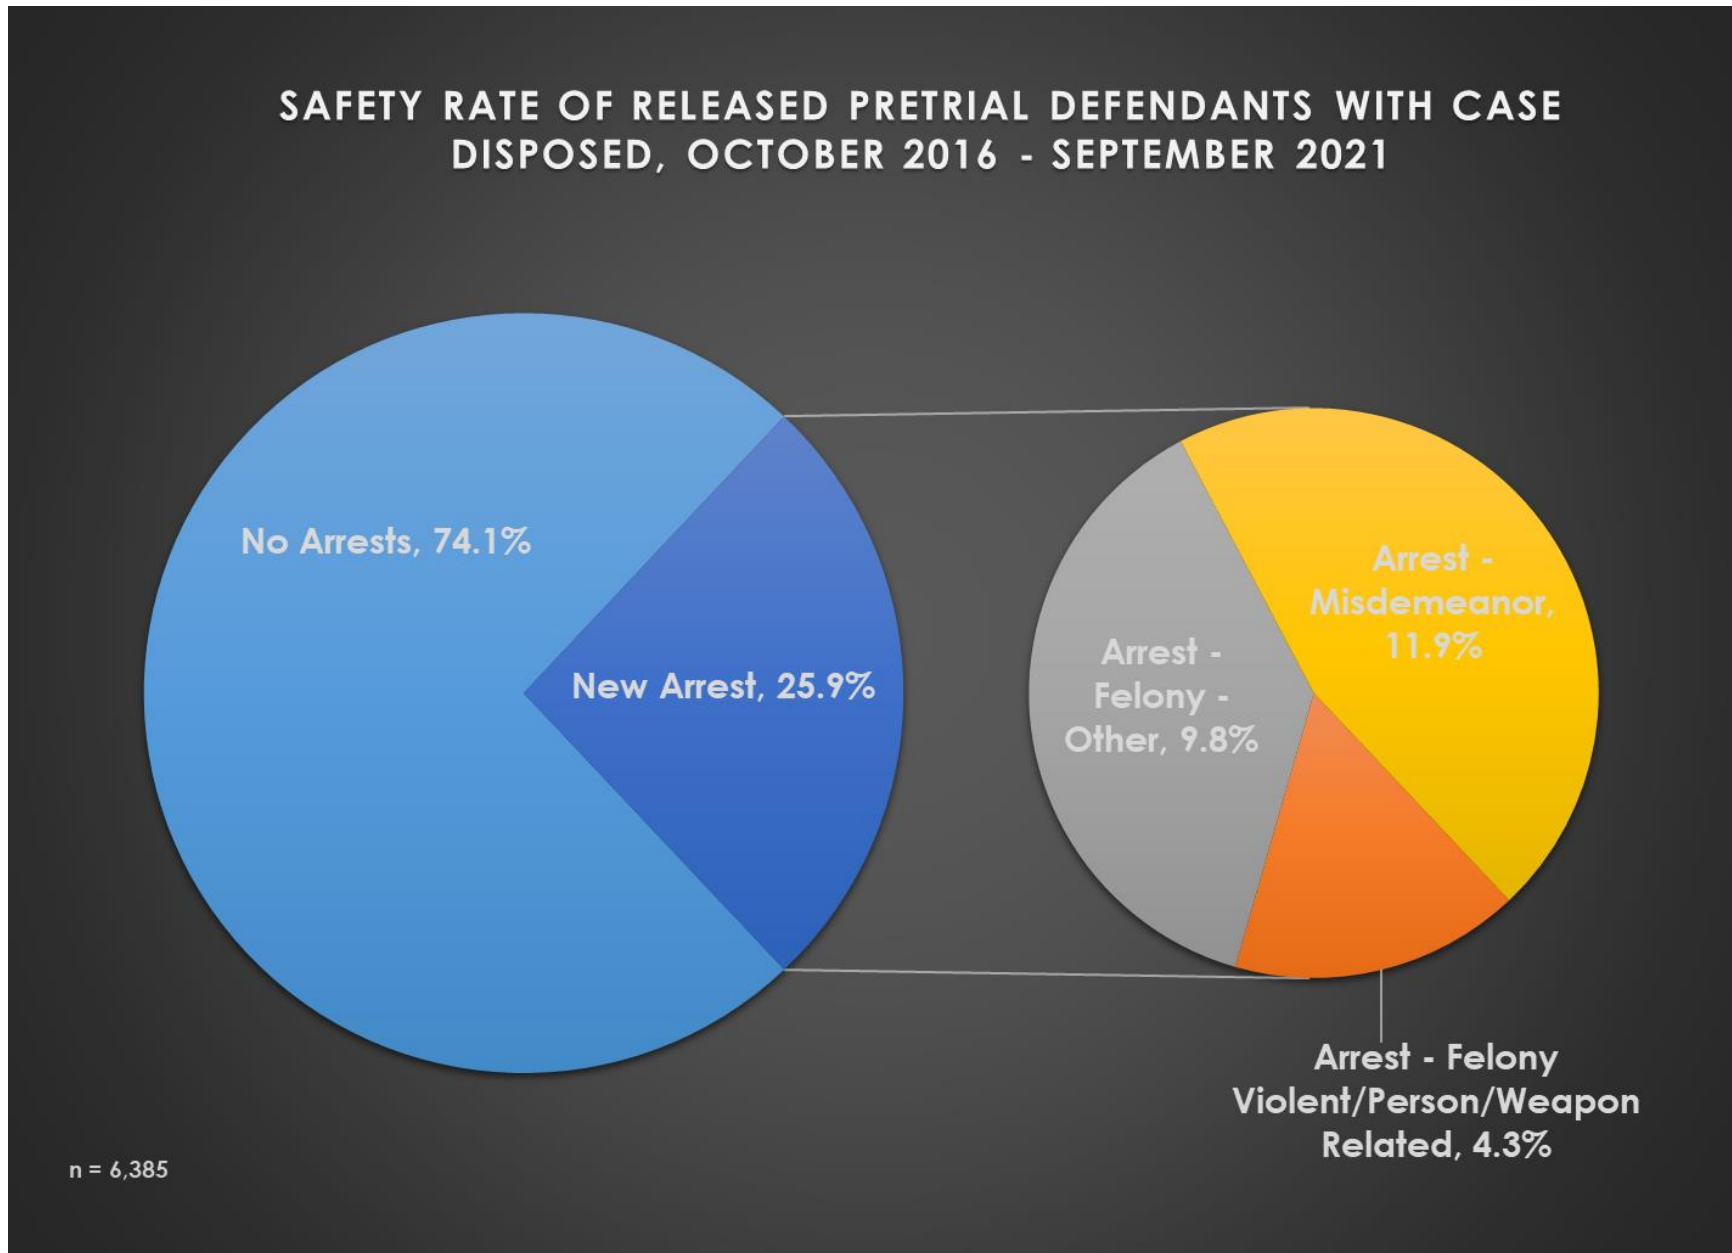

Safety Rate – The percentage of defendants in the target population whose case is disposed in the indicated quarter and who was not arrested for a new offense while their case was pending.

The following chart indicates the type of new offense arrest. If a defendant had more than one new offense arrest, only the first new offense arrest is indicated.

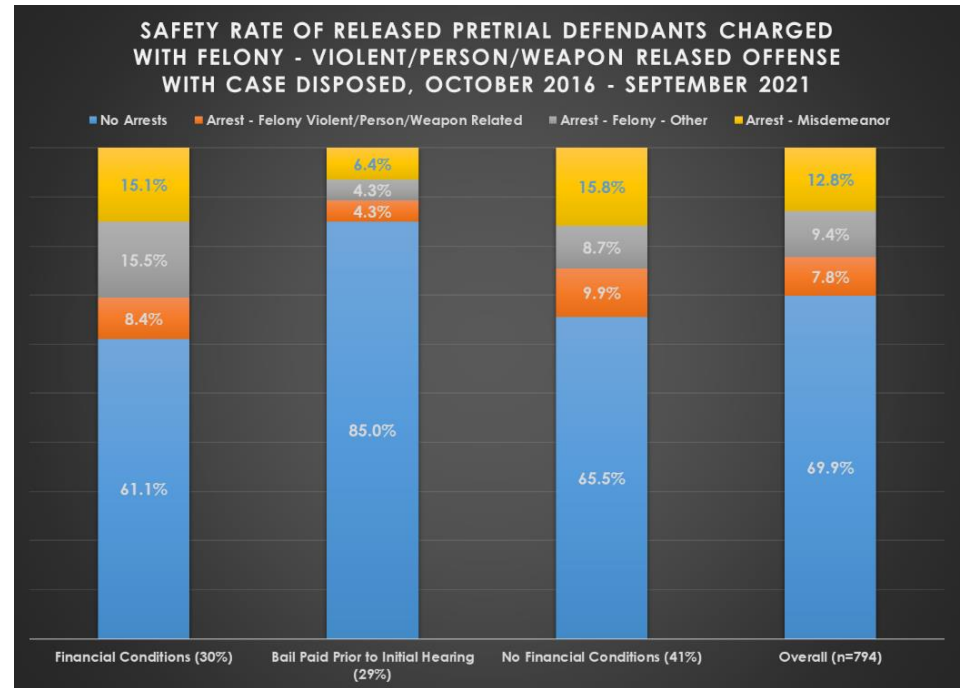

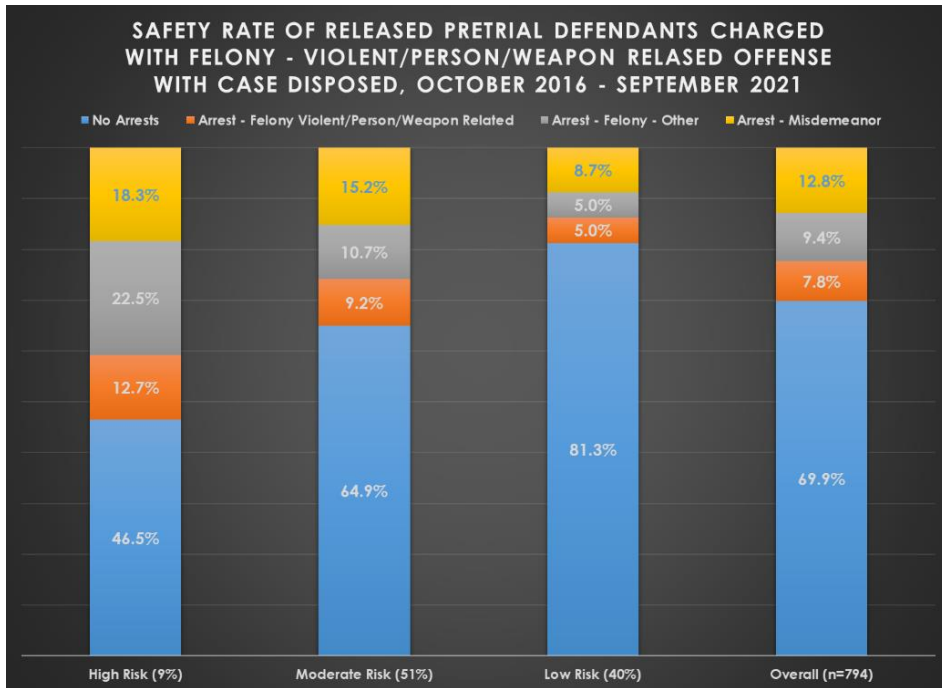

The next chart shows the safety rate by case type. The percentage listed in each column indicates the percentage of the overall number of defendants categorized in the column.

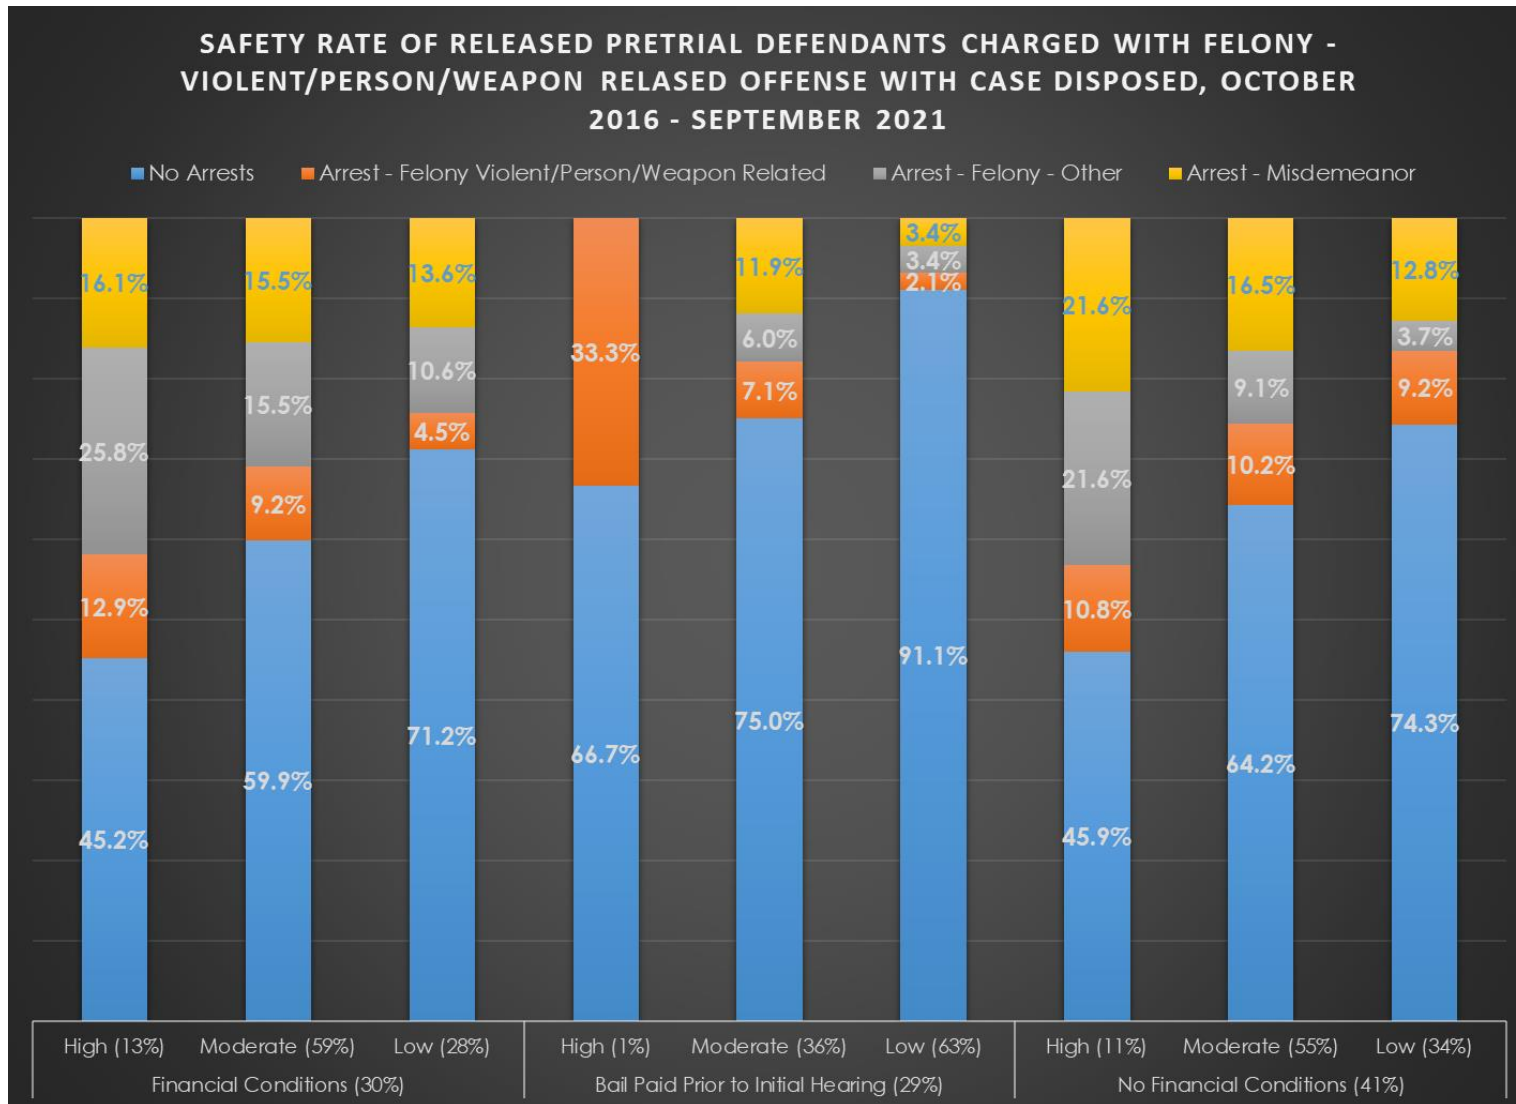

The next two charts show the safety rate by risk level and financial bail requirements. The percentage listed in each column indicates the percentage of the overall number of defendants categorized in the column.

These two charts in this section indicate the safety rate for the felony – violent/person/weapon offense type (original case that resulted in pretrial release) by risk level and financial bail requirements. The percentage listed in each column indicates the percentage of the overall number of defendants categorized in the column.

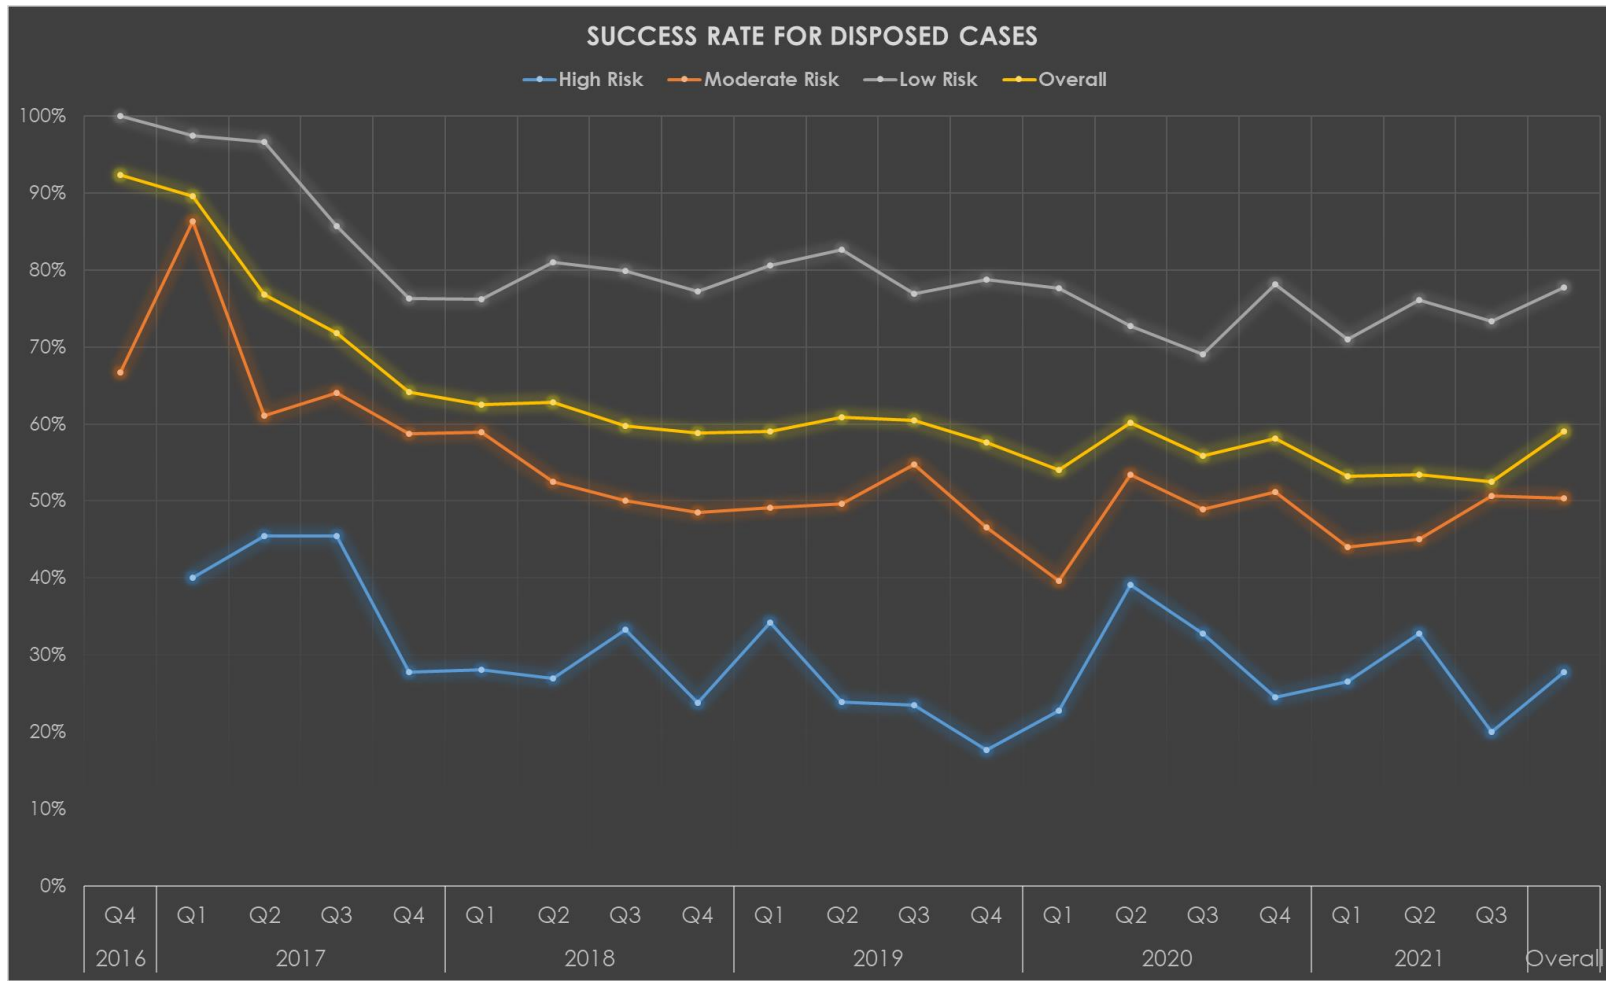

The final chart indicates the safety rate for the felony – violent/person/weapon offense type by risk level and financial bail requirements combined. The percentage listed in each column indicates the percentage of the overall number of defendants categorized in the column and by risk level within each financial bail requirement category.

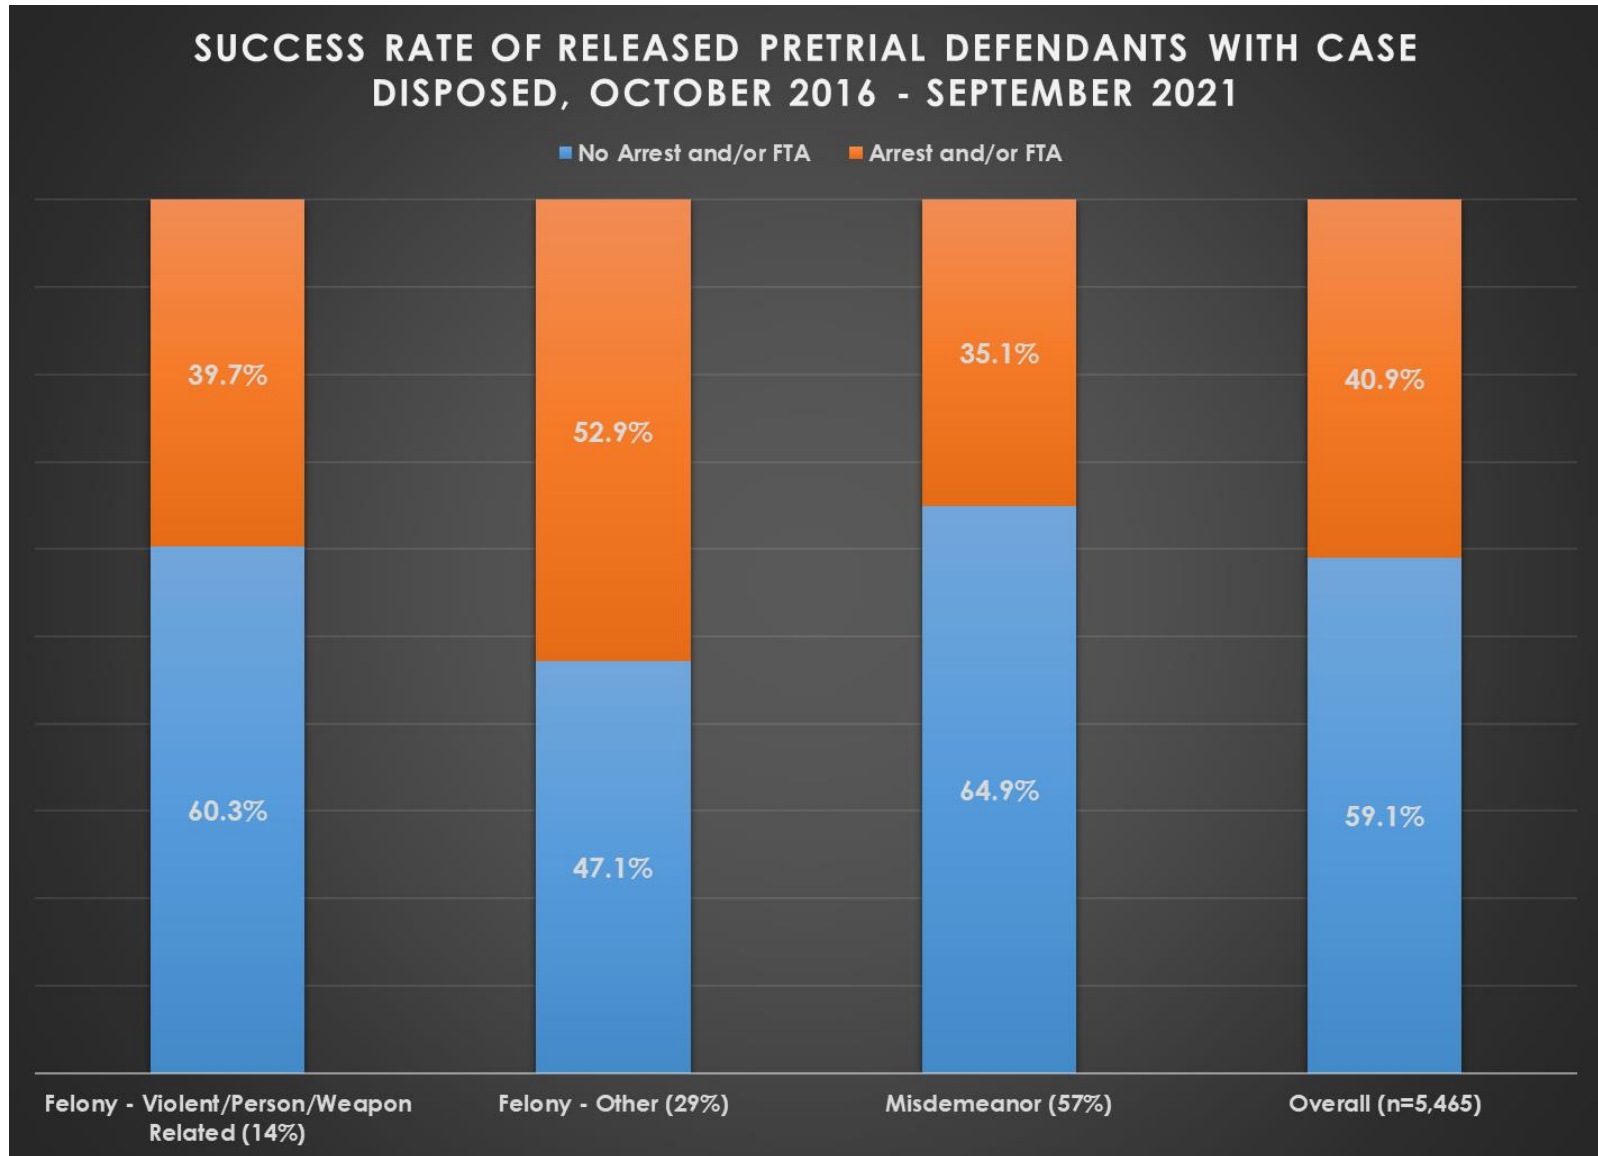

Success Rate – The percentage of defendants in the target population whose case is disposed in the indicated quarter and who was not arrested for a new offense and appeared for all scheduled court hearings.
