Questions relating to standards are in bolded blue font

Grayed boxes are either prefilled (and sometimes locked) or are automatic calculations.

09-001 Circulation of physical items - The total annual circulation of all physical library materials of all types, including renewals.

Note: Count all physical materials in all formats that are charged out for use outside the library. Only include interlibrary loan transactions in which items are borrowed for users; do not include items checked out to another library.

09-002 Use of electronic materials (e.g. E-books circulated or electronic materials downloaded annually) - Electronic materials are distributed digitally online and can be accessed via a computer, the Internet, or a portable device such as an e-book reader. Types of electronic materials include e-books and downloadable electronic video and audio files. Electronic materials packaged together as a unit and checked out as a unit are counted as one use. Include circulation only for items counted under electronic books (E-books), audio-downloadable units and video-downloadable units in the LIBRARY COLLECTION. Do not include items not specified under those definitions.

- Note: Do not include database/electronic collection usage as circulation. Report these uses in 09-003.

09-003 Successful retrieval of electronic information - The number of full-content units or descriptive records examined, downloaded, or otherwise supplied to user, from online library resources that require library user authentication but do not have a circulation period. Examining documents is defined as having the full text of a digital document or electronic resource downloaded or fully displayed. Some electronic services do not require downloading as simply viewing documents is normally sufficient for user needs.

Include use both inside and outside the library. Do not include use of the OPAC or website [based on NISO Standard Z39.7 (2013) #7.7, p. 43].

Rationale: This proposed new element is designed to capture the use of online content provided by libraries, but does not require a traditional circulation. Primarily, this element will capture the use of paid, commercial databases. The definition borrowed heavily from NISO standards.

09-004 Total electronic content use (total of 09-002, 09-003) - This is the automatically calculated total of 09-002 (Use of electronic materials) and 09-003 (Successful retrieval of electronic information)

09-005 Circulation of all children's materials - Enter the circulation for materials cataloged as appropriate for children. Include renewals and interlibrary loans. Include juvenile electronic materials (e-book/eAudio/eVideo) uses if the data is available.

This is a subset of total circulation of all materials listed above. Estimates are acceptable.

- Do NOT include Young Adult materials in this count.
- Do NOT include equipment, computer usage or in-house usage of materials.

09-006 Total circulation of all materials (total of 09-001, 09-002) - This is the automatically calculated total of 09-001 and 09-002. Include all materials (print and non-print) charged out to patrons (or staff) of all ages, either manually or electronically. Estimates are acceptable. This figure includes all renewals and interlibrary loans (i.e. - items borrowed by your library and lent

to your patrons). Interlibrary loans are also reported in 08-001 & 08-002. For electronic circulation, one download equals one circulation, whether it is one book or one song.

- Do NOT include equipment, computer usage or in-house usage of materials.
- In-house usage is reported in 09-008 ONLY.

09-007 Total collection use (total of 09-001, 09-002 & 09-003) - This is the automatically calculated total of 09-001 (Physical Item Circulation), 09-002 (Use of electronic material) and 09-003 (Successful retrieval of electronic information).

09-008 Total in-house usage of materials - Count all materials used in the library but not checked out, including materials not allowed to circulate or be removed from the library. This may include materials used by staff for library purposes (programs, collection development), genealogical or local history materials, reference and circulating materials used by patrons in the library which staff re-shelves. Estimates are acceptable. You can use a typical week count, and then multiply by 52.

- Do NOT add this figure into circulation count.
- Do NOT include equipment or computer usage.

Selected Holdings

The following totals are NOT a count of ALL materials which the library owns. These questions relate to selected holdings only.

Definitions

Physical unit - A physical unit is a book volume, reel, disk, cassette, etc. Items which are packaged together as a unit and are generally checked out as a unit, , e.g. two compact disks, and are generally checked out as a unit, are counted as one physical unit.

Holdings – Materials the library has acquired as part of the collection and catalogued, whether purchased, leased, or donated as gifts.

Microfilm, microfiche, other microforms - Do NOT count any microforms except for current serial subscriptions.

Do NOT count any realia (puzzles, puppets, toys, cake pans, etc.)

BOOKS (PRINT)

09-009 Books (print) - Non-periodical / non-serial printed publications (including music and maps) which are bound in hard or soft covers, or in loose-leaf format. This category includes non-serial government documents.

Report the number of physical units, including duplicates. For smaller libraries, if volume data are not available, count the number of titles. Books packaged together as a unit (e.g., a 2-volume set) and checked out as a unit are counted as one physical unit. E-books are counted in 09-008.

E-BOOKS

Libraries with only local e-book holdings (i.e. not part of a consortium) should complete question 09-013 only.

Libraries with both local and consortium e-book holdings should report the number of local holdings under question 09-013 and the number of consortium holdings under question 09-014.

For example, libraries using Overdrive Advantage should report the items for sole use of their patrons under 09-013.

If the library has no local holdings outside of the consortium, enter "0" in question 09-013 and report all holdings under 09-014.

All consortium member libraries should record the total number of consortium titles available to their patrons (as of 12/31/2017) under question 09-014. If you are unsure of how many titles are available within your consortium, please contact your consortium administrator.

09-010 Does the library belong to an e-book consortium? - An e-book consortium is a group of libraries with a shared licensing agreement that provides them with cost savings and/or increased quantities of titles.

09-011 If yes, provide the name of the e-book Consortium - List the name of the e-book consortium here (e.g. eIndiana Digital Consortium).

09-012 Electronic books (e-books) (LOCAL HOLDINGS) - E-books are digital documents (including those digitized by the library), licensed or not, where searchable text is prevalent, and which can be seen in analogy to a printed book (monograph). Include non-serial government documents. E-books are loaned to users on portable devices (e-book readers) or by transmitting the contents to the user's personal computer for a limited time. Include e-books held locally and remote e-books for which permanent or temporary access rights have been acquired.

Report the number of electronic units, including duplicates, for all outlets at the administrative entity level; do not duplicate unit count for each branch. For smaller libraries, if volume data are not available, the number of titles may be counted. E-books packaged together as a unit (e.g., multiple titles on a single e-book reader) and checked out as a unit are counted as one unit.

Report the number of units. Report only items that have been purchased, leased or licensed by the library, a consortium, the state library, a donor or other person or entity. Included items must only be accessible with a valid library card or at a physical library location; inclusion in the catalog is not required. Do not include items freely available without monetary exchange. Do not include items that are permanently retained by the patron; count only items that have a set circulation period where it is available for their use. Count electronic materials at the administrative entity level; do not duplicate numbers at each branch.

NOTE: For purposes of this survey, units are defined as "units of acquisition or purchase". The "unit" is determined by considering whether the item is restricted to a finite number of simultaneous users or an unlimited number of simultaneous users.

Finite simultaneous use: units of acquisition or purchase is based on the number of simultaneous usages acquired (equivalent to purchasing multiple copies of a single title). For example, if a library acquires a title with rights to a single user at a time, then that item is counted as 1 "unit"; if the library acquires rights to a single title for 10 simultaneous users, then that item is counted as 10 "units". For smaller libraries, if volume data are not available, the number of titles may be counted.

Unlimited simultaneous use: units of acquisition or purchase is based on the number of titles acquired. For example, if a library acquires a collection of 100 books with unlimited simultaneous users, then that collection would be counted as 100 "units".

09-013 Electronic books (E-books) (CONSORTIUM HOLDINGS)- E-books are digital documents (including those digitized by the library), licensed or not, where searchable text is prevalent, and which can be seen in analogy to a printed book (monograph). Include non-serial government documents. E-books are loaned to users on portable devices (e-book readers) or by transmitting the contents to the user's personal computer for a limited time.

Only include consortium or remote e-books for which permanent or temporary access rights have been acquired. Report the number of physical or electronic units, including duplicates, for all outlets at the administrative entity level; do not duplicate unit count for each branch. For smaller libraries, if volume data are not available, the number of titles may be counted. E-books packaged together as a unit (e.g., multiple titles on a single e-book reader) and checked out as a unit are counted as one unit.
