MISSION STATEMENT

Serving Indiana residents, leading and supporting the library community, preserving Indiana history.

The Indiana State Library is responsible for:

1. Developing and providing library services to state government, its branches, its departments and its officials and employees;
2. Providing for the individual citizens of the state those specialized library services not generally appropriate, economical or available in other libraries of the state;
3. Encouraging and supporting the development of the library profession; and
4. Strengthening services of all types of publicly and privately supported special, school, academic, and public libraries.

The Indiana State Library serves these two primary populations (public users and libraries) through three divisions (Public Services, Statewide Services, and the Indiana Historical Bureau).

NEEDS ASSESSMENT

The Indiana State Library was successful in achieving many of the goals and objectives in the LSTA Five-Year Plan for 2018-2022, but there is always room for improvement for statewide library service to Hoosiers. In 2021, the Indiana State Library commissioned QualityMetrics LLC to evaluate the state's plan. The seven-month evaluation process consisted of focus groups, a comprehensive internet survey of library staff from around the state, and individual interviews with Indiana State Library and statewide library staff. In each method, respondents were asked for feedback on Indiana's LSTA-sponsored services. Usage statistics and feedback regarding existing services were also considered in evaluating a program's continuation.

The results of the evaluation suggest the top challenges facing Indiana libraries continue to be:

1. **Expanded access to information** – Leveraging print and digital library collections, in a variety of formats, to deliver information to library users in the format they prefer.
2. **Improved institutional capacity** – the need to strengthen the library workforce, technological infrastructure, physical buildings and operations.
3. **Enhanced library services** to reach different populations, including lifelong learners, job seekers, entrepreneurs and individuals with print disabilities.

Since 2017, The Indiana State Library has worked with the administration of Indiana's governor, Eric J. Holcomb, in his goals to elevate Indiana to its next level. The goals in [Governor Holcomb's 2022 Next Level agenda](#) include:

1. Economic Development
2. Education, Training, and Workforce Development
3. Health and Wellness Development
4. Community Development
5. Good Government

The support of LSTA funding will allow the State Library to develop programs that help meet the Governor's goals in education (including support for children's reading programs and career training materials) and good government (by leveraging the power of the state library to streamline services and share physical and digital library collections).

GOALS

Following the 2018-2022 Five Year Plan evaluation, it was decided to retain the three goals of the previous plan for the Indiana State Library's 2023-2027 LSTA program. The most impactful, yet basic, component is ISL's role in the facilitation of information to the statewide public. The next most apparent need is the improvement of library services or institutional capacity through staff training and support. Finally, enhancing existing services for lifelong learning, as well as exploring new services and partnerships to benefit library users, was identified as a goal by both our Five Year Plan evaluator and state library administration.

Goal 1: Information Access

The Indiana State Library will provide up-to-date, reliable access to information to meet the needs of all Indiana residents by utilizing effective technology, telecommunications, and resources.

IMLS Intent - Improve User's Ability to Obtain and/or Use Information Resources

Supporting Projects:

1. **Resource Sharing** – The Indiana State Library will continue to support a robust statewide resource sharing system that includes a variety of discovery and interlibrary loan options. Programs include **Evergreen Indiana** (statewide integrated library system), **Statewide Remote Circulation System (SRCS)**, **Indiana Share** (mediated interlibrary loan), and the **INfoExpress** statewide library courier service. Through these services, the Indiana State Library is able to facilitate mediated and unmediated interlibrary loans from the collections of hundreds of libraries statewide at no cost to the borrower. This supports Governor Holcomb's goal to provide great government service at a great value to taxpayers. For each service, LSTA funds will be used to fund the salaries of program coordinators and subsidies for the cost of services and subscriptions. Service usage, including loans requested and parcels shipped, is regularly monitored.

Timeline- October 2023-September 2027:

Project is ongoing. Services and usage will be evaluated bimonthly by ISL's Resource Sharing Committee. Reevaluate vendors for each service as necessitated by the state's Request for Proposal (RFP) process.

2. **Indiana Digital Library (IDL)** – In 2022, the Indiana State Library launched a statewide E-Book consortium hosted by Overdrive. This enabled nearly 200 libraries at the time of its launch to leverage the power of the consortium and shared collection.

LSTA funds will be used to help sustain the collection by paying for the statewide platform fee.

Timeline- October 2023-September 2027:

The Indiana State Library will continue to host the digital library and facilitate collection development and administration, ensuring the patrons of participating libraries have access to the materials they desire.

3. **INSPIRE Databases** –ISL will continue to support access to INSPIRE, the statewide database service. Approaching its 25th year, INSPIRE provides free access to every individual within Indiana via GeoIP authentication or via AccessIndiana, a new single sign-on service supported by the Indiana Office of Technology. INSPIRE includes databases covering news, business, health, government, as well having numerous resources for students from kindergarten to college. With a single subscription providing access to thousands of individuals and libraries, INSPIRE continues to support Governor Holcomb's goal to provide great government service at a great value to taxpayers.

A combination of LSTA funds and dedicated state funds from the Indiana General Assembly, will be used to fund database subscription costs.

Usage is regularly evaluated in the form of sessions, searches, and full text articles retrieved.

Timeline- October 2023-September 2027:

Project is ongoing. Reevaluate vendors for each service as necessitated by state RFP.

The Resource Sharing Committee will meet bimonthly, and RFP advisory committees will meet as needed to evaluate usage and database offerings.

4. **Indiana Memory Digitization** – According to responses to the statewide survey conducted as part of the 2018-2022 Indiana LSTA Five Year Plan

Evaluation, digitization and growing Indiana's digital collection of materials and newspapers is still key. The Indiana State Library's Historical Bureau will continue to expand its statewide digital collection through in-house scanning and sub-grants to partnering institutions, including libraries, universities, and historical organizations. Indiana Memory contains newspapers, photographs, manuscripts and other items reflecting Indiana's unique history. Indiana Memory will continue to expand, with growing focus on audio-visual resources (AV) and unique collections. ISL will work to address gaps in the Hoosier State Chronicles Newspaper collection while taking a deliberate approach to curating and selecting materials. ISL will continue to explore digital storage alternatives due to increasing storage costs.

LSTA funds will be used to provide administrative support for the digital collection, salaries for ISL digitization and metadata staff, scanning supplies and equipment, and sub-grants to libraries statewide. Library staff will track the collection size, usage, and number of contributing institutions.

Timeline- October 2023-September 2027:

This project is ongoing. Sub-grants may be offered annually, typically spanning 10-12 months with required quarterly and final reports. Reevaluate vendors for each service as necessitated by state RFP.

5. **Indiana State Data Center** – Located within the Indiana State Library, the Indiana State Data Center will continue to offer reference assistance and instruction regarding statistics, state and federal information to a variety of audiences. LSTA funds are used to finance the center's staff salaries, programming expenses, and professional development costs. The State Data Center will continue to partner with the state's Management Performance Hub and Indiana Business Research Center to facilitate data evaluation. Specific projects upcoming in 2023-2027 will be providing evaluation and training opportunities for the 2020 United States decennial census data.

Timeline- October 2023-September 2027:

Project is ongoing. Project director will provide annual report on reference services and programs delivered.

IMLS Intent - Improve User's Ability to Discover Information Resources

Supporting Projects:

1. **Indiana Virtual Catalog** – The Indiana State Library will continue to provide statewide access to OCLC's WorldCat, improving user's ability to discover and share information resources. OCLC subscription fees will be paid or partially subsidized with grant funds.

Timeline- October 2023-September 2027:

Project is ongoing. Indiana State Library administration will reevaluate the service, its value, and its usage annually.

2. **Public Awareness** – In order to promote awareness of LSTA-funded services, a small portion of LSTA funding will be dedicated to focused, educational marketing, as laid forth in the Indiana State Library's approved marketing plan. LSTA funds will be used to pay for promotional services and supplies.

Timeline- October 2023-September 2027:

Project is ongoing. The Indiana State Library's communication director will provide regular feedback regarding promotional materials and activities to ISL administration and the LSTA consultant.

Goal 2: Institutional Capacity

The Indiana State Library will improve the capacity of libraries through professional development and leadership training opportunities and grants for technology.

IMLS Intent – Improve the Library Workforce

Supporting Projects:

1. **Professional Development and Leadership Training** – The Indiana State Library's Professional Development Office will continue to offer a robust slate of continuing education opportunities for library staff in a variety of formats and methods. Past trainings have included webinars, staff days, workshops, and national speakers and consultants. In addition to programming costs for ISL-hosted trainings, in 2023-2027 the Professional Development Office will explore offering LSTA funding for scholarships, grants, or tuition reimbursement for continuing education. This is in

alignment with Governor Holcomb's Goal to develop a 21st century skilled and ready workforce.

Timeline- October 2023-September 2027:

Project is ongoing. The Indiana State Library's Professional Development Office director will provide regular feedback regarding trainings and will work closely with the LSTA consultant regarding any funding requested for trainings or education awards.

IMLS Intent – Improve the library's physical and technological infrastructure

Supporting Projects:

2. **Technology Sub-grants** – Recognizing the unique and varied technology needs of libraries (and their users) statewide, the Indiana State Library may continue to award LSTA funds in the form of sub-grants for local, regional, or statewide technology projects as funding allows. These popular grants are typically awarded to about 15 libraries of all types (public, school, academic, and special) annually. Additionally, ISL may facilitate statewide technology projects and purchases.

Timeline- October 2023-September 2027:

Project is ongoing. Sub-grants may be offered annually, typically spanning 10-12 months with required quarterly and final reports. ISL administration will evaluate project guidelines annually. ISL administration will advise grantees on evaluation, including outcomes-based assessment questions and surveys, where required.

3. **Innovative Sub-grants** – Recognizing the need to adapt to everchanging services and technologies, the Indiana State Library may award LSTA funds in the form of sub-grants for local, regional, or statewide innovative projects. These grants may be used to support planning projects, adoption of new services, and more.

Timeline- October 2023-September 2027:

Project is ongoing. Sub-grants may be offered annually, typically spanning 10-12 months with required quarterly and final reports. ISL administration will evaluate project guidelines annually and advise grantees on evaluation, including outcomes-based assessment questions and surveys, where required.

Goal 3: Enhanced Services

The Indiana State Library will aid libraries in improving services to Indiana residents, including services that support lifelong learning and human services.

IMLS Intent – Lifelong Learning - Improve users' general knowledge and skills.

Supporting Projects:

1. **Children's Literacy** - The Indiana State Library will support childhood and young adult literacy initiatives. A youth services consultant will provide training to librarians working with children and teens and administer Collaborative Summer Library Program materials to libraries statewide. The consultant will continue collaborations with the Indiana Library Federation's Association of Indiana School Library Educators (AISLE) and the Indiana Department of Education (IDOE) to better serve public school media specialists and explore cost-saving purchasing options. LSTA funds will be used for the consultant's salary and program materials and supplies. Additionally, LSTA funding will support collection materials, staffing, and programming expenses for ISL's Young Reader's Center, including annual initiatives such as the Firefly Award.

Timeline- October 2023-September 2027:

Project is ongoing. youth services consultant will provide annual report on reference services and programs delivered from the Professional Development Office and Young Reader's Center.

2. **Library Services for the Blind and Physically Handicapped**- The Indiana State Library will continue to serve as a regional library for the Library of Congress' National Library Service for the Blind and Physically Handicapped. The Talking Book and Braille Library (TBBL) provides large print, Braille, audiobooks and readers' advisory services to qualifying Indiana residents. LSTA funds are used for ISL TBBL staff salaries. The state has centralized operations in distributing materials to public libraries and directly to patrons' homes, and has been promoting adoption of digital resources for users including Duplication On Demand, a service that enables patrons to borrow more materials with less staff intervention.

Grants may also be awarded for libraries to provide accessibility equipment.

Timeline- October 2023-September 2027:

Project is ongoing. Talking Book and Braille Library director will provide annual report on reference services and programs delivered by the program.

IMLS Intent – Civic Engagement - Improve Users’ Ability to Participate in their Community

Supporting Projects:

1. **State Agency Partnerships** – As mandated by our mission, the Indiana State Library partners with various other state agencies to deliver services and information to the statewide public via the state's public libraries, academic libraries, special libraries, institutional libraries, and school media centers.

In 2023-2027, ISL will continue to expand this extension of services to reach Hoosiers through various projects that will meet intents under the headings of Economic & Employment Development, Human Services, and Civic Engagement. Indiana State Library staff and administration will continue to network with various Indiana State agencies, including the Department of Education, Department of Workforce Development, Department of Correction, Department of Health, and others to identify opportunities to promote programs which increase and improve upon the library's role in the users' lives. Additionally, partnering with other agencies will enable us to help meet Governor Holcomb's goal of cultivating a strong and diverse economy to ensure that Indiana remains a magnet for jobs.

Timeline- October 2023-September 2027:

Project is ongoing. State Library staff are actively involved in external and internal committees that include various other state agency and non-profit organization representatives.

3. Enhanced Services	Lifelong Learning	Children's Literacy	Improve users' general knowledge and skills.
		Talking Books	
	Civic Engagement	State Agency Partnerships	Improve users' ability to participate in their community

Coordination With Other State Agencies

In an effort to leverage Federal and State investment in resources, programs, and activities, the Indiana State Library has collaborated with several other state agencies over the years, including, but not limited to, the Governor's Office, the Indiana School for the Blind and Visually Impaired, the Indiana Department of Workforce Development, Indiana's Management Performance Hub, the Indiana Department of Education, the Indiana Department of Correction, and the Indiana Department of Health. Indiana's libraries are a key component in the state's efforts to elevate Indiana to its next level by aligning goals and projects with LSTA priorities. As this new plan and related projects unfold, the Indiana State Library expects to continue to work with these agencies, as well as foster other formal or informal partnerships with state agencies that may develop in an effort to more effectively achieve goals.

EVALUATION PLAN

The Indiana State Library is committed to evaluating the impact of the LSTA program, including both statewide and local activities and outcomes. Appropriate methodologies will be identified and implemented to measure the targeted outputs and outcomes identified in the plan and each grant.

Statewide projects - The LSTA consultant will consult with each statewide project director at least annually for feedback about the usage and impact of statewide services. Discussion will include the previous year's project outcomes, upcoming budgetary needs, and future programming plans. Results of these consultations are reported to Indiana State Library administration and used for budget and program planning.

Sub-grant projects - Outcome-based evaluations are integrated into all sub-grants awarded by the Indiana State Library. Sub-grantees will provide a series of quarterly and final reports that include information on how project objectives were met. Sub-grants collecting outcomes-based assessments will relay this information to ISL. This information will be conveyed to IMLS via annual State Program Reports.

Project monitoring – In addition to consultations and reports, Indiana State Library staff will conduct site visits to recipient libraries when appropriate. Both exemplary projects and those requiring assistance will be visited. A status report of the projects will be discussed during the visit and corrective measures will be taken by the sub-grantees if needed.

Five Year Plan Evaluation - Finally, as required by legislation, an independent consultant will be retained through a competitive Request for Proposal (RFP) process to prepare a comprehensive evaluation of the implementation of this plan and LSTA expenditures by the Indiana State Library. The evaluation process will ensure that a broadly representative sample of the Indiana library community will have an opportunity to participate.

STAKEHOLDER INVOLVEMENT

The Indiana Library and Historical Board is appointed by the Governor with input from key stakeholder groups around the state to oversee the activities and initiatives of the Indiana State Library. Additionally, the Indiana State Library and Historical Bureau will continue to work closely with publicly and privately supported special, school, academic, and public libraries and the following agencies to leverage funding and programs that maximize service to Hoosier libraries and their users:

- Indiana Library Federation (ILF)
- Midwest Collaborative for Library Services (MCLS)
- Academic Libraries of Indiana (ALI)
- Private Academic Library Network of Indiana (PALNI)
- Various state agencies, including the Indiana Department of Education (DOE) and Indiana Archives and Records Administration (IARA)
- Indiana State Library Foundation

COMMUNICATION & PUBLIC AVAILABILITY

Once approved by IMLS, the Plan will be uploaded to the Indiana State Library's LSTA website for public viewing. The Plan will also be shared via the Indiana State Library's regular communication channels, including the Wednesday Word weekly e-newsletter and quarterly director updates. Finally, a copy of the plan will be shared with the governor's office.

Any substantive revisions to the Plan, especially to the needs and goals, will be submitted to IMLS according to the provisions of the LSTA, and to appropriate stakeholders. An email will be sent, followed up with hard copy.

The Indiana State Library will publicize achievements of important milestones and results of the Five-Year Plan as required for reporting purposes, as well as to meet stakeholder needs. The channel for communicating these achievements will depend largely on a particular stakeholder group's needs and will include an

appropriate combination of presentations and meetings, print and electronic media and required reports, e.g. the Annual Report.

MONITORING

As described in each project, the Indiana State Library will assign appropriate staff to continuously track implementation of the Five-Year Plan and prepare appropriate narrative and financial reports as required. An important component of this tracking process will be monitoring of external sub-grantee projects. In addition to providing quarterly status reports and final reports on the progress of each project in relation to the Plan, the ISL staff will conduct on-site monitoring visits for many of the sub-grants. Any necessary corrective action will be decided on in collaboration with the sub-grantees.
