Tattoo artists or body piercers who are experiencing symptoms of acute disease that include, but are not limited to: (1) diarrhea; (2) vomiting; (3) fever; (4) rash; (5) productive cough; (6) jaundice; or (7) draining (or open) skin infections, boils, impetigo, or scabies; shall refrain from providing tattoos or body piercing. 	✓		
<p>410 IAC 1-5-30 Hand washing</p> <ol style="list-style-type: none"> a. Hand washing facilities shall be readily accessible where tattooing or body piercing, or both, is provided. b. Hands shall be washed with soap and running water immediately before putting on gloves and after removal of gloves or other personal protective equipment. c. Only single-use towels shall be used. 	✓		
<p>410 IAC 1-5-31 Personal protective equipment</p> <p>Appropriate personal protective equipment shall be worn as follows:</p> <ol style="list-style-type: none"> 1. Disposable gloves, such as surgical or examination type, shall be worn during the tattooing or body piercing process. Gloves shall be changed and properly disposed of each time there is an interruption in the application of 	✓		

<p>the tattoo or body piercing, when the gloves become torn or punctured, or whenever the ability to function as a barrier is compromised. Disposable gloves shall not be reused.</p> <p>2. Gloves shall be worn when decontaminating environmental surfaces and equipment.</p>			
<p>410 IAC 1-5-32 Tattooing equipment</p> <p>a. Only single-use razors shall be used to shave the area to be tattooed.</p> <p>b. All stencils shall be properly disposed of after a single use.</p> <p>c. If the design is drawn directly onto the skin, it shall be applied with a single-use article only.</p>	J		
<p>410 IAC 1-5-33 Needles</p> <p>a. Needles shall be individually packaged and sterilized prior to use.</p> <p>b. Needles shall be single-use only.</p> <p>c. Needles shall be discarded in sharps containers immediately after use.</p>	J		
<p>410 IAC 1-5-34 Reusable equipment</p> <p>Heating procedures capable of sterilization must be used when heat stable, non-disposable equipment is sterilized.</p>	✓		
<p>Reusable contaminated equipment shall be:</p> <ol style="list-style-type: none"> 1. placed in puncture-resistant containers; 2. labeled with the biohazard symbol; 3. leak proof on both sides and bottom; and 4. stored in a manner that does not require reaching by hand into the container where the equipment is stored until cleaning prior to sterilization. 	J		
<ol style="list-style-type: none"> a. Reusable contaminated equipment shall be effectively cleaned prior to sterilization or disinfections. b. Piercing guns shall be cleaned and undergo, at a minimum, high level disinfections after each use and whenever visibly contaminated. c. All other equipment used during the tattooing or body piercing procedure shall be single use, including corks. 	J		
<p>410 IAC 1-5-35 Dyes or pigments or other objects placed under the skin</p> <p>a. All dyes or pigments used in tattooing shall be from professional suppliers specifically providing dyes or pigments for the tattooing of human skin. In preparing dyes or pigments to be used by tattoo artists, only nontoxic, sterile materials shall be</p>	J		

used. b. Single-use or individual portions of dyes or pigments in clean, single-use containers shall be used for each patron. c. Any object placed under the skin shall be sterile.	✓		
410 IAC 1-5-36 Work environment			
a. No tattooing or body piercing shall be conducted in any room used as living quarters or in any room that opens directly into living or sleeping quarters.	✓		
b. Live animals shall be excluded from areas where tattooing or body piercing is being conducted. Except: (1) Patrol dogs accompanying security or police officers. (2) Guide dogs for: (A) Blind persons. (B) Partially blind persons. (C) Physically disabled persons. (D) Guide dog trainers. (E) Persons with impaired hearing.	J		
c. Eating, drinking, smoking, applying cosmetics, or handling contact lenses shall not be allowed in work areas where there is a likelihood of exposure to blood or OPIM.	J		
d. All work surfaces shall be: (1) nonabsorbent; (2) easily cleanable; (3) smooth; and (4) free of: (A) breaks; (B) open seams; (C) cracks; (D) chips; (E) pits; and (F) similar imperfections	J		
e. All equipment and environmental surfaces shall be cleaned and disinfected after contact with blood or OPIM Disinfectant solutions shall be: (1) a hospital grade, tuberculocidal Environmental Protection Agency (EPA) registered disinfectant; or (2) sodium hypochlorite, five-tenths percent (0.5%) concentration, by volume (common household bleach in ten percent (10%) concentration in water); the solution shall be dated and shall not be used if it is more than twenty-four (24) hours old.	✓		
410 IAC 1-5-37 Infectious waste containment			
If infectious waste is stored prior to final disposal: store infectious waste in a secure area that: (1) is locked or otherwise secured to eliminate access by or exposure to the general public; (2) affords protection from adverse environmental conditions and vermin; and (3) has a prominently displayed biohazard symbol.	J		
410 IAC 1-5-38 Treatment and transport of infectious waste			
All operators shall ensure that infectious waste is either treated on-site in accordance with this rule or transported off-site for treatment in accordance with this rule.	J		
ADDITIONAL COMMENTS	VERY CLEAN - PROFESSIONAL
