

Mobile lung screening is now available in your community

If you currently smoke or have quit in the last 15 years you may qualify

Lung cancer doesn't wait. Why should you?

Lung cancer is the leading cause of cancer-related deaths in Indiana- but it doesn't have to be. Most people do not experience symptoms until the disease is advanced, when treatment options are limited. That is why early detection through low-dose CT screening is critical, it can find lung cancer when it is most treatable.

Lung screening is:

- Fast - Takes less than 10 minutes
- Simple- No needles, no prep, no change of clothes
- Effective- Detects cancer early when it is most treatable
- Covered by most insurance including Medicare and Medicaid

Lung screening eligibility requirements (must meet both)

- History of smoking 20 years
- Between the ages of 50 - 77

Register now for the next lung screening day

Wednesday February 11th 9am - 4pm

Clinton County Department of Health

1234 Rossville Ave Frankfort IN 46041

Appointment recommended
