

IDOH Residential OSS Regional Training

The Indiana Department of Health is offering 5 regional workshops with a focus on Rule 410 IAC 6-8.3 and a Comparison of Sand Lined Technologies. The workshop is open to all **local health department staff, designers, installers, soil scientists and anyone who wants to learn about residential on-site sewage systems**. All workshops are open to all areas of the state and are free of charge. Four IOWPA CEUs will be offered for each workshop (CEUs can only be given for attendance at one training event).

Please email alquinn@health.in.gov with questions.

Topics to Be Presented

Overview of Rule 410 IAC 6-8.3 with emphasis on:

- Definitions
- Administrative Authority
- Plan submission
- Surface and subsurface drainage and dispersal area
- Gravity and Flood dosed subsurface systems
- A comparison of sand lined systems and how they vary from conventional systems
