ICE USAGE

FOR CONSUMPTION

Ice which is to be consumed must come from an approved source.

 Ice must be kept in closed/covered containers and must be dispensed with an approved utensil that is properly stored and used.

Ice for consumption may not be used for storage of food or beverage products or other

foreign articles.

FOR USE AS A REFRIGERANT

Storage of open food products in contact with ice is prohibited.

 Packaged foods that are subject to the entry of water because of the nature of packaging, wrapping, or container, cannot be stored in contact with water or undrained ice.

If ice is the principle means of refrigeration, it must be done in such a way so that the ice

is constantly draining (into a proper area; not onto the ground).

• Commercial-type freeze packs or dry ice may also be used to maintain temperature if mechanical refrigeration cannot be provided or there is a loss of power.

HAIR RESTRAINTS

Proper and effective hair restraints must be provided and worn by all persons handling exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Acceptable hair restraints include hairnets, visors (if they adequately restrain the hair), hats, scarves, etc. Beards should also be restrained with a beard snood or other means.

HYGIENIC PRACTICES

No smoking, eating or drinking is permitted in any food preparation or service areas.
(Covered employees beverage containers are allowed is they are stored and used properly.)

Clothing must be kept clean and not used to wipe hands.

GENERAL PROTECTION

FOOD HANDLING:

If open food is to be handled, proper utensils (such as tongs, spoons, single-use gloves, deli tissue) must be provided and used. Bare hand contact with ready-to-eat open foods is prohibited. ("Ready-to-eat" means no further washing, cooking or additional preparation steps will take place before it is consumed.)

PROTECTION FROM CONTAMINATION:

 Food products must be kept shielded and protected from contamination by consumers at all times during storage, preparation, and service.

 Overhead protection must be provided over ALL food and beverage service, preparation, storage, warewashing and handwashing areas to guard against environmental and consumer contamination.

INSECT CONTROL:

 Air curtains, screening, or fans must be provided and used for insect control when applicable.

 Doors to food preparation and storage areas must be solid or screened and shall be selfclosing (and kept closed as much as possible).
