New Construction Permitting Procedure
March 27, 2024

410IAC 6-8.3-70 (c)

1. The home and absorption field can not be in the 100-year floodplain (floodway). The field can not be located in areas subject to ponding and areas where surface run-off (drainage) cannot be diverted around the field. Floodway information can be obtained at Planning and Zoning 25 W Polk St, Room 201.

410IAC 6-8.3-56

2. The characteristics of the proposed absorption field soil will be analyzed and described by an ARCPACS certified soil science consultant. The possible locations of the house and septic field must be known so that the soil in the area of the septic field can be tested. It is recommended that you contact your septic installer or the Shelby County Health Department prior to contacting the soil scientist. A current listing of the soil scientist can be obtained at health department.

3. A Soil Evaluation Sheet will be issued by the Shelby County Health Department for the tested areas based upon the soil characteristics and the number of bedroom and bedroom equivalents of the proposed residence.

Shelby County Ordinance No. 1994-14

4. Six (6) **certified engineer/surveyor site plans** must be submitted to Planning and Zoning (25 W. Polk St., Room 201) for review and approval. An onsite meeting with the owner, builder, septic installer and a representative of Shelby County **may** be required prior to issuance of any permits.

5. Upon issuance of the septic permit, **the signer of the septic permit is responsible for protecting the planned septic absorption field site from compaction, scraping and filling.** A barrier must enclose the absorption field to insure that the location is protected from heavy construction equipment. The barrier can be yellow caution tape or fencing.

6. No homes shall be occupied **before** the absorption field has been installed and approved by the Shelby County Health Department.

Revised 5-21-01			Site Plan Requirements-Class 2, 3, & 4 Developments
Development Classification			
2	3	4	
X	X	X	1. The Site Plan shall contain the landowner or developer's name and address and the date of the plan's latest revision.
X	X		2. The Site Plan must be drawn and certified by a Registered Engineer or Land Surveyor licensed by the Indiana Professional Licensing Agency and shall be drawn to a scale not the exceed 1 inch = 100 feet.
X	X	X	3. The Site Plan shall include a North arrow.
X	X		4. The Site Plan shall be submitted on 18" x 24" plan sheets.
X	X	X	5. The Site Plan shall contain an area map showing the location of the proposed site and the county roads and streets in the vicinity of the site.
X			6. The watershed area affecting the site shall be shown on the Site Plan.
X	X		7. The Site Plan shall contain a legal description of the land involved.
X	X		8. All elevations used in the Site Plan shall be referenced to USGS datum with a temporary bench mark set on or near the point of construction and expressed in feet above Mean Sea Level (M.S.L.). The proposed and existing topography shall be shown with contour lines at no greater than one-foot intervals. Contour lines should be shown within 100 feet of all areas of disturbed earth.
X			9. The Flood Zone in which the development is located, per the FEMA Flood Insurance Rate Maps, shall be stated on the site plan. All Federal Flood Hazard Areas shall be delineated on the Site Plan with the 100-year flood event elevation line shown on the plan and expressed in feet above Mean Sea Level (M.S.L.).
X		X	10. The Site Plan shall show the location of any proposed individual septic systems and an adequate repair area. It should also include septic tank size; length and cross section of absorption trenches with bottom of trench elevation shown, subsurface drain size and location, and location of dosing chamber if an elevated or pressure system is required.
X	X		11. Location, type, and size of any surface and subsurface drainage outlet for the subject property. An animal guard shall be noted where required.
X	X		12. The finished floor elevations of the basement or crawl space, first floor, and garage of the proposed building(s) shall be shown on the Site Plan.
X	X		13. The Site Plan shall show the locations of existing and proposed driveways, parking and loading areas, right-of-way, set back lines, etc. to be placed on the site.
X	X		14. The Site Plan shall show the location of all existing and proposed easements on the site and on adjoining properties.
X	X		15. The Site Plan shall include the locations of existing and proposed wells.
X			16. The Site Plan shall include the flow line elevation of open ditches and invert elevations of all drainage tiles, sanitary lines, manholes, storm sewer pipes and culverts located on the site or within 300 feet of the subject property.
X	X	X	17. The Site Plan shall include a statement on the plans that all existing subsurface drain tiles that are disturbed during construction will be repaired and rerouted to maintain their existing flow.
X			18. The Site Plan shall show the location of the soil test borings.
X	X		19. The Site Plan shall show the elevations of the proposed finished yard grades at the corners of proposed buildings showing a minimum positive slope away from the building of six (6) inches in the first ten (10) feet.
X			20. The Site Plan shall show trees located within the septic field that are 4 inches or larger in diameter; fences; lakes; ponds; surface swales; wetlands; springs; etc.
X	X	X	21. The Site Plan shall show the dimensions of the parcel in feet and the orientation and outside dimensions of the proposed buildings on the site.
X	X		22. All utilities located on the site or in adjacent right-of-way or easement must be shown on the Site Plan, including but not limited to power, telephone, and cable television.
X			23. Drainage calculations for and design drawings of retention/detention basins, lakes, ponds, inflow pipes; outflow structure; etc. showing inflow and outfall pipe invert elevations; acre feet of storage below proposed outfall elevation; normal pool elevation of retention basin, etc. shall be shown on the Site Plan.
X	X		24. The Site Plan shall contain a statement that the plan complies with all State and County regulations and that any changes that may be made to the plan must first be approved by the appropriate agency.
X			25. The Site Plan shall contain a note stating that the contractor shall provide erosion control measures as required in Article 10 of the Shelby County Storm Drainage, Erosion and Sediment Control Ordinances.
<p>Classification Definitions: Class 2- residential, commercial, and industrial developments and any other non-agricultural land disturbing activity that is not defined as a Class 1, 3, or 4. Class 3- residential development in a platted subdivision approved under this ordinance and not served by a septic system. Class 4- residential additions or accessory buildings.</p>

REQUEST FOR FLOODPLAIN ANALYSIS AND REGULATORY ASSESSMENT
 State Form 50356 (R2 / 4-12)

NOTE: This is Not an Application for a Permit.

A Floodplain Analysis and Regulatory Assessment (FARA) provides floodplain information and the regulatory flood elevation (RFE) for a tract of land that is often needed for flood insurance purposes or for proposed construction projects. This form should be used for requests such as:

- > Flood insurance determinations that are required by a mortgage lender.
- > Supporting documentation for elevation certificates or Letter of Map Change requests.
- > State permitting requirements for construction in a floodway (construction examples: building, fill, development, land re-grading, excavation, pond, fences, channel work, bank protection, dam, levee, stream crossing, bridge, culvert, etc).
- > Elevation and permitting requirements for the construction or reconstruction of a house or placement of a manufactured home in a floodplain.

If you prefer to file your request electronically, you can submit the request through the e-FARA Wizard using the Indiana Floodplain Portal (INFIP) at INFIP.dnr.in.gov

Step 1: Briefly explain the reason you are requesting floodplain or regulatory information

Step 2: Requestor Information *(Required Information. enter your information as the FARA requestor)*

Name _____ Name of Company _____

Mailing Address (number and street): _____

City _____ State _____ ZIP code _____

E-mail address _____ Daytime Telephone number _____

Step 3: Property Owner Information *(Required Information. if different from the Requestor Information)*

Name _____ Name of Company _____

Mailing Address (number and street) _____

City _____ State _____ ZIP code _____

E-mail address _____ Daytime Telephone number _____

Step 4: Property Location and Description *(Required Information)*

Physical Site Address _____

Nearest City/Town _____ County _____ Nearest Waterbody _____

Additional information about the property (for example: Lot or parcel #, parcel dimensions, tract location to street intersections)

Step 5: Provide site location *(Required Information)*

An accurate site location must be submitted. Clearly mark the site or tract of land on a reference map. Examples of maps are: web maps, a USGS topographic map, a subdivision plat map, a property survey or legal description from mortgage survey.

Send completed form and supporting information to:

Department of Natural Resources, Division of Water
