COVID-19 Cases Update

St. Joseph County- As of today, the county's total number of confirmed cases is at 1,430.

Elkhart County saw a 350% increase in cases during the month of May whereas St. Joseph County saw a 100% increase in cases during the same time period. The Public Health Order that went into effect in May only in St. Joseph County is likely contributing to decreased transmission of COVID 19 in St. Joseph County compared to similar counties that have not adopted the order.

For all COVID-19 testing sites in St. Joseph County, you can view an interactive map at <https://www.coronavirus.in.gov/2524.htm>. Please be aware each site may have different criteria for testing.

The St. Joseph County Department of Health urges the continuation of the following actions:

- **Practice extreme physical distancing.**
 - Maintain at least 6ft between individuals.
 - Wearing a mask does NOT eliminate the need for physical distancing.
- **Practice frequent and proper hand hygiene & cough etiquette.**
 - Wash hands often, for at least 20 seconds, with soap & water; coughing and sneezing into your sleeve.
- **Stay home if ill.**
- **Abide by the current Public Health Order, requiring face coverings when going into an enclosed public space or business and when 6 feet of physical distance cannot be maintained within the enclosed public space or business.**

For more information on COVID-19, visit the Indiana State Department of Health at www.in.gov/isdh and the Centers for Disease Control and Prevention at www.cdc.gov. For general questions as it relates to COVID-19 infection, please call 2-1-1.
