REPAIR PERMIT ISSUANCE

- 1.) The Homeowner or agent must fill out an application for a Septic System Repair Permit with the Washington County Health Department. There is no charge for this.
- 2.) The Homeowner, Washington County Environmental Specialist, and the Septic Installer must agree on what repairs are to be performed on the system to correct the septic failure. (Installer list attached).
- 3.) If the absorption area must be extensively repaired or replaced, a Soil Report from a registered Indiana Soil Scientist must be obtained. (List attached).
- 4.) A plan design for a repair of the onsite septic system must be submitted to the Health Department for approval. The plan must meet all provisions of the Indiana Septic Code (410 IAC 6-8.3)
- 5.) A repair permit will be issued after the design plan is approved. The Washington County Environmental Specialist will then give the final project approval when the repair has been successfully completed.
