| 3.0     | Policies and procedures as of July 1, 2018 Published: February 12, 2019 | Scheduled update:  
- Reorganized and edited text as needed for clarity  
- Incorporated information from relevant sections of the Medical Policy Manual and removed references to that document  
- Updated the note box at beginning of module  
- Updated links to the new IHCP website  
- Updated the Introduction section  
- In the Billing for Family Planning Services section:  
  - Specified that medical providers bill on the professional claim  
  - Added reference to the Pharmacy Services module for pharmacy providers  
  - Added reference to the Procedure Codes That Require NDCs table  
- Updated the Contraceptives section and its subsections, including:  
  - Added cervical caps to the list of covered services  
  - Removed the Oral and Injectable Contraceptives subsection  
  - Removed general billing and coding information from all remaining subsections  
- Updated the Sterilization Procedures section and subsections | FSSA and DXC |

Family Planning Services

Note: For updates to coding, coverage, and benefit information, see IHCP Banner Pages and Bulletins at in.gov/medicaid/providers.

The information in this module applies to services provided under the fee-for-service delivery system. Within the managed care delivery system, individual managed care entities (MCEs) establish their own coverage criteria, prior authorization requirements, billing procedures, and reimbursement methodologies. For services covered under the managed care delivery system, providers must contact the Healthy Indiana Plan (HIP), Hoosier Care Connect, or Hoosier Healthwise member’s MCE or refer to the MCE provider manual for specific policies and procedures. MCE contact information is included in the IHCP Quick Reference Guide available at in.gov/medicaid/providers.

Introduction

Family planning services are services provided to individuals of childbearing age to temporarily or permanently prevent or delay pregnancy. Based on Centers for Medicare & Medicaid Services (CMS) policies, the Indiana Health Coverage Programs (IHCP) also considers the following services, provided during a family planning encounter, to be part of family planning services:

- Initial diagnosis and treatment of sexually transmitted diseases (STDs) and sexually transmitted infections (STIs)
- Screening, testing, counseling, and referral of members at risk for human immunodeficiency virus (HIV)

Note: Ongoing follow-up of STDs and STIs and visits for treatment of chronic STDs and STIs are not considered to be a part of family planning services. These services may be covered for members with benefit plans that are not restricted to family planning services only.

Family planning services include the following:

- Annual family planning visits, including health education and counseling necessary to understand and make informed choices about contraceptive methods
- Limited history and physical examination
- Laboratory tests, if medically indicated as part of the decision-making process regarding contraceptive methods
- Cytology (Pap tests) and cervical cancer screening, including high-risk human papillomavirus (HPV) DNA testing, within the parameters described in the Obstetrical and Gynecological Services module
- Follow-up care for complications associated with contraceptive methods issued by the family planning provider
- Food and Drug Administration (FDA)-approved contraceptive drugs, devices, and supplies, including emergency contraceptives
- Initial diagnosis and treatment of STDs and STIs, if medically indicated, including the provision of FDA-approved anti-infective agents
- Screening, testing, counseling, and referral of members at risk for HIV, within the parameters described in the Laboratory Services module
• Tubal ligation
• Hysteroscopic sterilization with an implant device (Essure)
• Vasectomy
• Pregnancy testing and counseling

Note: The IHCP Family Planning Eligibility Program provides coverage to qualifying individuals for family planning services only. Family Planning Eligibility Program coverage is restricted to specific procedure codes and diagnosis codes, as described in the Family Planning Eligibility Program module and listed in Family Planning Eligibility Program Codes, accessible from the Code Sets page at in.gov/medicaid/providers.

Billing for Family Planning Services

Medical providers bill family planning services and supplies on the professional claim (CMS-1500 claim form, IHCP Provider Healthcare Portal [Portal] professional claim, or 837P electronic transaction), using the appropriate Current Procedural Terminology (CPT®) or Healthcare Common Procedure Coding System (HCPCS) codes for the services or supplies rendered and the appropriate International Classification of Diseases (ICD) diagnosis codes for the condition treated. If applicable, the claim must also include the National Drug Code (NDC), name, unit of measure, and number of units of the product administered or dispensed. See Procedure Codes That Require NDCs, accessible from the Code Sets page at in.gov/medicaid/providers.

See the Claim Submission and Processing module for general information about professional claim billing. See the Pharmacy Services module for information about pharmacy claim billing.

Providers must ensure that the member’s chart contains documentation supporting all information on the claim.

Contraceptives

IHCP reimbursement is available for most FDA-approved contraceptive drugs, devices, and supplies. Covered supplies, devices, and drugs are as follows:

• Birth control pills
• Injectable contraceptive drugs
• Emergency contraception
• Male condoms
• Female condoms
• Spermicides
• Contraceptive vaginal rings
• Contraceptive patches
• Diaphragms

1 CPT copyright 2018 American Medical Association. All rights reserved. CPT is a registered trademark of the American Medical Association.
- Cervical caps
- Intrauterine devices (IUDs)
- Contraceptive implants

Members must be given information and education about all methods of contraception available, including reversible methods (for example, oral, emergency, injectable, implant, IUD, diaphragm, cervical cap, contraceptive patch, vaginal ring, spermicide, condom, and rhythm) and irreversible methods (for example, tubal ligation and vasectomy). Education regarding all contraceptive methods must include relative effectiveness, common side effects, risks, appropriate use, and difficulty in usage. Basic information concerning STDs and STIs must also be discussed.

Members must be given information and education about all methods of contraception available, including reversible methods (for example, oral, emergency, injectable, implant, IUD, diaphragm, cervical cap, contraceptive patch, vaginal ring, spermicide, condom, and rhythm) and irreversible methods (for example, tubal ligation and vasectomy). Education regarding all contraceptive methods must include relative effectiveness, common side effects, risks, appropriate use, and difficulty in usage. Basic information concerning STDs and STIs must also be discussed.

Prescriptions for a contraceptive method must reflect the member’s choice, except where such choice is in conflict with sound medical practice. Generic medications must be dispensed when available; however, if generic drugs are not available, brand name drugs may be dispensed. Generic and preferred drugs must be used when available, unless the physician indicates a medical reason for using a different drug. Brand name drugs may be dispensed, even if generic drugs are available, if the IHCP determines that the brand name drugs are less costly to the IHCP.

Contraceptive drugs and supplies may be administered, dispensed, prescribed, or ordered. Prescriptions for family planning drugs and supplies may be refilled as prescribed by the practitioner for up to 1 year. Emergency contraception may be dispensed or prescribed.

Members are encouraged to follow up with their family planning provider when a specific problem related to a contraceptive method occurs, or when additional services and supplies are needed. All members, regardless of the contraceptive method chosen, must be encouraged to return for a physical examination, laboratory services, and health history at least once per year.

**Contraceptive Supplies**

For a pharmacy provider to be reimbursed for over-the-counter external contraceptive supplies, a licensed IHCP-enrolled practitioner with prescriptive authority must prescribe them. The member may receive up to a 3-month supply at one time.

Reimbursement for condoms is available for both male and female members. Cervical caps and diaphragms for contraceptive use may be reimbursed separately, in addition to the service of fitting and providing instructions for using the device.
Long-Acting Reversible Contraception Devices

Long-acting reversible contraception (LARC) devices are defined as implantable devices that remain effective for several years to prevent pregnancies. Devices include IUDs and contraceptive implants.

Note: For certain LARC devices, when implanted during an inpatient hospital or birthing center stay for a delivery, the IHCP allows separate reimbursement in addition to the inpatient hospital diagnosis-related group (DRG) or the birthing center all-inclusive reimbursement amount. For more information, see the Obstetrical and Gynecological Services module.

Intrauterine Devices

The IHCP reimburses for intrauterine devices (IUDs) and the insertion of IUDs, including insertions on the same date of service as a dilation and curettage. The IHCP also covers the removal of an IUD; however, a provider will not be reimbursed for both an office visit and an IUD removal when billed on the same date of service.

Procedure codes for the IUD device itself must be billed along with the NDC of the product administered.

Contraceptive Implants

The IHCP reimburses for contraceptive implants. The IHCP also reimburses for the insertion and removal of contraceptive implants (CPT codes 11981, 11982, and 11983).

Note: Norplant systems are no longer available in the United States; however, the IHCP reimburses the removal of the implanted contraceptive capsule (procedure code 11976 – Removal, implantable contraceptive capsules) when billed with ICD-10 diagnosis code Z30.49 – Encounter for surveillance of other contraceptives.

Sterilization

Note: The IHCP does not cover a hysterectomy performed solely to render a member permanently incapable of bearing children, whether performed as a primary or secondary procedure. For information about IHCP coverage for medically necessary hysterectomies performed to treat an illness or injury, see the Obstetrical and Gynecological Services module.

Sterilization renders a person unable to reproduce. The IHCP reimburses for sterilizations for men and women only when a valid consent form accompanies all claims connected with the service, according to Indiana Administrative Code 405 IAC 5-28-8. The IHCP may reimburse for the sterilization of an individual only if that individual meets the following requirements:

- Has voluntarily given informed consent (Code of Federal Regulations 42 CFR 441.257 through 441.258)
- Is 21 years old or over at the time the informed consent is given (42 CFR 441.253)
- Is neither mentally incompetent nor institutionalized (42 CFR 441.251)
Informed Consent for Sterilization

The IHCP reimburses for sterilizations only when a valid Consent for Sterilization form accompanies all claims connected with the service. See the Consent for Sterilization Form section for instructions on completing this form. See Family Planning Services Codes (accessible from the Code Sets page at in.gov/medicaid/providers) for lists of CPT, HCPCS, and ICD sterilization procedure codes that, when submitted to the IHCP, cause a claim to suspend for an analyst to review the consent form.

The person who obtains informed consent must verbally communicate all information about a sterilization procedure to the member to be sterilized. Providers must furnish an interpreter if a language or hearing barrier exists. For a full description of the informed-consent process, 42 CFR 441.257 provides additional information.

Providers cannot obtain informed consent while the member to be sterilized is in one of the following situations:

- In labor or childbirth
- Seeking or obtaining an abortion
- Under the influence of alcohol or other substances that affect the member’s state of awareness

Providers must allow at least 30 days, but not more than 180 days, to pass between the date when the member gives the informed consent and the date when the provider performs the sterilization procedure. For sterilizations planned concurrent with a delivery, the patient must give the informed consent at least 30 days before the expected date of delivery. The following exceptions apply to premature delivery (defined by the IHCP as labor before 37 weeks’ gestation) or emergency abdominal surgery:

- The member must sign the Consent for Sterilization form 72 hours before the sterilization, when done at the time of a premature delivery.
- The physician must indicate the reason for the surgery being performed early and the individual’s expected date of delivery. The reason for the surgery must be only premature delivery or emergency abdominal surgery.

If the provider does not obtain informed consent on the required State Consent for Sterilization form before the procedure because of a retroactive eligibility situation or because the patient failed to inform the provider of IHCP eligibility, the IHCP does not cover the service. The IHCP cannot pay for sterilizations performed if the member did not sign the Consent for Sterilization form before the procedure. In these situations, the provider may collect the balance due for the procedure from the patient. To prevent this situation and to ensure IHCP coverage, providers may use the Consent for Sterilization form for all patients in their practice.

Note: If unrelated services are provided at the same time as a sterilization for an IHCP member, the provider can be reimbursed for medically necessary services unrelated to the sterilization even when the sterilization is not covered due to consent not being obtained. Medically necessary services are subject to the IHCP established policy on retroactive services, as outlined in the Member Eligibility and Benefit Coverage module.

A sterilization consent form is not necessary when a provider renders a patient sterile as a result of an illness or injury. The physician must attach a certification to the claim indicating that the sterilization procedure occurred due to an illness or injury when prior acknowledgement was not possible.

A sterilization consent form is not required when only a partial sterilization is performed. Providers must note “partial sterilization” on the face of the claim form, preferably on the line below the HCPCS procedure code. For electronic claims, a claim note may be used.
Consent for Sterilization Form

A properly completed Consent for Sterilization form (HHS-687 or HHS-687-1) must accompany all claims for voluntary sterilization and related services. This requirement extends to all providers: attending physicians and surgeons, assistant surgeons, anesthesiologists, inpatient and outpatient hospital facilities, and other providers of related services. Providers must attach a copy of the Consent for Sterilization form to each claim, as described in the Claim Submission and Processing and Provider Healthcare Portal modules.

Providers may download the Consent for Sterilization form (HHS-687) from the Forms page at in.gov/medicaid/providers. A Spanish version of the form (HHS-687-1) is also available. Completed consent forms that are not the most recent version available at the IHCP website will cause full claim denial. The current Consent for Sterilization forms (HHS-687, in English and HHS-687-1, in Spanish) have an expiration date of December 31, 2018.

When providers properly complete the Consent for Sterilization form, the IHCP receives all the necessary information regarding consent, interpreter’s statement, statement of person obtaining consent, and physician’s statement.

Federal regulations require that certain elements of the consent form be handwritten. If providers or members make an error on the form, they must complete a new form rather than submitting the form with a strikethrough.

The IHCP contractor must receive a properly completed Consent for Sterilization form before making payment. To ensure timely payment to related service providers, the primary service provider should forward exact copies of the properly completed consent form to the related service providers.

Table 1 provides instructions for each item on the Consent for Sterilization form. Fields marked with an asterisk must be completed with exactly the same wording and must match the procedure billed on the claim.

</tbody>
</table>
Field | Description
--- | ---
*Specify Type of Operation | Enter the name of the operation to be performed. If the name of the operation is lengthy, providers can use an abbreviation with an asterisk. Providers must then write the full name of the operation at the bottom of the form.

Instructions for use of alternative final paragraphs | The form provides two options. Cross out the paragraph not used.

Premature delivery | Check this item if alternative paragraph 2 was selected due to premature delivery. If providers check this item, they must also enter a date of expected delivery (see the next item).

Individual’s expected date of delivery | The member’s physician estimates the date based on the patient’s history and physical.

Emergency abdominal surgery | Check this item if alternative paragraph 2 was selected due to emergency abdominal surgery. If providers check this box, they must indicate the operation performed (see the next item).

Describe circumstances | Indicate the emergency operation performed and any relevant information about the circumstances requiring the emergency operation.

Physician’s Signature | The physician who has verified consent and who actually performed the operation must complete this field after the sterilization operation. Signature stamps are not acceptable.

Date | The physician’s signature must be dated and must be on or within 30 days after the sterilization date. The physician must hand-write the date in month, day, year format.

*All “Type of Operation” fields must be worded **exactly the same**, and must match the procedure billed on the claim.

### Sterilization Procedures

IHCP reimbursement is available for the following sterilization procedures.

**Note:** *For sterilizations performed at the time of delivery, providers must bill with modifier XE, XP, XS, or XU, as the situation dictates.*

### Vasectomy

Vasectomies are considered permanent, once-per-lifetime procedures. If a vasectomy has previously been reimbursed for the member, providers may appeal with documentation that supports the medical necessity for the repeat sterilization.

### Tubal Ligation

Tubal ligations are considered permanent, once-per-lifetime procedures. If a tubal ligation has previously been reimbursed for the member, providers may appeal with documentation that supports the medical necessity for the repeat sterilization.
**Hysteroscopic Sterilization with an Implant Device (Essure)**

Hysteroscopic sterilization with an implant device can be performed by a doctor of medicine or a doctor of osteopathy (DO) trained in the procedure.

Providers should bill the implantation procedure using CPT code 58565 – *Hysteroscopy, surgical; with bilateral fallopian tube cannulation to induce occlusion by placement of permanent implants*, and the Essure device using HCPCS code A4264 – *Permanent implantable contraceptive intratubal occlusion device(s) and delivery system*, as follows:

- When the procedure is performed in a physician’s office setting, both codes should be billed on the professional claim (*CMS-1500* claim form or electronic equivalent).
- For outpatient hospital or ASC billing, CPT code 58565 should be billed along with the appropriate revenue code on the institutional claim (*UB-04* claim form or electronic equivalent). For separate reimbursement of the Essure device, HCPCS code A4264 must be billed on the professional claim (*CMS-1500* claim form or electronic equivalent). Outpatient hospitals and ASCs bill for the device under the professional or durable medical equipment (DME) provider number.

Note: *No additional reimbursement is available for the implant device if the procedure is performed in an inpatient setting.*

A manufacturer’s cost invoice must be submitted with the claim to support the cost of the Essure device. The IHCP reimburses 120% of the amount listed on the cost invoice.

For all claims related to this service, the following additional billing requirements apply:

- Write “Essure sterilization” in the body of the paper claim form, in a claim note for an electronic claim, or on the accompanying invoice.
- Submit a valid, signed *Consent for Sterilization* form with the claim.
- Ensure that the primary (principal) diagnosis on the claim is ICD-10 diagnosis code Z30.2 – *Encounter for sterilization.*
