INDIANA HEALTH COVERAGE PROGRAMS BT202683 MAY 28, 2026

IHCP updates site visit requirements for certain provider enrollments

The Indiana Health Coverage Programs (IHCP) previously required pre- and post-enrollment site visits of all providers that are categorized as “moderate” or “high” risk as part of their enrollment screening. The Centers for Medicare & Medicaid Services (CMS) allows the IHCP to determine if a site visit is required for providers that use their home/residential address or a shared office space as their service location while rendering services exclusively in other locations, such as members’ homes, schools or other sites in the community.

The IHCP has modified its provider enrollment application and now asks providers with designated specialties if services are rendered at the service location address reported on the application. If providers respond that they do not provide any services at this location, they will be required to attest that no direct patient care is rendered at this service location address. Providers that attest no services are performed at their service location will **not** be subject to a pre- or post-enrollment site visit.

Providers that render services to members at the reported service location address will continue to receive a pre- and post-enrollment site visit.

The site visit policy change will apply to the following provider types/specialties:

- Type 11 (Behavioral Health Provider), specialty 615 (Applied Behavior Analysis (ABA) Therapist [Masters/Doctoral or HSPP])
- Type 32 (Waiver Provider), specialty 350 (PathWays/Health & Wellness Waiver)
