

The State of Indiana seeks external researchers to partner with the Indiana Management Performance Hub (MPH)

How to connect with Indiana MPH

PATH 1

Indiana Data Hub

Use public information from state agency partners and organizations to perform your own research. The Hub includes more than 140 aggregated datasets related to health, public safety, education and workforce, demographics and government transparency.

PATH 2

Enhanced Research Environment

The Enhanced Research Environment (ERE) is a secure collaboration environment that expedites research and analysis by bringing research teams, their code and data together for the greater good.

PATH 3

Indiana Data Partnership

An enhancement of the existing MPH platform, the Indiana Data Partnership (IDP) allows for organizations to view and share data to provide a holistic view of some of the State of Indiana's most complex challenges.

MPH Research Residency Program

Paths 1-3 allow researchers to pursue their own projects while interacting with subject matter experts from the State. The Research Residency allows the researcher to become an agent for the State working on priority projects to improve outcomes for Hoosiers. This program utilizes paths 1-3, but is more in-depth. Opportunities for this program can be found on the IDP portal and in the MPH newsletter as they become available.

About MPH

MPH provides analytics solutions tailored to address complex management and policy questions enabling improved outcomes for Hoosiers. We empower our partners to leverage data in innovative ways, facilitating data-driven decision making and data-informed policy making.

DATA
TO THE
PEOPLE

The MPH Research Residency program is an opportunity for academic organizations to:

- 1 Support research initiatives by allowing their researchers to provide subject matter expertise in identifying key solutions that are supported by restricted data.
- 2 Support their researchers by providing unique growth opportunities that allow the researchers to develop critical skill sets and understanding through access to otherwise restricted data.

The program allows the researcher to work directly with key State of Indiana staff members while gaining valuable hands-on experience through development and completion of special projects and initiatives.

Responsibilities

- Serve as a subject matter expert and advisor to MPH leadership
- Evaluate and provide feedback on existing policies and procedures
- Improve non-governmental engagement through partnership development
- Refine the Research Residency program to maximize benefit to the State of Indiana and participating institutions
- Provide new perspective and outcomes on old challenges
- Promote the Research Residency program through coordinated strategy with MPH and institutions

Eligibility

This program is currently open to academic researchers within the following fields:

- Government Transparency
- Health
- Public Safety
- Education/Workforce
