

## RESOLUTION 19-02

**A RESOLUTION OF THE NORTHWESTERN INDIANA REGIONAL PLANNING  
COMMISSION AMENDING THE 2040 COMPREHENSIVE REGIONAL PLAN  
UPDATE COMPANION TO INCLUDE SAFETY, PAVEMENT CONDITION,  
BRIDGE CONDITION, SYSTEM PERFORMANCE, FREIGHT, CONGESTION,  
AND AIR QUALITY PERFORMANCE MEASURE TARGETS AMENDMENT NO. 6**

**January 17, 2019**

**WHEREAS**, Northwest Indiana's citizens require a safe, efficient, resource-conserving regional transportation system that maintains and enhances regional mobility and contributes to improving the quality of life in Northwest Indiana; and

**WHEREAS**, the Northwestern Indiana Regional Planning Commission, hereafter referred to as "the Commission", being designated the Metropolitan Planning (MPO) for the Lake, Porter, and LaPorte County area, has established a regional, comprehensive, cooperative, and continuing (3-C) transportation planning process to develop the unified planning work program, a transportation plan, and a transportation improvement program to facilitate federal funding for communities, counties, and transit operators, and to provide technical assistance and expertise to regional transportation interests; and

**WHEREAS**, the Commission performs the above activities to satisfy requirements of the Fixing America's Surface Transportation (FAST) Act of 2015 (PL 114-94), applicable portions of all prior federal transportation program authorizing legislation, as well as other federal, state, and local laws mandating or authorizing transportation planning activities; and

**WHEREAS**, the FAST Act of 2015 requires the Commission to adopt annual safety performance measure targets and 2-year and 4-year pavement condition, bridge condition, system performance, freight, congestion, and air quality performance targets.

**WHEREAS**, the FAST Act of 2015 requires, within 180 days of the state department of transportation adopting targets, metropolitan planning organizations (MPOs) to either adopt the targets of the state department of transportation or develop their own targets; and

**WHEREAS**, the Commission adopted the safety, pavement condition, bridge condition, system performance, freight, congestion, and air quality performance measure targets at their November 15, 2018 meeting; and

**WHEREAS**, the 2040 Comprehensive Regional Plan Update Companion must be amended to reflect the Commission-adopted safety, pavement condition, bridge condition, system performance, freight, congestion, and air quality performance measure targets; and

**WHEREAS**, the changes to the 2040 Comprehensive Regional Plan Update Companion brought about by this amendment were subjected to public comment in the manner prescribed by the 2014 Public Participation Plan with no comments received; and

**WHEREAS**, the Technical Policy Committee (TPC) has recommended that the Commission amend the long-range plan, known as the 2040 Comprehensive Regional Plan Update Companion Amendment #6, to reflect the Commission-adopted safety, pavement condition, bridge condition, system performance, freight, congestion, and air quality performance measure targets as detailed in the attached amendment;

**NOW, THEREFORE, BE IT RESOLVED** that the Northwestern Indiana Regional Planning Commission hereby amends the 2040 Comprehensive Regional Plan Update Companion by adding the Commission-adopted safety, pavement condition, bridge condition, system performance, freight, congestion, and air quality performance measure targets as shown on the attachment to this resolution.

Duly adopted by the Northwestern Indiana Regional Planning Commission this  
seventeenth day of January, 2019.

## Public Comment Report

### **Amendment #6 to the 2040 Comprehensive Regional Plan Update Companion**

**Northwestern Indiana Regional Planning Commission**

**January 4, 2019**

Amendment #6 of the 2040 Comprehensive Regional Plan Update Companion was released for a 30-day public comment period which began on December 5, 2018 and ended January 4, 2019. The amendment was made available at [www.nirpc.org](http://www.nirpc.org). There were no comments received.

## 2040 Comprehensive Regional Plan Update Companion Amendment #6

Amendment #6 to the 2040 Comprehensive Regional Plan Update Companion adds Commission adopted safety, pavement condition, bridge condition, system performance, freight, congestion, and air quality targets to page II-14 as required by the federal transportation law known as the Fixing America's Surface Transportation Act.

### **Safety Targets:**

The Northwestern Indiana Regional Planning Commission (NIRPC), as the Metropolitan Planning Organization (MPO) for Lake, Porter, and LaPorte Counties, is required to support the Indiana Department of Transportation's (INDOT) safety targets or adopt our own safety targets. The NIRPC Commission chose to support INDOT's safety targets with an affirmative vote on November 15, 2018.

The five safety targets are below:

- Number of fatalities – less than 889.6 in 2019
- Rate of fatalities per 100 million miles traveled – less than 1.087 in 2019
- Number of serious injuries – less than 3,501.9 in 2019
- Rate of serious injuries per 100 million miles traveled – less than 4.234 in 2019
- Number of non-motorized fatalities and non-motorized serious injuries – less than 393.6 in 2019

INDOT has adopted its safety target based on five-year rolling averages and reported these targets as required to the National Highway Traffic Safety Administration and the Federal Highway Administration. NIRPC will plan and program projects in support of attaining these targets.

### **Pavement and Bridge Condition Targets:**

The Northwestern Indiana Regional Planning Commission (NIRPC), as the Metropolitan Planning Organization (MPO) for Lake, Porter, and LaPorte Counties, is required to support the Indiana Department of Transportation's (INDOT) pavement and bridge targets or adopt our own pavement and

bridge condition targets. The NIRPC Commission chose to support INDOT's pavement and bridge condition targets with an affirmative vote on November 15, 2018.

The six pavement and bridge condition targets are below:

- Percentage of Interstate pavements in Good condition – more than 84.24% in 2019 and more than 84.24% in 2021
- Percentage of Interstate pavements in Poor condition – less than 0.80% in 2019 and less than 0.80% in 2021
- Percentage of non-Interstate National Highway System pavements in Good condition – more than 78.71% in 2019 and more than 78.71% in 2021
- Percentage of non-Interstate National Highway System pavements in Poor condition – less than 3.10% in 2019 and less than 3.10% in 2021
- Percentage of National Highway System bridges in Good condition – more than 48.32% in 2019 and more than 48.32% in 2021
- Percentage of National Highway System bridges in Poor condition – less than 2.63% in 2019 and less than 2.63% in 2021

INDOT has adopted its pavement and bridge condition targets based on field data collected in the calendar year 2017. NIRPC will plan and program projects in support of attaining these targets.

**System Performance, Freight, Congestion, and Air Quality Targets:** The Northwestern Indiana Regional Planning Commission (NIRPC), as the Metropolitan Planning Organization (MPO) for Lake, Porter, and LaPorte Counties, is required to support the Indiana Department of Transportation's (INDOT) system performance, freight, and air quality targets or adopt our own system performance, freight, and air quality targets. The NIRPC Commission chose to support INDOT's system performance, freight, and air quality targets with an affirmative vote on November 15, 2018. NIRPC is required to coordinate unified congestion targets for the entire Chicago, IL –IN Urbanized Area (UZA) with INDOT, the Illinois Department of Transportation (IDOT), and the Chicago Metropolitan Agency for Planning (CMAP). NIRPC committed to congestion targets on May 18, 2018.

The nine system performance, freight, congestion, and air quality targets are below:

- Percent of person-miles traveled on the Interstates that are reliable – more than 90.5% in 2019 and more than 92.8% in 2021
- Percent of person-miles traveled on the Non-Interstate National Highway System that are reliable – more than 89.8% in 2021
- Truck Travel Time Reliability Index on the Interstates – less than 1.27 in 2019 and less than 1.24 in 2021
- Annual peak hours of excessive delay per capita on the National Highway System in the Chicago, IL--IN Urbanized Area – less than 15.4 in 2021
- Percent of non-single occupancy vehicle travel in the Chicago, IL--IN Urbanized Area – more than 31.4% in 2019 and more than 31.9% in 2021
- PM10 reduced from Congestion Mitigation Air Quality Program projects – more than 0.30 kg/day in 2019 and more than 0.50 kg/day in 2021
- NOx reduced from Congestion Mitigation Air Quality Program projects – more than 1,600.00 kg/day in 2019 and more than 2,200.00 kg/day in 2021
- VOC reduced from Congestion Mitigation Air Quality Program projects – more than 1,600.00 kg/day in 2019 and more than 2,600.00 kg/day in 2021
- CO reduced from Congestion Mitigation Air Quality Program projects – more than 200.00 kg/day in 2019 and more than 400.00 kg/day in 2021

INDOT has adopted its system performance, freight, and air quality targets based on field data collected in the calendar year 2017. NIRPC will plan and program projects in support of attaining these targets. NIRPC, INDOT, IDOT, and CMAP have adopted the congestion targets based on field data collected in the calendar year 2017. NIRPC will plan and program projects in support of attaining these targets.
