

CDBG Updated Activity Codes

Below are some commonly used CDBG Matrix Codes for various activities. Please note that these will be appearing on your Grant Agreements in the budget table. If you have questions about what activities these codes cover please contact Grant Services or refer to the HUD website at www.hudexchange.info/resource/2545/matrix-code-definitions/.

Also, please note that Engineering and Labor Standards will have the same code that matches the prime activity. When you submit your claim voucher, please list the code and reference if the dollars are for Engineering, Labor Standards or Construction specifically.

01	Acquisition
