**Location Description:**

Rozell Drive in the town of Prince's Lakes in Johnson County Indiana

Section 33, T. 11 N., R. 4 E. Nineveh Quadrangle Map  
Census Tract number 6114

**Activity Description:**

The Town of Prince's Lakes was adversely affected by the severe rain event that occurred May/June 2008 (FEMA 1766). On June 7, 2008 the dam overtopped with a wall of water that caused a significant amount of erosion and soil loss of the embankment. The project will consist of constructing a 125' wide x 11' high concrete labyrinth type spillway. This will include a concrete spillway chute, chute blocks and an impact basin followed by an earthen channel lined with riprap.

**Location Description:**

Lake Edgewood in Morgan County, Indiana

**Activity Description:**

Improvements to the dam will be made to bring it in compliance with IDNR safety requirements and to significantly reduce the risk of an uncontrolled breach failure. The scope of work involved with this project is to replace the existing spillway which consists of the following activities; demolition, installation of a new principle spillway, concrete riser, trash rack, drawdown pipe/valve, embankment and emergency spillway improvements.

**Proposed Budget**

\$ 315,473.00

**Location Description:**

On S. Fleming Drive in the Town of Prince's Lakes in southeastern Johnson County, Indiana

**Activity Description:**

The Town will use grant funds to rehabilitate the dam which is classified as conditionally poor. Improvements

include: the embankment will be reconstructed to an appropriate slope; the primary spillway will be removed and replaced with a 60" concrete outlet pipe; and riprap and a filter fabric will be placed at the outlet into East Lake. Damage to the dam was related to FEMA 1766 and the improvements are vital to the long term recovery of the Town.

Lower Wildwood Lake Dam is located on Sinking Creek in Morgan County, Indiana.

**Activity Description:**

The Wildwood Lake Dam located in Morgan County is classified as a high hazard dam due to the potential for loss of life and serious damage to property downstream of the dam in the event of a catastrophic failure. The dam sustained damage as a result of the flooding in 2008 (FEMA 1766). Improvements to the dam include a new principle spillway, trash rack, drawdown valve, raising the dam, and embankment and emergency spillway improvements.

**Location Description:**

Albin Lake Dam in the City of Greencastle, IN in Putnam County.

**Activity Description:**

The City of Greencastle was adversely affected by the disaster of 2008 and Albin Lake Dam was damaged as a result of the severe weather. Damage to the dam includes missing mortar and rock was dislodged resulting in the dam continuously leaking. The dam is classified as a high hazard dam. A major water line runs along the crest of the dam and failure of the dam would cause significant problems with water distribution and fire protection and is important to the continued recovery of this disaster affected community. The improvements to the dam include: replacement of the existing spillway, flattening of the dam slopes to improve stability, widening of the roadway that crosses the dam to meet minimum standards and a grass safety ledge for pedestrian access.

**Location Description:**

Johnson County, Peoga Lakes

**Activity Description:**

The Peoga Lakes Dam does not meet Indiana Department of Natural Resources safety requirements. The water level of the lake has been lowered by 10' to relieve the pressure on the dam and reduce the risk of an uncontrolled breach which would result in loss of life and damage to property and infrastructure downstream. A semi-circular weir, a concrete chute with baffle blocks, rip-rap and a drawdown valve will be constructed to alleviate flooding and increase the efficacy of the dam. These improvements are necessary to protect the disaster affected community.

**Proposed Budget**

\$ 450,982.12

**Location Description:**

City of Terre Haute Hulman Lake Dam, Vigo County, Indiana

**Activity Description:**

Hulman Dam provides flood control measures for thousands of resident and businesses downstream. During the 2008 flood disaster event the dam sustained damage mainly to the primary spillway area where the velocity of the water rushing out caused erosion along this outlet area. Restoration and reshaping of the spillway outlet and adding an additional five feet to the top of the dam will be accomplished through this project. The additional height will provide greater protection from flooding during a PMP event.

**Location Description:**

73 Hart Lake Drive, Mooresville, IN 46158-8485

**Activity Description:**

Grant funds will be used for improvements to Hart Lake Dam. The project will consist of the armor of the crest and downstream slope of the dam utilizing a cabled, concrete block, articulated mat system. Before installation of the articulated mat, the existing downstream slope will be reconstructed to provide and remove some depressions. This process will also provide a finished slope that is flatter than the existing 2.2 to 1. At the toe of the downstream slope of the dam a rip-rap plunge pool channel will be constructed. This plunge pool will decrease the high velocities of the overtopping water and protect the base of the dam from undercutting.

**Location Description:**

Columbus East High School 230 S. Marr Road, Southside Elementary 1320 W. 200S.,

**Activity Description:**

Bartholomew County experienced widespread flooding during the adverse weather event of May-June 2008 (FEMA 1766). Several of the county schools were damaged as a result of high volume of rain that fell during this time period. The county will use grant funds to reimburse the Bartholomew Consolidated School System for expenses incurred as a result of the floods. Damage was done to floors, walls, electrical, fire and elevator systems.

**Location Description:**

Peoga Lakes Johnson County, Indiana

**Activity Description:**

Johnson County applied on behalf of the Peoga Lakes Association for grant funds to help the area recover from the damage which was the result of the May 2008 floods (FEMA 1766). The embankment was eroded to the roads edge which created a large crack in the road and disrupted the road base. The dam was overtopped and the downstream slope and retaining wall were washed out. A secondary spillway was constructed and the slope of the dam restored.

**Location Description:**

Lamb Lakes in Johnson County, Indiana

**Activity Description:**

As a result of the flooding of 2008 (FEMA 1766), the dam between Earlham and Lamb Lake broke and washed into Lamb Lake. The area where the dam broke was the main access road to on of the main sides of the lake. Approximately 80 families were unable to leave or return to their homes. The dam was reconstructed.

**Location Description:**

Lower Wildwood Lake Dam located on Sinking Creek in Morgan County

**Activity Description:**

The Lower Wildwood Lake dam is an earthen embankment located on Sinking Creek in Morgan County. The June storms of 2008 (FEMA 1766) eroded a portion of the spillway and the downstream hillside. This rainfall event resulted in high lake levels and caused considerable deterioration of the spillway outlet channel and significant erosion along the southern spillway channel bank. The project consisted of debris removal from the erosion area, preparation of the erosion area and installment of geotextile fabric and the placement of 175 LF of rip rap.

Graybrook Lake in Morgan Twp. in Owen County

**Activity Description:**

In June 2008 (FEMA 1766) a large rain event occurred causing significant flooding. The Graybrook Lake dam began to overtop and significant erosion started to occur. Within minutes of overtopping, the dam failed and the lake emptied causing water to run down stream seriously damaging properties in its path. The dam had to be reconstructed and included a new spillway, a lake draw down system, a new impact basin and raising the dam embankment. The total construction area for the project is 106,600 square feet and the length of the top of the new dam is 400LF.

Prince's Lakes East Lake Dam Johnson County Indiana

**Activity Description:**

Johnson County was hit hard by the May 2008 flooding (FEMA 1766) and Prince's Lakes East Lake dam was overtopped with a wall of water that caused a significant amount of erosion and soil loss on approximately 6,300 square feet of the embankment. Residents had to wade through waist and shoulder high water to reach pontoon boats to leave the south end of the lake. The dam had to be rehabilitated to prevent a total failure of the dam which would wash out the sewer lift station causing the town's waste water system to fail and flood numerous homes.

**Location Description:**

North Lake Dam in Prince's Lakes in Johnson County, Indiana

**Activity Description:**

North Lake dam approximately 400' long was overtopped in the 2008 flooding (FEMA 1766). Approximately 10,890 SF of the embankment was damaged as well as significant damage to the spillway. The embankment and spillway had to be reconstructed, trees removed, erosion control measures put in place and the existing road had to be replaced.

**Location Description:**

Otter Creek  
 Seelyville, Indiana

**Activity Description:**

During the flood of June 2008 (FEMA 1766) an arterial water main was exposed that crosses Otter Creek and feeds the Town's water system. This main line was embedded in approximately nine feet of sand. Heavy rains scoured the creek bed and exposed the water main. Rip rap and gabion baskets were installed to protect the pipe.

**Location Description:**

west bank of Lost Creek just north of the intersection of 30th and Florida Streets in Terre Haute, Indiana

**Activity Description:**

During the June 2008 flood (FEMA 1766) the City of Terre Haute experienced historic flooding throughout the city causing damage to homes, businesses and city infrastructure. The Lost Creek tributary that runs through the City experiences a tremendous amount of damage with debris and collapsing the bank which directly threatened private property. Damage consisted of about 220' of bank erosion failure along the west bank of the creek. Restoration of the bank involved the installation of gabion baskets at the toe of the slope and rip-rap armament on the re-shaped slope.

**Location Description:**

West Terre Haute

**Activity Description:**

During the flood disaster of June 2008 (FEMA 1766), the West Vigo Levee Association’s sustained damage to the levee which protects the Town of West Terre Haute from Sugar Creek on the West and the Wabash River basin in which the town lies. The work predominately entailed the removal of trees, debris and other sediment from the approximately 300 foot long spillway channel. The channel also sustained damage to its sides from the rush of the water causing erosion and collapse of these channel sides. Once the spillway channel was cleared of the debris, the channel sides were re-shaped, built back up and re-seeded as close to pre-disaster condition as possible in order to restore functionality to the spillway.

**Location Description:**

Whitlock Avenue in Crawfordsville Indiana

**Activity Description:**

The city of Crawfordsville sustained damage from the June 2008 flooding event (FEMA 1766). A broken storm sewer pipe is responsible for the closure of Whitlock Avenue. A sink hole and eroding walls around the culvert have made the roadway unsafe. The culvert will be replaced with a new 156 foot culvert; headwall, wingwalls and retaining walls will be constructed. The section of the road affected will be replaced as well as a section of sidewalk. All storm and sanitary sewers will need to be replaced after construction.

 Bloomington, Indiana 47404

**Activity Description:**

The City of Bloomington was adversely impacted by the June 2008 floods (FEMA 1766) and the Bloomington Salvation Army was flooded. Too much rain overwhelmed the existing drainage system and allowed water to pour into the basement. The project will include the removal and replacement of interior basement wall, mold remediation, roof and stairway replacement; all of which were damaged by the heavy rains and storms.

**Location Description:**

Montgomery County Road 300S just east off of Indiana State Road 47 in Montgomery County, Indiana

**Activity Description:**

The heavy sheet rain and driving winds during May and June 2008 have caused severe slope erosion along Offield Creek adjacent to Montgomery County Road 300S and threatens to destabilize the road. Any further degradation of the slope will damage portions of CR 300S. The project will correct the slope failure using a three pronged approach. Drainage control, erosion control at the toe of the slope (near creek level) and the construction of a retaining wall along CR 300S will prevent further slope erosion and avert road damage that is likely to occur if erosion continues.

**Location Description:**

damage is to bridges/roads throughout Putnam County Indiana

**Activity Description:**

As a result of the June 2008 flood disaster (FEMA 1766), Putnam County received extensive damage to 26 bridges and abutments as a result of high velocity flooding in the streams and creeks of the county. This event was widespread and covered the entire county with heavy rains and flash flooding. Putnam County is applying for funding to help rehabilitate 26 damaged bridges/abutments that is estimated to be just over 21,000 linear feet of work that is critical to the county-wide transportation network. The scope of work for each bridge will vary depending on the type of damage sustained.

**Location Description:**

Spring Lake in Trafalgar, Indiana

**Activity Description:**

The town of Trafalgar received heavy rains during the flooding of June 2008 (FEMA 1766). Spring Lake was

constructed as a storm water retention pond and collects approximately 70% of the storm water runoff with in the Town of Trafalgar. The proposed project includes replacement of the existing outfall control structure for the pond, bank stabilization and grading at the downstream side of the out let, reconstruction of North Lake Road at the outfall structure and reconstruction of Dunn Road Crossing at the inlet control culvert. Drainage improvements with the pond and discharge control are needed to eliminate flooding of properties, severe erosion and safety concerns.

\$ 157,750.00

**Location Description:**

Spring Lake in Trafalgar, Indiana

**Activity Description:**

The town of Trafalgar received heavy rains during the flooding of June 2008 (FEMA 1766). Spring Lake was

constructed as a storm water retention pond and collects approximately 70% of the storm water runoff with in the Town of Trafalgar. The proposed project includes replacement of the existing outfall control structure for the pond, bank stabilization and grading at the downstream side of the out let, reconstruction of North Lake Road at the outfall structure and reconstruction of Dunn Road Crossing at the inlet control culvert. Drainage improvements with the pond and discharge control are needed to eliminate flooding of properties, severe erosion and safety concerns.

**Location Description:**

City of Vincennes at the Perry Street pump station and the College Avenues pump station

**Activity Description:**

The June 2008 flood (FEMA 1766) significantly affected the City of Vincennes as ten inches of rain fell in southwest Indiana and moved down stream of the Wabash River. The Perry Street and College Avenue pump stations sit just east of the Wabash River and worked continuously causing the pumps to fail. The proposed project will rehabilitate both pump stations resulting in more effective storm drainage for the area.

**Location Description:**

Detention pond #1 between Montgomery Road and I-74  
Detention pond #2 located NE of the intersection of Montgomery Raod and North Davidson Street  
culvert railroad crossing over Gas Creek  
all in Greensburg Indiana

**Activity Description:**

The City will use grant funds to make improvements to the storm drainage system. In June, 2008 the residential flooding which occurred was severe and many businesses were damaged as a result of the disaster. Greensburg will install two detention ponds to contain the excess water and will install a 60" culvert by jack and bore method with a casing pipe at the railroad crossing over Gas Creek. These improvements are necessary to reduce future flooding and encourage economic development in this disaster affected community.
