Narratives

Disaster Damage:

The 2008 disasters in Indiana have been among the worst in our state's history. 82 of Indiana's 92 counties were declared as Presidential disaster areas between the three disaster periods (DR-1740, DR-1766 and DR-1795). DR-1740, which affected northern Indiana, occurred after winter rains melted several feet of snow, causing severe flooding. 21 counties were declared as a result of the winter weather. Additionally, the northwestern-most counties declared as part of DR-1740 were again affected by severe storms. As of the end of 2008, the declared counties received \$7.6 million of Individual Assistance and \$5.1 million in Public Assistance as a result of DR-1740. DR-1766, the result of tornados and severe flooding in late May and early June, was clearly the most substantial 2008 disaster with 44 counties declared as Presidential disaster areas. FEMA estimates that total IA and PA for this disaster will exceed \$275 million. FEMA and the SBA received 17,844 applications for IA during DR-1766, resulting in over \$127 million in assistance. The PA process is now in full swing with FEMA having 318 eligible applicants from local and state government and an estimated 2,111 project worksheets. Currently \$22 million have been obligated to local governments, and PA total estimates exceed \$150 million. Lastly, when the powerful remnants of Hurricane Ike passed through Indiana in early September they caused severe flooding in the northern parts of the state and wind storms in the south. DR-1795 resulted in 38 county declarations. To date, 25,800 IA applications have been filed with FEMA and \$43 million of financial assistance provided to individuals. The chart below depicts the best possible estimate of the financial impact of all the 2008 disasters to the state of Indiana. Based on these estimates, the state has been subject to over \$1.9 billion in damage to public infrastructure, housing and farmland. Category

Estimated Financial Impact \$000 FEMÁ
Relief 372,714 Private Insurance Claims for Natural
Disasters 735,000 Dams, Levees, & Other Infrastructure 246,500 FederalHighway

Repairs 13,700 Agriculture &am

Recovery Needs:

3.291

le the estimated FEMA assistance is substantial with over \$370 million in funding provided, it will not cover the estimated recovery needs in the areas of economic and workforce development, infrastructure, and housing. The following summarizes the key unmet needs in each of these areas: Economic and Workforce Development The largest economic impact to Indiana will be in the area of agriculture where early estimates indicate that crop losses will exceed \$300 million and land rehabilitation losses for activities like debris and sediment removal, levee repair and soil erosion repair will exceed \$200 million. Impact to other Indiana businesses is likely to exceed \$500 million with most of the damage occurring in the five most effected counties of Bartholomew, Johnson, Vigo, Morgan and Owen. The most substantial areas of damage occurred in Columbus, Indiana, where the Columbus Regional Hospital was completely immobilized and had over \$211 million in damages of which less that \$75 million will be covered by FEMA. Additionally, the city's largest employer reported damages in excess of \$200 million none of which qualified for assistance. Infrastructure Damage to Indiana's public infrastructure will likely exceed \$325 million and it is estimated that FEMAPA will cover \$217.4 million that was found to be eligible for their program, providing a federal share of \$123.3 million or less than half, of this expense. The remainder does not qualify, is covered by another Federal program, or represents the state/local match. The chart below depicts the financial assistance the State of Indiana has received. However, the costs that go beyond what is covered below have been identified as key areas of remaining need. Overall Progress Narrative:

Both IHCDA and OCRA continue to meet with HUDâ¿¿s Technical Assistance Provider on the closeout of these grants. The Technical Assistance provider is assisting with several flags as the DRGR appears to not accept the beneficiary data as entered.

OCRA has addressed all but one of the at risk-flags under DR2 in DRGR and is actively working to resolve the remaining compliance flags in collaboration with HUDâ¿¿s Technical Assistance Provider.

IHCDA is currently collecting the flood buy-out data for the remainder of the flags to enter that information in and clear those last flags. To date, IHCDA has addressed approximately 15 flags, and will continue to address flags throughout Quarter 4.

Activities related to Owner Occupied Repair grants, the Lead Community Action Program and the Lead Hazard Reduction Demonstraiton Program have all been successfully closed out in DRGR.

IHCDA is collecting the final beneficary data for Interfaith, and then will be able to report on those beneficaries in DRGR and closeout the project. The Project Sponsor for A Safe Haven Veterans Apartments is currently working on supplying the closeout information for this project. IHCDA is working on scheduling the final inspection for the project.

IHCDA is continuing to clear out flood-buyout awards. Several have had beneficary information entered and IHCDA staff is actively working on collecting reporting to closeout the remainder of the awards.

Lafayette	\$0.00	\$436,753.18
Most Impacted and Distressed Expended	\$0.00	\$0.00

Activity Description:

The City of Lafayette will use grant funds to demolish and clear a site of five parcels which contains dilapidated garages/warehouses on the east parcel of the site. This former coal yard poses a threat to the health and safety of the community due to its failing structural integrity and VOC contamination. The project will include clearing of excess vegetation, demolition of existing structures, excavation of existing soil, and ground water treatment to prepare the area for possible redevelopment and promote the economic recovery of the area.

Activity Description:

The City of Indianapolis will use grant funds to demolish and clear deteriorated buildings and address environmental contamination at the Carrier/Bryant Brownfield site. The project will involve demolition of three buildings, asbestos abatement, removal of pumps, corrosive drums, and underground storage tanks in order to address immediate threats to human health and the environment for area residents. The project is located in an economically depressed section of the City. Demolition will make way for redevelopment and there is strong interest from local businesses to expand/relocate to the area.

Most Impacted and Distressed Expended	\$0.00	\$0.00

Activity Description:

Mt. Zion Mill Pond Dam will be replaced and the road that passes over it will be separated from the dam using Department of Transportation funds. A sheet pile wall will generally replace the existing earth dam and concrete spillway and retain the right side of the approach embankment. The downstream channel will be lined with concrete and the existing spillway will be completely removed. There will be 400 LF of toe drain with 8" filters. These improvements will contribute to the overall recovery of the disaster affected community.

Location Description:

Mt. Zion Dam In Fulton County, Indiana

Total Funds Expended	\$0.00	\$88,000.00
New Carlisle	\$0.00	\$88,000.00
Most Impacted and Distressed Expended	\$0.00	\$0.00

Activity Description:

The Town of New Carlisle will use grant funds to replace the main pump station electrical panel. The purpose of the pumping station is to extract storm water from the viaduct to prevent the flooding of the viaduct on US Highway 20 and the eastern residential section of the Town. Without a functioning pumping station at the Town's viaduct, whenever there is a rain event a number of detrimental impacts occur including the flooding of basements and cutting off all access to the northeast side of Town.

Location Description:

along US 20 and the eastern side of New Carlisle, Indiana

Berne, City of	\$0.00	\$953,081.16
Most Impacted and Distressed Expended	\$0.00	\$0.00

Activity Description:

The City of Berne will use grant funds to make sanitary and storm water sewer system improvements through the construction of newer sewer lines and the addition of new sewer lining, in order to replace the existing combined sewer in the two designated areas. The grant funding will also be used to rehabilitate an existing lift station by lining the walls with hydrogen sulfite resistant epoxy coating, as well as adding the necessary electrical couplings so that the station an operate on the city's portable generator in emergency situations. The improvements made to the sanitary and storm water sewer system are crucial to the long-term econimic recovery of the Disaster Affected Area.

Most Impacted and Distressed Expended	\$0.00	\$0.00

Activity Description:

The severe storms and flooding in the spring of 2008 caused tremendous stress on the aging water and wastewater systems. Failures at the lift stations resulted in backed up sewage in homes and businesses. The Town will use grant funds to make improvements to the water and wastewater systems. Improvements include: a new chemical storage building, new chlorination equipment and piping, chlorine contact tank shelter, replacement of lagoon aeration equipment, electrical and controls upgrades, replacement of discharge pipe, chemical room improvements, electrical upgrades, replacement of fire hydrants, replacement of gate valves and the existing main. These improvements will contribute to the long term economic recovery of the community.

Activity Description:

The City of Oakland City will use grant funds to complete storm water system improvements. The project includes the installation of new trunk line storm sewers; the replacement of existing trunk line sewers with larger pipes; the elimination of conveyance restrictions (bottlenecks) in the existing storm water systems; installation of modern inlet structures to replace deteriorated inlet structures; and installation of new storm sewers in areas currently without and drainage improvements. These improvements will contribute to the overall recovery of this disaster affected community.

Activity Description:

Grant funds will be used to make improvements to the stormwater system in disaster affected areas.

The project includes: Installation of approximately 4,305 linear feet of concrete reinforced pipe (RCP) ranging in sizes from 12 inches to 30 inches in diameter over the distance of approximately 9-12 street blocks in length in order to collect stormwater drainage and convey this to the existing Cherry Grove pump station located at the very southern end of Town (7th Street and Cherry Grove Avenue). Along with the proposed pipe, approximately 31 inlets and 12 manholes will be installed throughout these areas and road pavement will be restored.

Location Description:

Within the limits of the town of West Terre Haute.

Activity Description:

Area (Survey)

Jasper County will use grant funds to remove log jams from 31 locations on the Iroquois River. A contractor will be hired to cut and remove the debris from the river. The debris will be piled, tied down and secured on the bank or burned using an air burner. Many of these log jams were enlarged due to the severe weather events in 2008. It is anticipated that clearing the river will help alleviate flooding.

Location Description:

various locations along the Iroquois River in Jasper County Indiana

Crawfordsville	\$0.00	\$49,000.00
Most Impacted and Distressed Expended	\$0.00	\$0.00

Activity Description:

Area (Survey)

The proposed project is to remove logs, sediment and other debris in Shelley Creek and tributary channels. Log jams in the project area are rated as either 3 or 4. The flood of June 2008 eroded the banks of Shelley Creek and caused many trees to fall into the channel. After the log jams are removed, the site will be restored to a stable condition to minimize future erosion and sedimentation of the creek.

Location Description:

Shelley Creek and tributary channels in Crawfordsville, Indiana in Montgomery County

City of Washington	\$0.00	\$8,862,000.00
Most Impacted and Distressed Expended	\$0.00	\$0.00

Activity Description:

The City of Washington will use Disaster Recovery grant funds for a combined sewer overflow (CSO) project that has been mandated by an agreed order from IDEM. The proposed project includes the construction of a vortex type grit removal unit at the WWTP. The new wet-weather facility will include a 3.9 MG storage tank with submersible type pump station and automatic flushing gates, and a constructed wetland with fine screening and a UV disinfection system. Modifications will be made to the existing headworks diversion structure. The proposed work also includes the installation of a CSO pump station to convey flow from this CSO to the storage tank. Conveyance piping includes two 84-inch wetland influent pipes, a 36 inch pipe and construction of a wetland treatment facility. These wastewater system improvements are vital to the long-term economic recovery of the disaster-affected area.

Location Description:

200 Harnrd Ave Washington, IN census tracs/block groups
