Strategic Plan for Rural Indiana

The Indiana Office of Community and Rural Affairs works with Indiana communities to build relevant and economically thriving places where people want to live, work and grow.

Guiding Principles

Retain, attract and develop talent in our rural communities.

Incite and encourage regional collaboration in rural planning processes.

Strategic Framework

1. Provide opportunities and programs focused on our people and place-based investments
   - Enhanced the Stellar Communities Program to include a regional approach
   - Expansion of placemaking programs
   - Develop regional economic development and talent attraction program
   - Partner with applicable stakeholders on water infrastructure issues
   - Implement Blight Clearance Program revisions
   - Research, build and create a Section 108 program
   - Partner with Indiana Bond Bank to provide a gap funding program

2. Expand OCRA’s role as a Center of Excellence
   - Highlight best practices and community successes via communications mediums
   - Support programs focused on rural health
   - Coordinate regional community development conferences
   - Facilitate the Taskforce on Rural Affairs
   - Prioritize continuous improvement of agency services

3. Build capacity of rural leadership
   - Expand community capacity building programs
   - Engage youth involvement in leadership activities through curriculum development and programming
   - Leverage existing successful leadership resources through mentorship opportunities
   - Participate in the Opportunity Investment Consortium of Indiana

4. Support economic growth and preservation in downtown and commercial districts
   - Grow and cultivate downtown revitalization efforts
   - Deliver tactical placemaking training
   - Create and launch Downtown Development Week
   - Organize Midwest Main Street Conference
   - Design second-story housing competition for Main Street communities

5. Facilitate strategies to address rural broadband access
   - Collaborate with Director of Broadband Opportunities
   - Establish grant program to fund planning activities for the installation of broadband
   - Host Statewide Broadband Summit
Strategic Plan for Rural Indiana

The Indiana Office of Community and Rural Affairs works with Indiana communities to build relevant and economically thriving places where people want to live, work and grow.

Throughout the summer of 2017, OCRA completed a 13-stop listening tour, to hear the first-hand feedback from those who live in, and love, rural Indiana. The information gathered during this tour shaped the Strategic Framework for OCRA to build upon over the next two years.

The listening tour had representation from a broad segment of the rural population with attendees representing 73 communities across 57 counties. Additionally, meetings were held with a diverse sector of partners, stakeholders and constituents that have a vested interest in furthering the development of rural Indiana. The feedback and comments OCRA received through these activities identified two guiding principles:

- Retaining, attracting and developing talent in our rural communities and
- Inciting and encouraging regional collaboration.

Collaboration and partnership among rural communities is crucial in order to grow opportunities, take care of its people, and truly take it to the Next Level. OCRA will utilize these principles as future initiatives and programs are developed.

Further, the feedback revealed consistent themes in regards to challenges that rural Indiana continue to face. These obstacles include: access to broadband, the addiction crisis, housing shortage, the workforce skills-gap and aging water infrastructure.

This framework and our tactics attempt to align these challenges with our programs and place-making efforts. The framework focuses on five key areas:

1. Provide opportunities and programs focused on our people and place-based investments;
2. Expand OCRA's role as a Center of Excellence;
3. Build capacity of rural leadership;
4. Support economic growth and preservation in the Downtown and commercial districts; and
5. Facilitate strategies to address rural broadband access.

These four components all provide support to working collaboratively to attract and retain talent, and where possible, attempt to address the challenges identified through the listening tour. This is a framework from which to build upon, but is not all encompassing. Progress must be measured, but room to adjust to changing dynamics is crucial to its success.

The heart and soul of Indiana is truly our rural communities, and when rural Indiana succeeds, the rest of the state succeeds. OCRA is committed to continuous improvement and ensuring that we are serving the needs of our rural areas to the best of our ability while being responsible fiscal stewards. This framework lays the groundwork for making rural Indiana as strong as it can be by encouraging collaboration amongst its greatest asset, its people. The strategic plan will be a living document that OCRA will continue to update with progress being made as new challenges are encountered.

Jodi Golden,
Executive Director
Strategic Plan for Rural Indiana

Strategic Framework

1. Provide opportunities and programs focused on our people and place-based investments.

In order to encourage population growth, rural communities must collaborate and prioritize initiatives focused on improving the quality of life for current and future residents. Strong community development programs create engaging vibrant places where people are motivated to stay, grow, live, work and play.

1.1. Enhance the Stellar Communities Program to include a regional approach

Incorporate a regional approach to connect rural communities, encourage collaboration and transform rural areas. Leverage university partners to build cohesiveness and to ensure sustainability.

On Jan. 31, 2018, Lt. Governor Suzanne Crouch announced the Stellar Communities Program, through the Indiana Office of Community and Rural Affairs, will now combine communities, creating a region that will emphasize collaboration between neighboring towns, cities and counties. Five finalists were announced in April, 2018 and began working with Ball State University’s Indiana Communities Institute to discuss project alignment and continued planning efforts. In November, all five finalist regions completed the final step in the process by presenting their Regional Development Plans to the Stellar partners. Health & Heritage region and the New Allen Alliance were selected as the 2018 designees on Dec. 11, 2018.

1.2. Expansion of placemaking programs

Building on the past 10 (+) years of placemaking efforts, OCRA will continue the Quick Impact Placebased Grant program and introduce other innovative quality of place grant opportunities. Launch a pilot granting program for Main Street organizations focusing on downtown identity, shared regional values and connectivity.

1.3. Develop regional economic development and talent attraction program

Work with stakeholders on the development of a statewide strategy encouraging communities to embrace universal principles and best practices accelerating economic and community development.

1.4. Partner with applicable stakeholders on water infrastructure issues

OCRA will collaborate with state and federal agencies to strategically allocate resources to rural communities to address water infrastructure challenges.
Provide opportunities and programs focused on our people and place-based investments.

In order to encourage population growth, rural communities must collaborate and prioritize initiatives focused on improving the quality of life for current and future residents. Strong community development programs create engaging vibrant places where people are motivated to stay, grow, live, work and play.

1.5. Implement Blight Clearance Program revisions

Implement updates to improve the impact and accessibility for rural Indiana communities to encourage economic development.

On Oct. 2, 2018, OCRA announced that communities are able to apply for multiple projects as a part of the updated Blight Clearance Program. To improve the impact and accessibility of this grant, program revisions were made to allow cities and towns more options to fund multiple projects until the total grant amount reaches $500,000. The new program follows an updated submission process and streamlined application. Funding is available on a yearly rolling basis. Applications are accepted until all funding is exhausted.

1.6. Research, build and create a Section 108 program

Develop an infrastructure loan program that rural communities can utilize to assist in repair and expansion of infrastructure projects such broadband, sewer and water needs.

1.7. Partner with Indiana Bond Bank to provide a funding program

In response to financing shortfalls threatening to stall critical community development projects, a new program is created to help bridge funding shortfalls faced by recipients of Community Development Block Grants.

On Nov. 16, 2018, the Indiana Bond Bank announced the launch of the Gap Avoidance Program. OCRA identified cities and towns who are facing financing gaps after being awarded funds as a part of their Community Development Block Grant projects. These funding gaps can cause project delays and force communities to find new funding sources in a short period of time. The Indiana Bond Bank built G.A.P. off its years of experience structuring statewide pooled financings. In a pooled financing transaction, multiple entities with similar financing needs come together in one transaction to achieve economies of scale.
Strategic Plan for Rural Indiana

Strategic Framework

Expand OCRA’s role as a Center of Excellence.
OCRA has the privilege of working with rural Indiana communities providing the opportunity to collect ideas, successes and best practices. Sharing this information, connecting regional approaches and expediting solution implementation establishes OCRA as a trusted resource for rural Indiana.

2.1 Highlight best practices and community successes via communications mediums
Elevate our rural areas by collecting and showcasing successful projects, ideas and solutions via the OCRA website, microlearning webinars and other communication mediums.

On Aug. 9, 2018, OCRA launched a series of micro-learning videos designed as a resource to assist communities with capacity building, developing partnerships, and strengthening leadership. These twenty-five minute videos cover a variety of topics, including board development, succession planning, trail funding, health, volunteer engagement and asset mapping. New videos are released on the second Wednesday of every month. Newsletters have also been expanded to highlight successful quality of place best practices.

2.2 Support programs focused on rural health
By working with ISDH and IRHA, OCRA will help develop supportive opportunities to assist rural communities learn how to address rural health issues from multiple angles.

2.3 Coordinate regional community development conferences
Identify knowledge gaps in rural community leadership in order to provide technical assistance through full day conferences.

2.4 Facilitate the Taskforce on Rural Affairs
In partnership with the Lt. Governor’s Office, Department of Workforce Development and the Governor’s Workforce Cabinet, OCRA will help lead the taskforce on gathering input on programming and policy for Rural Indiana. Recommendations may center on categories of leadership, tax and fiscal policy, placemaking, housing and workforce development.

2.5 Prioritize continuous improvement of agency services
Provide the highest quality customer service and deliver efficient and effective government resources to rural communities.

Throughout 2018, OCRA has enhanced the grant procedures, streamlined processes and improved the collection of stakeholder input. OCRA is also in the process of implementing a new grants management system that is planned to go live by mid-2019.
Strategic Plan for Rural Indiana

Strategic Framework

3. Build capacity of rural leadership.

The challenges in rural communities are increasing in frequency, complexity, and intensity, emphasizing the need for effective rural leadership. While self-sufficiency is important, connecting leaders provides the foundation for a strong collaborative network capable of sharing ideas and addressing multi-faceted issues together. Cooperation to achieve jointly established priorities helps leverage the assets each party brings to the table, making the most of the region’s resources.

3.1. Expand community capacity building programs

Build on past agency efforts to support regional leadership and planning efforts.

In August 2018, OCRA partnered with HPG Network to launch Regional capacity building workshops to assist communities interested in preparing for the Stellar Communities Program application. The program is designed for any community leaders looking to build relationships within their own community and the region that surrounds them.

3.2. Engage youth involvement in leadership activities through curriculum development and programming

Collaborate with Mayors’ Youth Councils, Promise Indiana, and school districts to provide programs and curriculum targeted towards youth involvement in community planning and development.

3.3. Leverage existing successful leadership resources through mentorship opportunities

Serve as convener for a mentorship program pairing local leaders in an effort to share best practices and inspire innovation and collaboration.

3.4. Participate in the Opportunity Investment Consortium of Indiana

An advisory leadership, together with backbone agencies, training, and consultancy partners, will collectively provide coordinated assistance to investment deals as they clear milestones and prepare for Opportunity Zone investment infusions.
Support economic growth and preservation in the downtown and commercial districts.

Downtown and commercial districts are a visible indicator of community pride, along with its economic and social health. Downtowns also help define a community’s identity through distinctive, often historic architecture; shops and restaurants; and community gathering places. Maintaining the places that make a community unique, contributes to a sense of place and neighborhood identity.

4.1. Grow and cultivate downtown revitalization efforts

Provide strategic training using transformative and pioneering strategies with the guidance and assistance of the National Main Street Center, IMS organizations and Indiana Landmarks.

4.2. Deliver tactical placemaking training

Short-term, low-cost, and scalable placemaking projects can launch neighborhood and community development and long-term growth in rural Indiana communities. This series of two day hands-on workshops provides practical skills to complete a quality of place project that bolsters local community development.

In October 2018, the The Musicant Group, completed a series of two-day workshops titled “Placemaking for Main Streets” in six communities across Indiana to include: Lafayette, Bloomington Angola, Plymouth, Bargersville and Marion. Each community built a temporary public placemaking installation created in strategic areas of their respective downtowns. More than 200 participants from local main street organizations, planners, and private firms devoted time, resources and creativity in helping communities grow.

4.3. Create and launch Downtown Development Week

As a way to encourage and celebrate downtowns of all sizes, OCRA will plan and execute a week-long celebration filled with activities, resources and trainings for communities around the state.

More than 30 cities, towns, main street organizations and economic development groups planned events to include festivals, scavenger hunts, contests, business openings, and costume contests, just to name a few. Five communities received a $1,000 grant to fund their DDW events.
Support economic growth and preservation in the downtown and commercial districts.

Downtown and commercial districts are a visible indicator of community pride, along with its economic and social health. Downtowns also help define a community’s identity through distinctive, often historic architecture; shops and restaurants; and community gathering places. Maintaining the places that make a community unique, contributes to a sense of place and neighborhood identity.

4.4. Organize Great Lakes Main Street Conference

In partner with the Michigan Main Street Program, planning and hosting a newly created midwest Main Street conference in 2019.

*From August 17-19, 2019 this event is being planned to be held in South Bend, Indiana. A steering committee is being formed to assist with the planning.*

4.5. Design second-story housing competition for Main Street communities

The National Main Street Center cites this initiative as being the single most important element of successful and prosperous downtowns. With high vacancy rates in second story units across Indiana, the development of these units lead to an increase in property values and the profile and density of downtown districts.
Strategic Plan for Rural Indiana

Strategic Framework

Facilitate strategies to address rural broadband access.

The importance of broadband cannot be overstated in rural Indiana and how it has an immense impact on education, workforce, healthcare, economic development and quality of life. Rural broadband is vital to ensuring our rural areas can continue to thrive. In order to grow access to broadband, infrastructure and community involvement must be established and cultivated.

5.1 Collaborate with Director of Broadband Opportunities

Partner with new Director, state agencies and other private sector partners to encourage innovation and broadband access. Work with communities to help take appropriate steps to minimize limitations to broadband investment.

On Aug. 16, 2018 Lt. Governor Suzanne Crouch announced Scott Rudd will serve as the state’s new Director of Broadband Opportunities. Rudd most recently served as the town manager and economic development director for the town of Nashville. In 2018, OCRA has partnered with Scott to administer the Broadband Summit, the Broadband Readiness Planning Grants and also plan future training opportunities.

5.2 Establish grant program to fund planning activities for the installation of broadband

Launch a pilot planning grant program to identify local broadband needs in order to define parameters for installation. Technical assistance will be provided in the form of data analysis by content experts at local universities.

On Aug. 12, 2018 five rural Indiana communities were announced who will receive funding as a part of the Broadband Readiness Planning Grant. Purdue Center for Regional Development will provide technical assistance to all the pilot communities.

5.3 Host Statewide Broadband Summit

Understanding the critical nature of quality broadband access across our rural communities, OCRA will gather experts and other key stakeholders to provide a day long informational seminar highlighting key topics and issues surrounding broadband opportunities.

On Oct. 18, 2018, a full-day broadband summit was completed with panels and speeches from Lt. Governor Crouch and City of Fisher Mayor Scott Fadness. The event was hosted by Office of Lt. Governor, the Office of Community and Rural Affairs and the State Department of Agriculture. The purpose of the summit was to engage the public and stakeholders with information to accelerate broadband connectivity, improve digital inclusion and support local priorities. More than 250 attendees from local governments, state agencies and broadband providers gathered to explore ways to facilitate the expansion of broadband capacity, access and utilization throughout the state.
