

PROGRAM PURPOSE

The Indiana Advanced Nuclear Ready Community designation program guides and supports counties or regions seeking to prepare for advanced nuclear energy development.

The designation signals that a community has the infrastructure, workforce capacity, and formal local support necessary to attract small modular reactors (SMRs), advanced reactors, and nuclear supply-chain investment.

About Us

This program is administered by the Indiana Office of Energy Development.

Questions regarding eligibility, application procedures, or program requirements should be directed to: EnergyReady@oed.in.gov

Program Goals

- Reduce developer risk by completing early site assessments and community alignment.
- Attract nuclear developers and manufacturers through demonstrated readiness.
- Build workforce pipelines in partnership with educational institutions.
- Ensure coordination across state agencies, utilities, and local government.
- Promote ongoing public education on nuclear energy technologies and benefits.
