#### **MAC Rx – Variance Request of 856-IAC 1-28.1-9:**

Participating Members: Donna Wall, R.Ph., Del Fanning, R.Ph., Mark Smosna, R.Ph., Steve Anderson, R.Ph., Winnie Landis, R.Ph.

Curt Ayres, CEO, Miriam Cho, Pharm D, were present for the variance request.

MAC Rx is requesting a variance to permit them to operate the FirstDose system as an electronic emergency kit in its current and future long-term care facilities in the state of Indiana. It is a web-based software platform that permits MAC Rx to control access to this emergency drug supply by assigning unique access codes and defining access levels for facility and pharmacy staff. It tracks every entry into the system and every patient transaction at the pharmacy 24/7. The system constantly monitors inventory levels to permit prompt replenishment, identifying expiration dates and lot numbers for auditing and allows minimal inventory levels in the system.

The use of the FirstDose Electronic Emergency Kit in Indiana facilities would improve care to the facility residents and increase compliance than the use of a tackle box system. This system would provide: Better security; better accountability; better availability; monitors drug effectiveness-monitors expiration of all drugs in the system.

After discussion, the Board moved to APPROVE the Variance request.

**DISCUSSION**

**INSPECT:**

Participating Members: Steve Anderson, R.Ph., Mark Smosna, R.Ph., Del Fanning, R.Ph., Donna Wall, R.Ph., Winnie Landis, R.Ph.

**Federal Grants:**

- The CDC released the new Overdose Data to Action grant in February. The State Department of Health has asked IPLA to partner with them as sub-applicants for this grant opportunity. If applying, the application is due by May 2<sup>nd</sup> of this year. IPLA intends to apply for funding that would assist small physician practices in setting up an electronic medical record system. IPLA would pay the initial set-up costs for a web based EMR, provided the practice owner agrees to pay the annual maintenance fees for a minimum of five (5) years.

**National PDMP Enhanced Data Exchange (NPEDE):**

- INSPECT held a conference call last week with Appriss Health and the Management and Performance Hub to kick-off the NPEDE project. We discussed clinical applications to enhance patient risk analysis and engagement. The additional data sets to be reviewed in the upcoming weeks are non-fatal overdose events, Naloxone administration and criminal justice data.
- In preparation for the CSID application within INSPECT reports, AWARxE has begun collecting and tracking the identification numbers of individuals picking up controlled substance prescriptions from Indiana pharmacies and dispensing physician offices.

**Physician Compliance:**

- INSPECT had a call with Rick Rago from Walgreens Corporate to discuss delinquent dispensation records in AWARxE. Kara was able to send specific information about two (2) of the records in question to both Walgreens and Appriss. She also requested that Appriss provide the monthly total of submission error reports from Walgreens locations in Indiana over the last six (6) months. They will all be working together to identify the source of the issues and find a solution moving forward.

**Integration:**

- INSPECT is working with the EMR vendor AthenaHealth to connect all Indiana healthcare clients through a single source. **Clarification on Automated Dispensing Machine Licensing:**

Participating Members: Winnie Landis, R.Ph., Steve Anderson, R.Ph., Mark Smosna, R.Ph., Del Fanning, R.Ph., Donna Wall, R.Ph.

To change a permit type on an existing facility – they must submit a remodel application and all requirements.

If the ADS supplying Pharmacy changes – the Board indicated they would need to file a change of ownership application.

If a remote location changes a machine – they do not need to appear if the new machine has already been approved.

One license covers all ADS in a non-pharmacy facility.

First time application(s): If the Pharmacy has never had a remote approved and/or they are using a machine that has never been approved they must appear before the Board.

A pharmacy is adding a remote location machine to an existing remote location that has already been reviewed and approved – no appearance is necessary.

The Board indicated that the application should be revised to include a box for adding a machine. They also indicated that one (1) CSR covers all machines in the remote location facility.

The Director will research other states regulations of ADS for further review.
