Let the record reflect that Donna Wall recused herself from this matter and left the room.

The purpose of their study is to characterize codeine prescribing patterns for pediatric patients in the state of Indiana. The rationale for performing such a study is related to the fact that the FDA has listed codeine as contraindicated in pediatric patients less than twelve (12) years of age due to safety reasons that have led to death in children. Ultimately, the purpose of their project is directed at improving the health and safety of children in the state of Indiana by identifying the current codeine prescribing patterns which can then be used to leverage educational, operational, and/or legislative interventions to curtail the use of codeine in children.

They are requesting the following INSPECT data:

- Prescription records for medications containing codeine from 1/11/2011 through 8/31/2017 for patients ages 0 to 18 years of age
- Name (to assess repeat dosing and duplication de-identification protocol per INSPECT)
- Sex
- Date of Birth
- Date prescriptions filled
- Patient zip code
- Prescriber info (name, address of practice)
- Dispensing pharmacy (name, address)
- Directions for use

Amanda Garrett, INSPECT Database Analyst addressed the Board regarding this request. At this time she is not able to complete data requests due to the integration of the INSPECT system. She stated it would be at least a year before she can begin processing requests again.

After discussion, the Board moved to TABLE this request and to work with INSPECT staff when they are able to resume reports.

2. Impact of Medicaid lock-in programs on OUDs, doctor shopping, out-of-state impact on poisoning
