Ms. Vernon reported that IPA is working on the following legislation for 2020.

- Technician administered immunizations – also looking at lowering the age limit

Amanda Ka, PharmD, OptumRx Clinical Account Manager – Inspect Data Request:

Participating Members: Donna Wall, R.Ph., Mark Smosna, R.Ph., Steve Anderson, R.Ph., Del Fanning, R.Ph., Matt Balla, R.Ph., Winnie Landis, R.Ph.

The Office of Medicaid Policy and Planning (OMPP) is requesting a report from INSPECT for review by the Mental Health Quality Advisory Committee. It has come to their attention that there is a perceived problem with Medicaid beneficiaries using other forms of payment to receive agents to circumvent established prior authorization criteria. This is especially of concern in the area of work surrounding opioids in combination with benzodiazepines and carisoprodol-containing products. These agents, when used together, have the potential to have serious consequences for our members, and the Department of Mental Health and Aging has discovered an increase in overdose deaths involving patients on concomitant therapy. Reviewing an INSPECT report would give OMPP a tool to determine if there are potential pharmacies and prescribers of concern if educational initiatives would be beneficial. The report should only contain beneficiaries that received an opioid, benzodiazepine, or carisoprodol concomitantly.

They are requesting the following de-identified information:

- Dispensing Date – information pulled from January 1, 2018 to August 31, 2019

- Prescriber information – Specialty, NPI, Zip code
- Pharmacy information – NPI, Zip code
- Drug name; strength; quantity
- Days supplied
- Patient age, gender, county
- Payment type

After discussion, the Board moved to approve only the above listed de-identified information.

Participating Members: Donna Wall, R.Ph., Mark Smosna, R.Ph., Steve Anderson, R.Ph., Del Fanning, R.Ph., Matt Balla, R.Ph., Winnie Landis, R.Ph.

Ms. McGowen informed the Board that their objective is to determine the rates and association between initial opioid prescriptions in opioid-naïve patients and the likelihood of long-term use at one year post-discharge.

An Epic report will initially be run for August 2018 to exclude patients who received an opioid prescription within 30 days of admission within the Franciscan network. From the report, the patients' eligibility will be assessed by collecting data from INSPECT to determine if the patient is opioid naïve and if they meet inclusion criteria. Patients' INSPECT reports will be evaluated for opioid prescriptions written and dispensed within one year of discharge from Franciscan Health Indianapolis.

They are requesting the following on the INSPECT report:

- Opioid prescribed; strength
- Date written; filled
- Days' supply of initial prescription received at discharge
- Daily MME of initial prescription
- Total MME of initial opioid prescription
- Whether started on short-or-long-acting opioid
- Total days' supply written on initial prescription
- Number of total opioid prescriptions written initially
- Total MME written initially
- Total days' supply, number of prescriptions written, and total MME 30, 90, 180 and

1. Training and Education

- Several of our Veterinarians are still struggling with the use of PMP Clearinghouse for reporting dispensation data. We have coordinated with the IVMA to set up an onsite demonstration for a Veterinary clinic that will be recorded and added to the IVMA website. Appriss Health will have their company trainer lead a webinar on INSPECT for Veterinarians to start the session. Tim Thomas and Kara Slusser will be onsite at the clinic to answer questions and assist the Veterinary staff in setting up their accounts and submitting data to the clearinghouse.

2. Federal Grants

- IPLA met with State Budget and the Department of Health on October 30th to discuss the financial impact of the RxCheck connection. Our agency estimates that the cost of connecting to RxCheck and setting up a technical support system around the use of a second data sharing hub will be \$400,000. PLA will receive \$675,000 per year over the next three years from the CDC for the Overdose Data to Action grant. State Budget is recommending that PLA use \$400,000 from our grant award to cover the cost of connecting to and operating the RxCheck connection.
