Participating Members: Steve Anderson, R.Ph., Donna Wall, R.Ph., Del Fanning, R.Ph., Winnie Landis, R.Ph., John Wilson, J.D.

Mr. Brown submitted a document to the Board regarding their request for a temporary variance.

Troy Group is requesting a temporary variance in an effort to demonstrate the effectiveness, security and positive impact their secure, plain paper prescription printing solution provides to patients, prescribers and the community in general. Their solution is a software that works within the prescribers EMR system. It serves as a qualified technology and intelligent path toward meaningful use as it pertains to e-prescribing. It goes beyond creating CMS compliant security features by utilizing variable data and incorporating that data into security features that are then printed directly onto plain paper using the prescribers desktop or workgroup printers. Through advancements in software technology, a more secure method for printing and managing prescriptions is possible. The threat of pre-printed prescription paper theft is eliminated. Handling, stocking and all things related to accountability of pre-printed prescription paper is no longer required.

They are now using this method in over 500 hospitals nationwide. There are approximately eighteen (18) hospitals interested in Indiana.

The Board requested that Mr. Brown identify a small group of hospitals that agree to do a pilot program to see how everything works. Mr. Brown agreed to put together a listing of the hospitals that will agree to a pilot program and bring it to the Board for review.

The Board thanked Mr. Brown for his presentation.
