ANNUAL REPORT FOR PROGRAMS IN NURSING

Guidelines: An Annual Report, prepared and submitted by the faculty of the school of nursing, will provide the Indiana State Board of Nursing with a clear picture of how the nursing program is currently operating and its compliance with the regulations governing the professional and/or practical nurse education program(s) in the State of Indiana. The Annual Report is intended to inform the Education Subcommittee and the Indiana State Board of Nursing of program operations during the academic reporting year. This information will be posted on the Board’s website and will be available for public viewing.

Purpose: To provide a mechanism to provide consumers with information regarding nursing programs in Indiana and monitor complaints essential to the maintenance of a quality nursing education program.

Directions: To complete the Annual Report form attached, use data from your academic reporting year unless otherwise indicated. An example of an academic reporting year may be: August 1, 2011 through July 31, 2012. Academic reporting years may vary among institutions based on a number of factors including budget year, type of program delivery system, etc. Once your program specifies its academic reporting year, the program must utilize this same date range for each consecutive academic reporting year to insure no gaps in reporting. You must complete a SEPARATE report for each PN, ASN and BSN program.

This form is due to the Indiana Professional Licensing Agency by the close of business on October 1st each year. The form must be electronically submitted with the original signature of the Dean or Director to: PLA2@PLA.IN.GOV. Please place in the subject line “Annual Report (Insert School Name) (Insert Type of Program) (Insert Academic Reporting Year). For example, “Annual Report ABC School of Nursing ASN Program 2011.” The Board may also request your most recent school catalog, student handbook, nursing school brochures or other documentation as it sees fit. It is the program’s responsibility to keep these documents on file and to provide them to the Board in a timely manner if requested.

Linda A. Rooda, PhD, RN
Dean, School of Nursing
Indiana University Northwest
3400 Broadway
Gary, IN 46408-1197

Dear Dr. Rooda:

This letter is formal notification of the action taken by the National League for Nursing Accrediting Commission at its meeting on July 9-10, 2008. The Board of Commissioners granted the baccalaureate degree nursing program continuing accreditation and scheduled the next evaluation visit for Spring 2016.

Deliberations centered on the Self Study Report, the School Catalog, the Site Visitors Report, and the recommendation for accreditation proposed by the Program Evaluators and the Evaluation Review Panel. (See Summary of Deliberations and Recommendation of the Evaluation Review Panel)

The Board of Commissioners identified the following strengths and areas needing development:

Strengths by Accreditation Standard:
- Standard IV: Curriculum and Instruction
  - Interdisciplinary education project involving faculty and students across nursing, social work, and medicine.

Areas Needing Development by Standard:
- Standard I: Mission and Governance
  - Develop written policies specifically applicable to the nursing faculty that address health and safety, regulatory, and clinical agency requirements.

Standard II: Faculty
- Facilitate the timely completion of graduate study for those faculty who do not currently hold at a minimum a master's degree with a major in nursing.
Areas Needing Development by Standard (cont.):

Standard III: Students
- Ensure that information is clear regarding specific pre-requisites for admission and the competitive application process for all applicants.
- Ensure that all nursing students, including those in the BA/BS to BSN and RN to BS options, are subject to common policies (e.g., health status documentation requirements).

Standard VI: Integrity
- Implement strategies to ensure that all documents (paper and electronic) are accurate, current, clear, complete, and consistent.

Standard VII: Educational Effectiveness
- Ensure the expected levels of achievement are measurable, and the assessment methods are aligned and provide useful data for the area being assessed.
- Present required outcome data separately for each of the three program options and use the data for program improvement accordingly.

On behalf of the Commission, we thank you and your colleagues for your commitment to quality nursing education. By choosing to have accreditation by NLNAC, your nursing program demonstrates a continued interest in having the program measured against the highest national standards of quality in nursing education. If you have questions about this action or about Commission policies and procedures, please write or call me or a member of the Professional Staff.
