Chuck Lindquist appeared on behalf of ISNAP. The first week of November ISNAP was trained on the new electronic case management system. Mr. Lindquist gave the Board a copy of the compliance program overview for their review. One of the highlights of the program is that if licensees stop calling in to the system, ISNAP is alerted in three days time rather than quarterly. ISNAP had 32 RMA’s returned last month. Mr. Lindquist distributed the statistics for last month; there were 14 closures in intake with 7 not being diagnosed with a substance abuse disorder and 5 with a period of sobriety that did not meet ISNAP criteria.

V. EDUCATION

A. Indiana State University BSN Program—Plan of Correction

NCLEX Pass Rates: 2008-83.3% 2009-72.22% 2010-78.3%

Staff from Indiana State University appeared before the Board. ISU is decreasing the overall number of students they accept into their BSN program by 17%. ISU will now admit 50 students twice per year whereas in the past they were accepting 60 students twice per year. ISU would like to keep their current admission standard of a 2.5 G.P.A. for both traditional and returning students. ISU is placing ATI testing measures into place so that students may not graduate or proceed if they fail the ATI. The Board asked a question regarding Levels 1 and 2 of the ATI and ISU provided a copy of their policies for implementation of preparation of the NCLEX. The Board asked another question regarding the current cohorts and the possibility of not graduating. Within the cohort that is set to graduate, 50% passed and 50% were within 1 or 2 questions of being successful and will remediate and take the test again. The ATI policy will go into effect next semester and ISU is in the process of informing students about the new policy and expectations. The Board had
concerns about G.P.A. admission criteria and whether the prerequisite G.P.A. was used vs. overall admission into the university itself. ISU indicated it is using a science G.P.A. as well as the TEAS score.

Board Action: A motion was made and seconded to approve the POC. McIntosh/Narwold 8-0-0, motion carries.

B. Brown Mackie South Bend PN Program-Plan of Correction
NCLEX Pass Rates: 2008-67.8% 2009-70.53% 2010-74.2%
Standard Deviation: 2008-84.6% 2009-84.8% 2010-86.8%

Staff from Brown Mackie South Bend’s PN Program appeared before the Board. Brown Mackie believes their low NCLEX scores were related to the fact that they had no PN administrator and there was no type of process or procedure for evaluation for passing the NCLEX. Brown Mackie SB has now set guidelines for reaching achievement goals and students that cannot are placed in a remedial program and work 1 to 1 with staff to meet their goals. Brown Mackie SB implemented ATI in February 2010 and students that had already been in the program did not have the benefit of this information. Brown Mackie SB is now recommending that students who do not take the NCLEX within the first year or two of graduation come back for remediation and take a Kaplan-type course. Brown Mackie SB now follows up with students and encourages their students to test within three months of graduation. Brown Mackie SB admits students monthly but the program is capped at 25 admits per month. They usually take 10-15 students per month into the Intro to Nursing class. Brown Mackie SB’s clinical ratio is usually 1 RN to 8 students. They have a non-traditional student population that may need some study skills, etc. In total they have around 120 students in the PN program currently. The Board asked about dropouts and the staff responded that the persistence rate is around 86%. The school has new criteria regarding retakes and failures: students can only fail the same course twice or if students fail 3 separate courses they are removed from the program. Brown Mackie SB also recently changed the G.P.A. required every quarter to require a 2.0 G.P.A. for the PN Program. The Board addressed concerns that the G.P.A. requirement is very low and that the retake/failure policy may be too lenient and very costly to the student population.

Board Action: A motion was made and seconded to approve the POC. Narwold/Laux 8-0-0, motion carries

C. Purdue University North Central Request for Curriculum Change

Staff from Purdue University North Central ("PUNC") appeared before the Board. PUNC proposed to add and restructure a new foundations course. PUNC had both a foundations and intro to nursing course but would like to create an enhanced foundation course with more evidence based practice and adding a clinical component to help students be introduced to interacting with people. They are also consolidating their Capstone and Advanced Adult Health courses at the end of their program to aid students in preparing for NCLEX. The Board had a question regarding Capstone being 2 hours. Students spend 93 hours in the clinical setting for this course. PUNC moved hours into Community and Management Leadership with 135 hours in the clinical setting. Part of the Capstone hours went into the first foundation course and PUNC has added clinical hours to the foundation course in the lab with concepts of evidence based practice, learning and test taking skills and health promotion. PUNC then has time in the second foundations course to get into the facilities and acute care more quickly into the semester. The total change in credits across the program is adding one credit for a total of 124.

Board Action: A motion was made and seconded to accept the curriculum change. Narwold/McIntosh, 8-0-0, motion carries
