Mark Bunton recused himself. The State discussed the Proposed Settlement Agreement. The State explained why some charges were no longer applicable. The PSA includes a \$25,000.00 fine. The State verified that there was a pharmacist in the building after all. The Pharmacy Technician in Training's initials appeared on the labels. The State directed the Board to paragraph 17. The Technician entered himself at the Pharmacist in the system. Since this incident, system updates have occurred. The Board asked if the State had a copy of the policy. This can be required as part of the first quarterly report. The policy change occurred nationwide. The technician was the pharmacy manager. The State asked how they arrived at the \$25,000 fine. The maximum fine was \$71,000. There have been no further incidents, and this happened one time. The incident occurred in September 2023 and the technician was fired in November 2023. The Board asked why the case is just now coming before the Board. The current DAG inherited the case a couple of months ago. The Board asked if any patient harm occurred. CVS did audit every prescription and reached out to the patients. Not aware of any patient harm. The pharmacist that was on duty did not learn about this until a couple of days after the incident occurred. The State asked that the Board accept the Proposed Settlement Agreement. The Board would like to see the policy. The Board expressed concerns about the amount of the fine.
