

Statewide Opioid Summit

A Medication Assisted Treatment and Addictions Primer for Justice Professionals
July 25, 2018 | Indiana Convention Center

AGENDA

8:00 a.m.

Registration

9:00 a.m. | Opening Session

500 Ballroom, 1st Level

Welcome

Hon. Loretta H. Rush, Chief Justice of Indiana
Hon. William J. Nelson, Marion Superior Court

The Science of Addiction &
Medication Assisted Treatment (MAT)

10:30 a.m.

Break

10:45 a.m.

500 Ballroom, 1st Level

Legal Implications of Addiction & MAT
and the Role of Justice Professionals

11:45 a.m. -1:45 p.m. | Working Lunch

Sagamore Ballroom 3-4-5, 2nd Level

County-Team Sequential
Intercept Model (SIM) Discussions

Regina Huerter, Policy Research Associates, New York

2:00 p.m. | Concurrent Breakout Sessions

• Services at Your Fingertips: Utilizing 211 & Open
Bed Software to Locate Treatment Resources

Room 109-110, 1st Level

• Sobriety Treatment and Recovery Teams (START)
and Family Recovery Courts– How these Models
Can Help Families Affected by the Opioid Crisis

Room 104-106, 1st Level

• Legal and Policy Barriers to
Effective Opioids Interventions

500 Ballroom, 1st Level

• Indiana Opioid Data Overview

Room 101-103, 1st Level

• Treating Opioid Use Disorder in Jail Settings:
Workforce Development and Program Opportunities

Room 107-108, 1st Level

• Indiana Scheduled Prescription Electronic
Collection and Tracking (INSPECT) Program

Room 116-117, 1st Level

3:00 p.m.

Break

3:10 p.m.

Best Practices for Individuals
with a Substance Use Disorder

500 Ballroom, 1st Level

4:10 p.m.

The Face of Recovery & Closing Remarks

500 Ballroom, 1st Level

Hon. Loretta H. Rush, Chief Justice of Indiana
Hon. Steven H. David, Justice, Indiana Supreme Court
Brandon George, Director, Indiana Addiction Issues Coalition

4:20 p.m.

Adjourn

SESSION DESCRIPTIONS

The Science of Addiction & Medication Assisted Treatment (MAT)

Faculty: Dr. Leslie Hulvershorn, Medical Director, Family and Social Services Administration, Division of Mental Health and Addiction and Indiana University School of Medicine; Dr. Andrew Chambers, Indiana University School of Medicine, Addiction Psychiatry Fellowship Director; Dr. Jennifer Walthall, Secretary, FSSA and Indiana University School of Medicine; and Moderator, Hon. Darrin Dolehanty, Wayne Superior Court #3

A panel of expert physicians will discuss addiction as a disease of the brain with a focus on opioid use disorders. The presentation will address the neurobiology and pathogenesis of opioid addiction, biological vulnerabilities, and the causes and potential remedies of the epidemic.

Faculty will cover the fundamentals of medication assisted treatment (MAT) for opioid use disorders, review the clinical evidence, the neurobiological mechanisms, and the personal and societal risks of using/not using MAT. This session will explore the array of treatment settings in which individuals can receive MAT and the regulatory environment surrounding MAT. This session will also include a moderated panel discussion addressing facts and myths about the use of MAT for opioid use disorders.

Legal Implications of Addiction & MAT and the Role of Justice Professionals

Faculty: Douglas Marlowe, J.D., PhD, Senior Scientific Consultant for the National Association of Drug Court Professionals

This session will review legal standards governing the use of MAT in the criminal justice system, including best practice standards promulgated by NADCP and other leading national practitioner organizations. Audience members will learn about the appropriate roles and responsibilities of criminal justice professionals in working with persons receiving MAT, and methods for monitoring and reducing the risk of diversion or misuse of the medications.

Best Practices for Individuals with a Substance Use Disorder

Faculty: Douglas Marlowe, J.D., PhD, Senior Scientific Consultant for the National Association of Drug Court Professionals

In this plenary session, Dr. Marlowe will highlight policy considerations and best practices for serving and supervising justice-involved persons diagnosed with opioid and other substance use disorders. Audience members will learn practical methods for screening appropriate candidates for MAT, effective procedures for compliance-monitoring, and responsible ways of dealing with misuse or untoward effects from the medications.

Services at Your Fingertips: Utilizing 211 & Open Bed Software to Locate Treatment Resources

Faculty: Dr. Nishi Rawat, Open Beds, Inc.; Julie Johns-Cole, Indiana 211.

What steps do you currently take to find treatment resources? What is your success rate? Is there a better way to locate an open bed? By leveraging current technologies with best practices identifying capacity and patient referral, Indiana's Family and Social Services Administration, 211, and OpenBeds Inc. deployed a provider-facing, cloud-based platform that facilitates the referral of patients in need of substance use disorder treatment. This platform replaces existing manual search and communication processes to provide real-time treatment facility availability, evidence-based therapy offerings, two-way digital provider communication, and data aggregation and analytics.

Faculty will discuss the platform, implementation across the state, treatment utilization and referral data compiled to date, and how the network can serve the criminal justice system. Faculty will also discuss challenges and opportunities to improve transparency and integrate care across the medical, behavioral health, and justice systems.

Sobriety Treatment and Recovery Teams (START) and Family Recovery Courts—How these Models Can Help Families Affected by the Opioid Crisis

Faculty: Hon. Christopher Goff, Justice, Indiana Supreme Court; Tina Willauer, Program Director, National Center on Substance Abuse and Child Welfare; Kristina Killen, Program and Services Manager, Indiana Department of Child Services; Pamela Knight, Field Manager, Indiana Department of Child Services.

The Sobriety Treatment and Recovery Team (START) model, a child welfare led intervention, has been shown to improve outcomes for both parents and children impacted by parental substance use disorders. START is instrumental in ensuring child safety while helping families find recovery, promoting cross-system collaboration, and addressing system barriers to support best practice by both the child welfare system and treatment providers.

Family Recovery Courts (FRC), a judiciary led intervention, uses a multidisciplinary and collaborative approach to help families suffering from opioid/substance use and co-occurring disorders. Family Recovery Courts have been shown to increase parental participation in treatment as well as the rate of children reunified with their parents. Both the START and FRC models promote collaborative relationships between child welfare agencies, substance use treatment providers, the court and other family serving systems and agencies. This session will increase understanding of the strategies associated with each model and how these strategies overlap and intersect. Additionally, this session will focus on approaches to operationalizing MAT practices when serving families involved with the both the child welfare and court systems.

Legal and Policy Barriers to Effective Opioids Interventions

Faculty: Nicolas P. Terry, Hall Render Professor of Law, Executive Director, William S. and Christine S. Hall Center for Law and Health, Indiana University Robert H. McKinney School of Law; Ross D. Silverman, Professor of Health Policy & Management, Indiana University Richard M. Fairbanks School of Public Health at IUPUI, Professor of Public Health & Law, Indiana University Robert H. McKinney School of Law; and Aila Hoss, Visiting Assistant Professor and IU Grand Challenge Fellow, Indiana University Robert H. McKinney School of Law.

In 2017, Indiana University, in cooperation with Governor Eric Holcomb and community partners, launched the Grand Challenge: Responding to the Addictions Crisis initiative, a university-wide effort to advance interdisciplinary research and interventions in response to the substance abuse crisis.

Researchers at the IU Robert H. McKinney School of Law and IU Richard M. Fairbanks School of Public Health led the project on "Legal and Policy Best Practices in Response to the Substance Abuse Crisis." Their preliminary report identifies legal and policy barriers that hinder effective implementation of opioids crisis interventions. During this session project team members will present findings identifying legal and policy barriers which hinder effective implementation of opioid crisis interventions, discuss implementation, and suggest future actions. A summary of their report may be found at grandchallenges.iu.edu.

Indiana Opioid Data Overview

Faculty: Timothy George, Director of Policy, Office of Governor Eric J. Holcomb; Jim McClelland, Executive Director, Indiana Drug Treatment Prevention and Enforcement, Office of Governor Eric J. Holcomb.

This breakout session will offer an overview of the State's data efforts. Speakers will provide insights from the data and discuss it being used to combat the opioid epidemic.

Treating Opioid Use Disorder in Jail Settings: Workforce Development and Program Opportunities

Faculty: Zachary Adams, Ph.D., HSPP, Department of Psychiatry, Indiana University School of Medicine; Nicholas Svetlauskas, Addiction Bureau Chief, Division of Mental Health and Addiction, Indiana Family and Social Services Agency; Mary Beth Bonaventura, Indiana Attorney General's Office; Douglas Huntsinger, Special Assistant for Drug Prevention, Treatment & Enforcement, Office of Governor Eric J. Holcomb; and Stephanie L. (Spoolstra) Anderson, LCSW, Executive Director, Addiction Recovery Services Indiana Department of Correction.

Incarcerated persons experience elevated rates of opioid use disorder and other complex health conditions, such as Hepatitis C. Medical professionals working in correctional settings face challenges in delivering treatment for opioid use disorder due to gaps in resources, training, and a lack of specialists. Project ECHO is a lifelong learning and guided practice model that increases workforce capacity to provide best practice specialty care and reduce health disparities through hub-and-spoke knowledge sharing networks. Specifically, Project ECHO uses videoconferencing technology to connect health professionals in the community with experts.

This presentation gives an overview of the ECHO model with an emphasis on initiatives to address the opioid epidemic at Indiana University School of Medicine, applications of the ECHO model in correctional settings, and legal ramifications for failing to provide MAT to prisoners. In addition to opportunities with Project ECHO, this session will also detail jail-based MAT projects around the state of Indiana; best practices for jails, given physical space limitations; and ramifications for failing to provide MAT to prisoners.

Indiana Scheduled Prescription Electronic Collection and Tracking (INSPECT) Program

Faculty: Diane Mains, Staff Attorney, Indiana Office of Court Services, Office of Judicial Administration; William Woodruff, INSPECT Business System Consultant, Professional Licensing Agency.

What is it? How do I access it? How may I use Indiana Scheduled Prescription Electronic Collection (INSPECT) information? Learn how probation officers and court staff may access and use INSPECT when completing a presentence report; determining eligibility for a program or service; and community supervision management to help address the problem of prescription drug abuse and diversion in Indiana.
