AUDIT RESULT AND COMMENT

INTERNAL CONTROLS OVER FINANCIAL TRANSACTIONS AND REPORTING

There were deficiencies in the internal control system of the Town related to financial transactions and reporting.

Lack of Segregation of Duties: The Town had not separated incompatible activities related to cash, receipts, disbursements, and financial close and reporting. The Clerk-Treasurer was primarily responsible for collecting, recording, and depositing Town receipts, writing and posting checks, completing the bank reconciliation, and preparing and submitting the Annual Financial Report financial information into the Indiana Gateway for Government Units website. There was no control in place, such as an oversight, review, or approval process.

The Indiana State Board of Accounts (SBOA) is required under Indiana Code 5-11-1-27(e) to define the acceptable minimum level of internal control standards. To provide clarifying guidance, the State Examiner compiled the standards contained in the manual, *Uniform Internal Control Standards for Indiana Political Subdivisions*. All political subdivisions subject to audit by SBOA are expected to adhere to these standards. The standards include adequate control activities. According to this manual:

"Control activities are the actions and tools established through policies and procedures that help to detect, prevent, or reduce the identified risks that interfere with the achievement of objectives. Detection activities are designed to identify unfavorable events in a timely manner whereas prevention activities are designed to deter the occurrence of an unfavorable event. Examples of these activities include reconciliations, authorizations, approval processes, performance reviews, and verification processes.

An integral part of the control activity component is segregation of duties. . . .

There is an expectation of segregation of duties. If compensating controls are necessary, documentation should exist to identify both the areas where segregation of duties are not feasible or practical and the compensating controls implemented to mitigate the risk. . . ."
