AUDIT RESULT AND COMMENT

INTERNAL CONTROLS OVER FINANCIAL TRANSACTIONS AND REPORTING

A similar comment appeared in a Management Letter addressed to the Clerk-Treasurer for the examination period ending December 31, 2016.

Condition and Context

There were deficiencies in the internal control system of the Town related to financial transactions and reporting. The Town had not separated incompatible activities related to cash and investments, receipts, and financial close and reporting.

Cash and Investments

The bank account reconciliations were prepared by the Clerk-Treasurer; however, there was no documentation of controls in place, such as an oversight, review, or approval process.

Receipts

The Clerk-Treasurer collected, recorded, and deposited receipts. There was no documentation of controls in place, such as an oversight, review, or approval process.

Financial Close and Reporting

The Clerk-Treasurer did not have a proper system of internal control in place to prevent, or detect and correct, errors in in the Annual Financial Report entered into the Indiana Gateway for Government Units financial reporting system. The Clerk-Treasurer entered the financial information without an oversight, review, or approval process.

Criteria

The Indiana State Board of Accounts (SBOA) is required under Indiana Code 5-11-1-27(e) to define the acceptable minimum level of internal control standards. To provide clarifying guidance, the State Examiner compiled the standards contained in the manual, *Uniform Internal Control Standards for Indiana Political Subdivisions*. All political subdivisions subject to audit by SBOA are expected to adhere to these standards. The standards include adequate control activities. According to this manual:

"Control activities are the actions and tools established through policies and procedures that help to detect, prevent, or reduce the identified risks that interfere with the achievement of objectives. Detection activities are designed to identify unfavorable events in a timely manner whereas prevention activities are designed to deter the occurrence of an unfavorable event. Examples of these activities include reconciliations, authorizations, approval processes, performance reviews, and verification processes.

An integral part of the control activity component is segregation of duties. . . .

There is an expectation of segregation of duties. If compensating controls are necessary, documentation should exist to identify both the areas where segregation of duties are not feasible or practical and the compensating controls implemented to mitigate the risk. . . ."
